Individual Placement Descriptor*

Trust	North West Thames Hospital Trust, Northwick Park Hospital
Site	North West London NHS Trust, Northwick Park Hospital
Trainee Information System (TIS) Post Code (and local post number if known)	
Placement details (i.e. the specialty and sub-specialty)	F1 Cardiology
Department	The cardiology department is based on Jenner ward (9th floor). The department is split into CCU (coronary care unit) and the cardiology ward. The CCU is staffed by SHOs and more senior doctors, not FY1s. The ward includes areas including the Chest Pain Assessment Unit (CPAU) and the heart failure unit. There are 3 FY1s and 2-3 SHOs in total. One of SHOs staffs the CCU with 8-10 patients every week. SHOs are doing the ward cover shifts for cardiology (including cross-cover for other wards like haematology).
Type of work to expect and learning opportunities	F1s are ward based throughout their weekly schedule and are expected to look after all aspects of patient care, admin work and seeking help from the relevant medical/surgical specialty when needed. They are also expected to do acute medicine shifts for their on-calls. There are opportunities to shadow in the cardiac catheter lab when the ward is well staffed.
Where the placement is based	North West Thames Hospital Trust, Northwick Park Hospital
Clinical supervisor(s) for the placement	Dr Bethell/ Dr Violaris/ Dr. El Ghamaz
Main duties of the placement	Daily ward rounds. Half of the patients are seen by the consultant and the other half are seen by the registrar. Each junior doctor (FY1 or SHO) prepares the notes for a set of patients and sees the patient with the registrar or the consultant. After the ward round they will need to carry out relevant jobs including booking investigations, prescribing medications, specialty referrals, chasing results and working with MDT to ensure successful and timely discharge of patients.
Typical working pattern in this placement *(e.g. ward rounds, clinics, theatre sessions)*	Daily ward rounds normally start around 0900, both on Jenner and CCU. F1/SHOs are expected to summarise patients' issues and progress in the notes before a senior comes to review the patient with them.

	Every Tuesday there is a weekly Joint Cardiology-Cardiothoracic (JCC) meeting, where patients considered for cardiac surgery are discussed. F1s must ensure relevant paperwork for such patients are completed in advance of this meeting. On call requirements: On call shifts take place in acute medicine (clerking in ED or AMU cover). They include 3 weekends in the 4-month placement.
Local education provider (LEP) / **employer information**	North West London Hospitals NHS Trust

Site	Northwick Park
Trainee Information System (TIS) Post Code (and local post number if known)	
Placement details (i.e. the specialty and sub-specialty)	Care of the Elderly F1
Department	Geriatrics
Type of work to expect and learning opportunities	• 4 different Care of the Elderly wards • Typically, 2-3 consultants per ward • Looks after patients with care of the elderly needs (e.g. not independent at home, cognitive impairment) on Dickens, Hardy, Fielding and Evelyn wards. The firm completes a comprehensive geriatric assessment on all patients within their first few days of admission. Patient care is multi-disciplinary with daily meetings to discuss the patients with representatives from each discipline present. The team • 2-3 Consultants • 1 Clinical Fellow/ SpR • 2-3 SHOs • 1-2 FY1(s) Bleeps/Contact numbers • Consultants contactable via mobile • SHO/ FY1: ward-dependent
Where the placement is based	Northwick Park - Geriatrics
Clinical supervisor(s) for the placement	Vary by ward
Main duties of the placement	**Rotas** • Hours are roughly 8:45 - 5pm (9-5 on paper) • Usually you leave on time, often not much later than 5.30 unless it's a particularly busy day/friday when handing over for the weekend/ making weekend plans can take a while • Arrive at about 8.45 to print off lists and see which patients have been transferred to other wards • Banding: 1b • For leave you should contact ashika.ghia@nhs.net • 9x days annual leave, 4x zero days in 4 months **Average Day** • Sorting the list before 9 • Handover/board round meeting at 9 for allocation of new patients and to talk through the rest of the list to highlight sick existing patients or any issues overnight.

Typical working pattern in this placement *(e.g. ward rounds, clinics, theatre sessions)*	• Ward round from 9 till 12/1pm and jobs until the end of the day. • At the end of the day put blood forms out for patients who need bloods the following day and update the patient list on ePRO with up-to-date clinical issues and management plans • Handover the bleep at the end of the day (5pm) **Typical Weekly timetable** • Tuesday: FY1 teaching 1pm • Wednesday: 1pm Geri's teaching often in SR8 Ed Centre **On Calls** • FY1 is on the general medical on call rota 2 weekends (0900-2130) in 4 months, 2x post take weeks (0800-2000), 2x short stay/ clerking weeks (0900-2130) **Things that you should have done by end of each day** • Put out bloods • Update the list • Handover outstanding jobs to evening ward cover **Conclusion** • You will be very well supported on this job and you will learn a lot of general medicine as there is a very high turnover of patients. • For each new patient make a summary including: date and reason for admission, full PMHx, SHx, FHx, AMTS, problem list, all relevant investigations, and dates of recent admissions. Print out recent discharge summaries and check gcis for other clinic letters/ STARRS assessments. Check body map has been done by nursing staff and that relevant care bundles are in place. Always find out the patients baseline and discuss ceilings of care early with the Consultant. • This is an enjoyable placement for F1 where you will be able to hone your clinical skills and learn how to have discussions with relatives in a well-supported environment.

Trainee Information System (TIS) Post Code (and local post number if known)	
Placement details (i.e. the specialty and sub-specialty)	F1 Gastroenterology
Department	Gastroenterology
Type of work to expect and learning opportunities	Type of work: General Ward admin including: • Maintaining patient lists; • Note taking on ward rounds; • Discharge summaries; • Ordering of a variety of investigations Clinical skills: • Clinical examnation skills • Venupuncture • Cannulation of difficult patients • Procedures – Ascitic Taps/Drains Learning opportunities: • Supported freedom to review patients, identify issues and form and implement management plans • Numerous interesting cases for discussion with seniors, members of other teams / MDT. Especially management of palliative patients with Macmillan • Formal teaching program organised through the postgraduate centre • Weekly x-ray & MDT meetings • Opportunity to experience endoscopy / ERCP lists • On Call provides opportunity to clerk and present new patients on the post take ward round
Where the placement is based	Northwick Park Hospital
Clinical supervisor(s) for the placement	Various Consultants
Main duties of the placement	As above
Typical working pattern in this placement *(e.g. ward rounds, clinics, theatre sessions)*	There is a consultant ward round every day of the week. All consultants usually see any new/sick patients

	Usually the day involves coming in for 8:30 am update the list with any new patients that have arrived. Handover 9-09:30 attended by one member of the team. Most consultants begin the ward round on FSW at 10:00 so after handover we have to summarise any new patients, and print up the updated list. During the consultant ward round, jobs include scribing/doing jobs generated. This can include blood, investigations requests, consultant referrals. After the ward round any practical procedures e.g Ascitic drains/taps and TTA's can be done. In the afternoon, we then update the list with bloods and outcomes of any investigations. We usually have a paper round with the reg/SHOs in the afternoon as well to update the whole team (this is very much dependent on the team).

Foundation Programme
Individual Placement Descriptor*

Trust	Northwick Park Hospital
Site	North West London Hospitals NHS Trust Northwick Park Hospital, Jack's Place and Paediatric A&E
Trainee Information System (TIS) Post Code (and local post number if known)	
Placement details (i.e. the specialty and sub-specialty)	F1 General Paediatrics
Department	Paediatric Services at The North West London Hospitals NHS Trust are provided at Northwick Park Hospital (NPH). The service at NPH provides inpatient beds on Jack's Place children's ward, a 'day care' unit (PDCU) and outpatients department. There is a dedicated 24hr children's accident and emergency department within main A&E. NPH also has a dedicated neonatal intensive care unit and a community paediatric unit for Harrow. The F1 has the opportunity to spend 2 weeks in the neonatal unit and 1 week in community paediatrics.
Type of work to expect and learning opportunities	F1 Doctors will alternate their work in the ward and A&E weekly. In the 'normal' working day on the ward the F1 is expected to deliver the daily medical care of all the patients on their ward irrespective of specialty. During A&E the F1 will be involved with the generic clerking of patients being admitted and the ongoing care of the patients in the unit. The overall educational objectives of the F1 year are to provide the trainee with the knowledge, skills and attitudes to be able to • Take a history and examine a patient • Identify and synthesise problems • Prescribe safely • Keep an accurate and relevant medical record • Manage time and clinical priorities effectively • Communicate effectively with patients, relatives and colleagues • Use evidence, guidelines and audit to benefit patient care

	• Act in a professional manner at all times • Cope with ethical and legal issues which occur during the management of patients with general medical problems • Educate patients effectively • Become life-long learners and teachers. • To regularly liaise with tertiary centres like GOSH and the Royal Brompton and to attempt supervised procedures like venepuncture, heel pricks and cannulation.
Where the placement is based	North West London Hospitals NHS Trust Northwick Park Hospital, Jack's Place and Paediatric A&E
Clinical supervisor(s) for the placement	Dr Wolfgang Muller, Dr As0hiya Ali
Main duties of the placement	The F1 doctor is responsible with other staff for the ward care of patients and the maintenance of the patient's medical record. They are expected to attend the structured teaching programmes provided by the department. The doctor will be responsible for other specific clinical duties as allocated by consultants, registrars and SHOs including performing other duties in occasional emergencies and unforeseen circumstances. During A&E the F1 doctor has the opportunity to initially clerk and examine patients and present and review them with the registrar/consultant. This is a great opportunity for learning and case based discussion.
Typical working pattern in this placement *(e.g. ward rounds, clinics, theatre sessions)*	Ward Week: Mon-Fri: 8am handover; 9am Ward round and ward jobs; Finish 4:30pm Mon – 12.30 Radiology Meeting Tues – 12:00 Psychosocial Meeting 13:00 Paediatric Grandround / F1 teaching Wed - 8.45am SHO teaching Thus - 8.45am Consultant teaching Fri - 8.45am Registrar teaching A&E Week: Mon - Fri: Discharge Summaries and A&E Finish 4.30pm Sat & Sun: 1 in 4 - 8am Handover, 9am Ward Round – finish 8:30pm
Local education provider (LEP) / employer information	North West London Hospitals NHS Trust

Foundation Programme
Individual Placement Descriptor*

Trust	London North West University Healthcare NHS Trust
Site	Northwick Park Hospital, spread across various wards
Trainee Information System (TIS) Post Code (and local post number if known)	
Placement details (i.e. the specialty and sub-specialty)	F1 General Surgery
Department	General surgery is run as an 'Emergency Surgical Unit', there is no distinction between upper and lower GI with all patients coming under the acute consultants and F1s work for all 6 of the Emergency Surgery Consultants. There is usually 2 F1s working per week as one is often on leave and the other in HDU.
Type of work to expect and learning opportunities	Working hours are Monday - Friday 8-6, 2 weeks of HDU (8-5), one week of zero days with no on calls or weekend. F1s work for the 'chronic team', on a Monday and Friday morning there is a handover meeting where patients who have had their operation or surgical management are handed from the acute on call team to the chronic team for continued surgical management. These days are often busy with a lot of TTAs, organising of investigations. One F1 normally goes on this “post take” ward round and the other stays with the chronic patients that have rolled over from the week before. Other days morning ward round with a registrar to see patients, see unwell patients, carry out jobs, board round at 4pm. Generally days are busy with lots of jobs and managing unwell patients which is good for clinical exposure and improving your time management skills. Large team of nurse practitioners work with team who often help do bloods, cannulas, organise investigations, able to prescribe / order imaging. Limited clerking experience. High turnover of patients means that F1s are continually being exposed to a reasonable level of unwell patients.

	However this is not excessive and often very good senior support. Opportunity to go to theatre on quieter days.
Where the placement is based	Northwick Park Hospital
Clinical supervisor(s) for the placement	Various Surgical Consultants
Main duties of the placement	Monday: Handover 8am followed by post take ward round. Radiology meeting 12.30 followed by board round of all patients with consultant Tuesday: Reg round, 2pm Care of Elderly meeting - discussion of medical management of elderly patients under our care Wednesday: Reg round Thursday: Reg round Friday: Hanover 8am followed by post take ward round. Surgical teaching 12.30 (free lunch) HDU week: FY1 looks after 5-10 HDU patients along with consultant anaesthetist, FY1 often sees patients first in morning followed by round with anaesthetist (varies depending on consultant). Usually a consultant of the week basis. Good exposure to Art lines, central lines, non invasive ventilation etc.
Typical working pattern in this placement *(e.g. ward rounds, clinics, theatre sessions)*	
Local education provider (LEP) / employer information	London North West Hospitals NHS Trust

Placement details (i.e. the specialty and sub-specialty)	F1 Respiratory Medicine
Department	Medicine
Type of work to expect and learning opportunities	• Based on Gaskell ward level 7 (secretaries level 6) • Some outliers on Gray Ward [shared with ENT], AAU or SSU level 4 • There are six consultants, in charge of both general medical and respiratory patients • Each have their own extra interests (listed below) • If you are unsure of anything, assess the patient, discuss with the SHOs, failing that then the regs, then consultants How to get urgent clinical advice and urgent investigations Things that you should have done by end of each day • Update the list and print our bloods • Anything to hand-over to evening on-call SHO, bleep them on 037 before you leave Conclusion
Where the placement is based	Northwick Park, F1 Respiratory Medicine.
Clinical supervisor(s) for the placement	Consultants: Dr Dan Ornadel dan.ornadel@nhs.net, lung cancer Dr Rachel Tennant rachel.tennant@nhs.net, AAU and HDU Dr Arnab Datta arnab.datta@nhs.net, ILD, AAU and HDU Dr David Adeboyeku, Clinical lead for Respiratory Dr Margret Coleman Dr Tara Sathyamoorthy Registrars: 3-4 Juniors: 3 SHOs, 4 FY1s Respiratory Secretaries: Anita and Carol
Main duties of the placement	• Try and plan leave as early as possible • Dr Datta coordinates the leave rota • Depends on staffing levels on the ward • If you want leave during on calls or AAU commitments you need to make Helen Linnane aware

	• Your responsibility to arrange the necessary swaps
Typical working pattern in this placement *(e.g. ward rounds, clinics, theatre sessions)*	• Ward list from the nursing station • Update the patient list as needed • We have been using the computer in the doctors' office for this • Email the list to yourself so you can print it from another computer • MDT meeting at 9ish every day at the nurses' station • This keeps you up to date with everything that is going on with all the patients • A member of the team (usually SHO or SpR) needs to attend the AAU handover [Dickens Meeting Room] • New patients will be allocated • Important that whoever attends knows the number of patients under Respiratory care, as this will inform how many new patients you can accept • A member or two of the team needs to then see and manage the patients on AAU and SSU. • 2 Consultants on for the week [Thursday to Thursday; 1 for Gaskell; 1 for outliers] • The rest of the day involves seeing all the patients and doing the jobs • Mon: 1pm Consultant/Reg lead teaching for Resp Juniors • Tues: 1pm, 12.30pm Lung Radiology meeting (you normally miss it due to FY1 teaching, but try and come to the first half hour) • Weds: AM Bronchoscopy (try to attend once or twice), 1pm AAU teaching • Thurs: 1pm Grand Round in • Fri: 2.15pm FY1 teaching • Lung MDT (only seniors attend but add patients onto it via Anita, try and attend once or twice) The List • Ward list from the nursing station • Update the patient list as needed • We have been using the computer in the doctors' office for this • Email the list to yourself so you can print it from another computer Ward Rounds • Patients allocated to either Dr Tennant/Dr Datta, or Dr Ornadel • For all consultants, important to know about each patient Dr Ornadel's ward round

	o On Tuesdays and Thursdays o Text Dr Ornadel in the morning to check when he is able to start o For new patients, try to have their history and investigations ready o He may also wish to go through the notes and investigations himself o For existing patients give a summary to remind him Dr Tennant's ward round oOn Mondays and Fridays o Dr Tennant will let you know when she plans to do her ward round o For new patients prepare a summary of the patient o She may wish to go through the notes and investigation herself o For existing patients give a summary to remind her Dr Datta's ward round o Mondays and Fridays, he will let you know when his ward round will be oVery thorough and also very fast oMust know all the patients beforehand oGather his patients' notes in the doctors' office o He will go through all of his patients in the doctors office and formulate provisional plans o Then see the patients and decide on clear plans for them o We usually take key notes during the ward round, and then formally write in the patients' notes immediately after the round •Twice weekly consultant ward rounds • The remaining days there are junior or SpR lead WRs Specialty specific information • Arrange follow-up appointments by printing out EDNs and giving to Anita •Placed in a tray on Gaskell • Should be given to secretaries at the end of each day • Level 6 opposite the stairs/lifts – lung function labs (where you request lung functions tests and may be called to do ABGs some mornings); outpatient requests are via ICE • For outpatient spirometry, fill in a lung function request envelope/form and drop in the box outside the lung function room • For outpatiant imaging, fill in a blue Radiology request card making it clear that it is an outpatient request, and roughly when the scan needs to be done

	• Also add outpatient requests to EDN and highlight to Anita • Send pleural fluid for cytology, MC&S, AFBs, amylase, LDH, glucose, protein • Bronchoscopy: Anita can schedule these for in- and outpatients • Home oxygen: fill in a HOOF(B) form (signed by pt/carer) after discussing with SpR or consultant and fax to Air Liquide • Pleurodesis: with doxycycline - a senior decision - prescribe doxy 500mg intrapleural on STAT side of drug chart and write underneath 'to be administeresd by doctor for pleurodesis'. Highlight this to pharmacy for ordering the supply • Imaging guided biopsy: Fill in blue radiology form and discuss with lung radiologists. Pts need recent clotting, platelets and spirometry • Spirometry: fill in form and drop in box outside lung function room, also a portable machine on the ward in the controlled drugs cupboard • You may be called to do ABGs in lung function or clinic/ambulatory care • Outpatients post lung biopsy may need to have their CXRs reviewed to rule out pneumothorax before discharge - can discuss with SpRs or radiologists if any doubt • Patients admitted directly to the ward will need admission booklets and drug charts filled On Calls • You are on the medical on call rota • 1pm Wed - let Anita know before midday Tues if anyone needs to be added • 12.30pm Lung Radiology meeting (you normally miss it due to FY1 teaching, but try and come to the first half hour) It's a busy job but the consultants are very reasonable and there's normally enough support so make the most of it, learn procedures and you will gain a lot from the experience!

Trainee Information System (TIS) Post Code (and local post number if known)	
Placement details (i.e. the specialty and sub-specialty)	F1 Urology
Department	The department of urology comprises 7 consultant urologists, each spending one week on call. The team also comprises 9 registrars (with one assigned to ward cover at all times), 3 SHOs and 3 F1s (all of which are based on the ward).
Type of work to expect and learning opportunities	Essentially a ward based job comprising the day-to-day management of ward based patients, but with ample opportunities to attend theatre or clinics for learning, usually there is plenty of ward cover if you would like to get away from the ward for other purposes ie. audits etc.. The urology job includes spending 2 weeks in the surgical elective high dependency unit (eHDU) which involves overseeing approximately 8-10 eHDU patients with consultant anesthetist and relevant teams looking after the patients.
Where the placement is based	Northwick Park F1 Urology
Clinical supervisor(s) for the placement	Mainly Mr. Erik Havranek, Mr Rajesh Kavia
Main duties of the placement	Responsible for the ward care of urology patients, including maintenance of medical record, updating handover lists, ordering radiological investigations and interventions and facilitating patient discharge. Frequent opportunities to engage in lecture based/practical teaching organised by postgraduate education department and urology department.
Typical working pattern in this placement *(e.g. ward rounds, clinics, theatre sessions)*	Mon – Friday 8am -5pm, with 1 in 6 long days (8am – 8pm). Daily 8am ward round led by registrar or consultant, opportunity for theatre any weekday afternoon when ample ward cover. Mon: Ward jobs Tues: Ward jobs / FY1 teaching, 1pm Wed: Ward jobs / Urology teaching, 1pm Thurs: Ward jobs Fri: Ward jobs/ FY1/FY2 teaching, 2:15 pm Sat: 1 in 6 on call

	Sun: 1 in 6 on call Urology Weekend cover requirements: 1 in 6 (8am – 8pm) Ward cover

Trainee Information System (TIS) Post Code (and local post number if known)	
Placement details (i.e. the specialty and sub-specialty)	FY1 Intermediate Care - Fletcher Ward Department of Medicine for the Elderly
Department	Department of Medicine for Older People [DMOP] 2 consultants, one SpR/IMT3, four SHOs and one FY1. Minimum ward cover of 3 junior doctors for 30 patients.
Type of work to expect and learning opportunities	Fletcher ward is one of four DMOP wards at Northwick Park. It is focused more on rehabilitation than the other wards; many patients are moved here from the orthopaedic ward for Comprehensive Geriatric Assessment and rehabilitation. However, about 50% of the beds are currently occupied by general elderly patients due to the site bed pressures at Northwick Park Hospital.
Where the placement is based	Northwick Park hospital
Clinical supervisor(s) for the placement	Dr Eddy Chua – one of 2 DMOP Consultant on the ward
Main duties of the placement	The FY1 on Fletcher ward is not part of the acute medical rota and so will be on Fletcher 9-5, Monday to Friday, with no long days or weekends. • Active participation in patient care utilising the Comprehensive Geriatric Assessment • Conducting independent ward rounds and attending Consultant led ward rounds • Liaise with families and wider MDT with respect to all aspects of patient management • Writing electronic discharge summaries and TTAs • Recognising end of life and management of patients and families in this situation • Managing multi-morbidity and long term conditions • Rehabilitation of orthogeriatric patients
Typical working pattern in this placement *(e.g. ward rounds, clinics, theatre sessions)*	**Example SHO/FY1 Timetable** **Monday** MDT Board round (9:00am to 9:30am) Consultant Ward Rounds **Tuesday** MDT Board Round (9:00am to 9:30am) Own ward round + new patients review with Consultants FY teaching (1-2pm) X-ray meeting (2pm) **Wednesday** MDT Board round (9:00am to 9:30am) Consultant Ward Rounds Departmental meeting (1-2 pm) **Thursday** MDT Board round (9:00am to 9:30am) Own ward round + new patients review with Consultants Medical Grand round (1-2 pm) **Friday** MDT Board round (9:00 – 9:30am) Consultant Ward Rounds FY teaching/clinical vignette (2-3pm) Weekend discharge meeting (330pm)

Placement details (i.e. the specialty and sub-specialty)	F2 Ambulatory Care
Department	5 consultants, SpRs, other CMTs and F2s
Type of work to expect and learning opportunities	Clinic setting. Assessment of new patients referred from A&E or GP; board or face-to-face review with registrar or consultant. Assessment of follow-up patients. Liaising with specialist teams and organisation of investigations. You will be able to do a number of procedures under supervision (e.g. lumbar puncture, ascitic drain, pleural aspirate and/or drainage). Monday and Friday are generally the busiest days. Consultant reviews generally involve teaching. In addition there is scheduled FY2 teaching on Tuesday and Acute Medicine teaching on Wednesdays; the Hospital Grand Round is on Thursday. There are opportunities for audit and quality improvement projects. You will work with a number of advanced nurse practitioners (ANPs) who may see patients independently but will also support you. While on the 2 month ambulatory care block you are part of the acute medicine team. Every 3rd weekend you are on call for Medical HDU and the Medical Emergencies Team (Friday night until 21:00, Saturday and Sunday 09:00-17:00) under supervision of the HDU/Ward SpR
Where the placement is based	F2 Ambulatory
Clinical supervisor(s) for the placement	Currently any 1 of 5 Acute Medical Consultants
Main duties of the placement	Assess patients and (with support from SpR/Consultant) provide an appropriate management plan
Typical working pattern in this placement *(e.g. ward rounds, clinics, theatre sessions)*	9am-5pm Teaching as above.

Placement details (i.e. the specialty and sub-specialty)	F2 Child and Adolescent Psychiatry
Department	The post will be based in the Brent Community Child and Adolescent Mental Health Service (Brent CAMHS) which provides Tier 2 and Tier 3 Specialist CAMH services to the local community. Brent is an outer London borough in north-west London It has a population of 317,264 and is the most densely populated outer London borough, with a population density of 74.1 persons/ha. The population is young, with 35% aged between 20 and 39. Brent is ethnically diverse, with 65% of its population from black, Asian and minority ethnic (BAME) backgrounds. Brent CAMHS comprises 3 Consultant Child and Adolescent Psychiatrists and a large multidisciplinary team. There are separate teams within the service for adolescents, ADHD, ASD and Learning Disability. All range of mental health problems from 0 to 18 years old is represented. There is provision of different treatment modalities such as psychiatric reviews and medication, psychology, group therapy, family therapy, psychotherapy and outreach work. There is strong service users involvement within the service. The service is linked with Tier 4 inpatient services, Northwick Park Hospital A&E department neighboring CAMHS and Adult Mental Health Services, other partners and agencies in the local community such as social services, schools and third sector organisations. The service receives approximately 1200 new referrals per year and it has the highest activity within the CAMHS department. There are approximately 10 new cases assessed every week on a routine and emergency base.
Type of work to expect and learning opportunities	The FY2 will generally be expected to deliver the medical care of the young patients and their carers. The overall educational objectives of the F2 year are to provide the trainee with the knowledge, skills and attitudes to be able to Take a psychiatric history and assess the mental state of a patient

	Take a medical history and be able to carry out a physical examination when indicated Identify and synthesise problems and be able to carry out a formulation about patients presenting problems and their treatment plan. Keep an accurate and relevant medical record Manage time and clinical priorities effectively Communicate effectively with patients, relatives and colleagues Use evidence, guidelines and audit to benefit patient care Act in a professional manner at all times Cope with ethical and legal issues which occur during the management of patients with general medical problems Educate patients effectively
Where the placement is based	Brent CAMHS

Foundation Programme
Individual Placement Descriptor*

Trust	London North West University Healthcare NHS Trust
Site	Microbiology Department, Northwick Park Hospital
Trainee Information System (TIS) Post Code (and local post number if known)	
Placement details (i.e. the specialty and sub-specialty)	F2 Medical Microbiology
Department	There are 3 Consultants (two based purely at Northwick Park and one who works between Northwick Park and Central Middlesex/Ealing) in the department and the F2. The Consultant on call is shared with Ealing Hospital, which has two further Microbiology Consultants. The Lab Staff (Biomedical Scientists) are highly knowledgeable and skilled. The department serves Northwick Park, Central Middlesex and St Mark's Hospitals, as well as local GP practices.
Type of work to expect and learning opportunities	Daily Consultant-led bench round (Blood cultures, respiratory, enterics, urine, wound/swabs, mycology and serology), with the Infection Control Nurses and Antibiotic Pharmacist. It is usually the F2s' responsibility to contact the clinical teams with positive culture results each morning and obtain a brief summary of the clinical picture to present on the bench rounds. With time, the F2 is expected to be able to provide basic advice when discussing positive cultures. However, all advice given must be conferred with the microbiology consultant on the round. In addition to the bench round, telephone consultations are received throughout the day. These are usually taken by the consultants but the F2 may take them if the consultant is busy or unavailable. They will expect the F2 to discuss any advice they give, particularly when they start. There are some weekly antibiotic rounds or meetings with specific teams e.g. ITU on Wednesdays. There is a TB/Infectious Diseases clinic is every Wednesday afternoon: The F2 sees patients on TB treatment and checks for compliance, side-effects and ensure adequate response to treatment. Management of all cases is discussed with the SpR/Consultant in clinic. Occasionally, non-TB patients will also be in clinic.

	Infectious Diseases MDT every Friday: Formal paper ward round where the ID patients are presented by the F2s/SpRs and discussed. Teaching: -Foundation teaching on Tuesday -Morning Report on Wednesday mornings (optional) -AAU Teaching on Wednesday (optional) - Microbiology Lab Teaching on Wednesday (optional) -Grand Round on Thursday (optional) -Foundation teaching/Vignettes on Friday - Monthly Microbiology CPD teaching The F2 is expected to present an interesting clinical topic to the Microbiology department, including the laboratory staff, during the rotation. There is the opportunity for audits/publications.
Where the placement is based	Northwick Park Hospital Microbiology Department
Clinical supervisor(s) for the placement	Dr G Gopal Rao, Dr P Khanna
Main duties of the placement	As above. A detailed induction and guide to the job has been written as an F2 handover in the department
Typical working pattern in this placement *(e.g. ward rounds, clinics, theatre sessions)*	The job is Monday-Friday, 9:00am-5:00pm. No weekends/zero days. Lunch is variable. Bench rounds 11:30am (Fri 11:00am) Consultation times 10-11:30am and 2-4:30pm *On call requirements:* None
Local education provider (LEP) / employer information	London North West Healthcare NHS Trust

Site	Northwick Park Hospital
Trainee Information System (TIS) Post Code (and local post number if known)	
Placement details (i.e. the specialty and sub-specialty)	FY2 Intermediate Care - Fletcher Ward Department of Medicine for the Elderly
Department	2 consultants, 1 SpR, 3 SHOs, 1 F1
Type of work to expect and learning opportunities	Fletcher ward is a DMOP ward with 30 beds. The patients come from two main streams: The first are from the Orthopaedic ward and come to Fletcher ward for Comprehensive Geriatric Assessment including rehabilitation following (most commonly) neck of femur fractures. You can expect to manage the medical issues whilst these patients have rehabilitation with the physiotherapists, as they commonly have multiple comorbidities and are at risk of develop hospital acquired infections. In addition you can learn to optimise pain management post operatively to enable the patient to fully engage with physiotherapy. The second set come from the acute medicine wards. You will get a lot of learning opportunities to learn the management of common medical problems such as infections, heart failure decompensation and kidney injury. In addition to that, you will have the opportunity to review unwell patients when on-call. You will become comfortable with breaking bad news and ceiling of treatment discussions, with the family and the patient and become familiar with end of life management. You will also update families frequently so you will develop your communication skills. • Active participation in patient care utilising the Comprehensive Geriatric Assessment • Conducting independent ward rounds and attending Consultant led ward rounds • Liaise with families and wider MDT with respect to all aspects of patient management • Writing electronic discharge summaries and TTAs • Recognising end of life and management of patients and families in this situation • Managing multi-morbidity and long term conditions • Rehabilitation of orthogeriatric patients
Where the placement is based	Northwick Park Hospital
Clinical supervisor(s) for the placement	Dr Chua Dr Bhattacharyya (if you start on the Orthopaedic)
Main duties of the placement	The ward is generally split into 2 Consultant teams. Juniors are then split between them. Duties include scribing on ward round then

	carrying out jobs over the course of the day. On days without Consultant ward rounds, SHOs will do independent Ward Rounds. Consultants see all new and sick patients in the morning. Attendance at handover from the night team On-call cover (including evenings and weekends) for various wards but usually Fletcher Ward carrying bleep 239. This bleep also covers medical outliers on Evelyn but this makes up a very small amount of the workload. After 5pm outstanding jobs for any patients on the ward are handed over to 1 SHO. Reviewing sick patients in the evening and escalating accordingly – via the ward cover med registrar on bleep 511. Handing over sick patients or jobs for the night at the night handover at 9pm. Weekends jobs will be put on Epro by the team on Friday. Some patients will need reviewed on Sat +- Sun. Many patients will need bloods chased. Other jobs may be needed. Any patients who are admitted to the ward during an on-call need to be reviewed – when they reach the ward you are the one to action PTWR jobs. There are rarely vebal handovers for these patients so keeping an eye for new ones coming up is required. At the weekend there are discharge WRs where a consultant goes through the patients with weekend EDDs. You'll be made aware of these patients and any necessary jobs by the team on Friday afternoon.
