Individual Placement Descriptor*

Placement	F1 Cardiology
The department	<p>Newham University Hospital (NUH) serves a local population of about 330,000. There are high local rates of cardiovascular morbidity and mortality. The secondary care cardiology services for the local population are provided by NUH. The cardiology department is located adjacent to the fully equipped acute care unit (ACU). It provides comprehensive non-invasive diagnostic facilities, including ECGs, treadmill stress testing, Holter monitoring, tilt testing, transthoracic and transoesophageal echocardiography, and pacemaker follow-up services.</p> <p>Cardiology in-patients are looked after on the 16-bedded ACU. A 12-bedded step-down unit is located immediately adjacent to the ACU. There is a daily chest pain clinic as well as outpatient clinics on most days.</p> <p>The Department of Cardiology is staffed by six Consultants, Dr Archbold, Dr Khanji, Dr Ranjadayalan, Dr Sekhri, Professor Timmis, and Dr Weerackody. Most posts are shared with Barts Heart Centre, which provides tertiary level care for Newham patients including cardiac MRI, cardiac CT, coronary angiography, PCI, cardiac surgery, cardiac rhythm management devices, and ablation.</p> <p>Dr Archbold, Dr Khanji, Dr Ranjadayalan, Dr Sekhri and Dr Weerackody undertake the in-patient ward rounds. Dr Dhinoja undertakes an Electrophysiology (EP) clinic and an EP ward round on Friday afternoons.</p>
Duration	This post rotates with two other specialty posts at NUH to comprise a 3 x 4 month post rotation.
The type of work to expect and learning opportunities	<p>This is a ward-based post in cardiology at a district general hospital. The main expectation is to deliver the daily medical care for the cardiology in-patients on the ACU. The Cardiology F1 is involved in the clerking of patients admitted to the ward and in the ongoing care of the patients in the unit.</p> <p>The main educational objectives for the F1 year are to be able to:</p> <ul style="list-style-type: none"> • Take a history and examine a patient • Identify and synthesise problems • Prescribe safely • Keep an accurate and relevant medical record • Manage time and clinical priorities effectively • Communicate effectively with patients, relatives and colleagues • Use evidence, guidelines and audit to benefit patient care • Act in a professional manner at all times • Cope with ethical and legal issues which occur during the management of patients with general medical problems • Educate patients effectively • Become life-long learners and teachers. <p>This post provides the educational opportunities necessary to meet these learning objectives, either through clinical exposure/experience, ad-hoc and formal teaching.</p>
Where the placement is based	Newham University Hospital; Coronary Care Unit/Acute Care Unit
Clinical Supervisor(s) for the placement	Dr Andrew Archbold
Main duties of the placement	The main responsibility of this post is the provision of the day-to-day care for cardiology in-patients on the ACU. This is undertaken in partnership with two other F1 doctors and under the supervision of one F2, one CMT, cardiology registrars, and cardiology consultants. An important part of this job is to

	maintain the medical records.
Typical working pattern in this placement	<p>Daily: 0900 Ward round 1500-1600 Ward round 1200/1700/2100 Handover</p> <p>Mon: 1230-1330 Grand round 1100-1700 Assessment unit</p> <p>Tues: 0900-1200 Ward Round 1400-1700 MDT Meeting</p> <p>Wed: 1400 F1 teaching</p> <p>Fri: 0800-0900 Departmental meeting</p> <p>Weekend ward cover Sat: 0900-2100 1 in 5/6 Sun: 0900-2100 1 in 5/6</p> <p>On call requirements: On call commitments for General Medicine 1 in 6 with flexible twilight shifts.</p>
Employer information	The employer for this post is Barts Health NHS Trust. The post is based in Newham University Hospital, Glen Road, London E13 8RU. This is a medium-sized district general hospital which provides secondary care services for the local population of approximately 330,000.

*It is important to note that this description is a typical example of the placement and may be subject to change.

Placement details (i.e. the specialty and sub-specialty)	Gastroenterology/Hepatology and General Internal Medicine
Department	Gastroenterology
Type of work to expect and learning opportunities.	<p>The doctor will be affiliated with the Gastroenterology department offering inpatient medical care on a ward-based system. They will also be looking after patients admitted with specific gastroenterology or liver conditions. The doctor will be part of a larger team consisting of 6 Gastroenterology/ Hepatology Consultants, 4 Specialist Registrars, 2 Senior House Officers (IMT SHOs), 1 FY2 SHO, and 3 FY1 trainees. They will be expected to contribute to the hospital on call rota, where they will be responsible for the clerking, assessment and management of patients referred to Acute Medicine.</p> <p>Although the hospital is relatively small, it has a high turnover of patients and there is a lot of pathology. This offers excellent experience of a wide range of acute and chronic conditions with varying degrees of complexity. We are very interactive & supportive and like to teach. We have an excellent reputation for offering high standards of training for all grades of junior doctor in practical procedures (including assessment of ascites and insertion of ascitic drains) and outpatient clinics. There is teaching on a weekly basis in the form of journal clubs and medical grand rounds in addition to upper GI cancer and hepatobiliary/viral hepatitis/IBD MDT meetings, which the junior doctors can attend. A lot of our juniors have gone on to become Specialist Registrars in Gastroenterology and our aim is to help the doctor achieve whatever goals they wish to attain.</p>
Where the placement is based	Newham University Hospital
Clinical supervisor(s) for the placement	One of the six Gastroenterology/Hepatology consultants covering the gastroenterology consultant of the week will be the clinical supervisor.
Main duties of the placement	<p>The requirements of the post include:</p> <ul style="list-style-type: none"> • Take a history and examine a patient • Identify and appropriately manage clinical problems • Prescribe safely • Keep an accurate and relevant medical record • Manage time and clinical priorities effectively • Communicate effectively with patients, relatives and colleagues • Use evidence, guidelines and audit to benefit patient care • Act in a professional manner at all times • Manage ethical and legal issues which occur during the management of patients with general medical problems • Educate patients effectively • Become life-long learners and teachers.
Typical working pattern in this placement (e.g. ward rounds, clinics, theatre sessions)	Daily consultant or SpR led ward rounds and weekly consultant supervised outpatient clinics of liver patients. Regular weekday and weekend on-calls during the day or evening (but not night).
Local education provider (LEP) / employer information	The employer for this post is Barts Health NHS Trust

FOUNDATION YEAR 1 PSYCHIATRY TRAINING POST JOB DESCRIPTION

1) INTRODUCTION

1.1 Grade of Post	Foundation Year 1
1.2 Specialty/Sub-Specialty	General Adult Psychiatry
1.3 Type of Contract/WTE	Substantive 1.0 WTE
1.4 Duration of Post	4 months
1.5 Trainer Name	Dr Johnny Iyiola
1.6 Base/Address	Ivory Ward Newham Centre for Mental Health Cherry Tree Way Glen Road London E13 8SP
1.7 Service Line	General Adult Mental Health

2) DESCRIPTION OF THE POST and TRAINING OPPORTUNITIES

2.1 Qualifications and Experience of the Trainer	<p>Dr Iyiola is a consultant in General Adult Psychiatry with special interest in neurodiversity and sport and exercise psychiatry. He is a member of the Royal College of Psychiatrist and has experience of managing a variety of acute and chronic mental health conditions in both inpatient, community and crisis resolutions services. He has a breadth of knowledge and experience in working with individuals suffering from psychosis, anxiety, depression, bipolar affective disorder, personality disorder, autism, ADHD and substance misuses.</p>
2.2 Description of the Clinical Service	<p>Ivory Ward is a 15 bed female only inpatient service that provides holistic, safe and therapeutic care to patients both informal and under section suffering from an acute relapse of mental disorder or presenting to mental health services for the first time.</p> <p>Staff actively engage and involve people who are experiencing acute mental health episodes which cannot be managed in a less restrictive setting, owing to the degree of risk, clinical need or patient choice.</p> <p>Whilst patients receive individualised care and treatment based on their needs, the multi-disciplinary team works closely with all patients, their families and carers in providing a therapeutic environment which lends itself to our patients' recovery.</p> <p>Our team consists of a consultant psychiatrist, three specialty doctors and dedicated nurses and social therapists, a psychologist, a pharmacist and an occupational therapist. We work in partnership with community recovery teams, home treatment teams, perinatal team, early intervention services and GPs.</p>

<p>2.3 Description of Clinical/Medical Team</p>	<p>The foundation trainee will join the inpatient team of Ivory Ward at Newham Centre for Mental Health working between the hours of 9-5pm on weekdays (exception being foundation year mandatory academic sessions).</p> <p>The team consists of 1.0 Consultant Psychiatrist, 2.0 SASG, 1.0 FY1 as well as a ward pharmacist, occupational therapist, psychologist and a series of nurses and social therapist who work on a shift basis ensuring the ward is well staff during the day and night.</p> <p>The foundation year trainee will be involved in the assessment and management of patients presenting with mental disorders. Under supervision of other senior doctors, the trainee will be expected to assist the medical team with admission clerking (history, mental state examinations), physical examination, phlebotomy, ECGs, requesting investigations (X-Ray, CT, MRI, Ultrasounds etc), physical health referrals, screening test (Autism and ADHD), discharge summaries, MDT discussions and daily ward rounds.</p>
<p>2.4 Training Opportunities</p>	<p>The trainee will be encouraged to undertake programmed Supervised Learning Activities (SLEs) and Work Place Based Activities in accordance with the foundation curriculum and core competencies in psychiatry.</p> <p>At Newham Centre for Mental Health the trainee will see a wide range of psychiatric disorders of patients in crisis that cannot be safely managed in the community. The trainee will gain experience of the assessment and treatment of all such conditions in a multidisciplinary context.</p> <p>There is the opportunity to observe and participate in Mental Health Act Assessments and other joint assessments within the team.</p> <p>The supervised work that the FY1 trainee undertakes will be structured, with well-defined guidelines and learning objectives so that the work is appropriate for a doctor at this level of training.</p>
<p>2.5 Additional comments</p>	<p>Skills and knowledge gained on an acute general adult psychiatric ward are readily transferable to other psychiatric specialties, general practice and also all medical settings where people with mental health problems frequently present with physical problems.</p> <p>The trainee will also be offered information and advice about careers in psychiatry.</p>

Foundation Programme Individual Placement Descriptor

3) CLINICAL SUPERVISION	
3.1 Clinical Supervision arrangements	<p>The trainee will initially discuss a personal development plan with the consultant, setting out key learning objectives for the 4 month placement.</p> <p>The trainee will receive close clinical supervision at all times by members of the team, led by Dr Johnny Iyiola. A trainer or named deputy will be available for advice at all times in addition to one hour a week formal and private supervision away from the ward environment with Dr Iyiola.</p>
3.2 One to One Trainer Educational Supervision Arrangements	<p>In addition to once weekly clinical supervision additional face to face time with consultant and seniors SASG doctors for reflection and clinical supervision will occur daily to review the placement and learning objectives/PDP.</p> <p>There is an expectation that the foundation year trainee would meet frequently with their allocated educational supervisor at least 2-3 times during the 4 month rotation to ensure that their educational needs are being fulfilled.</p>
3.3 Trainer cover arrangements	<p>The consultant psychiatrist for Ivory Ward provides cross-cover for consultants on Ruby Ward (male triage) and PICU. In Dr Iyiola's absence clinical ward duties and daily supervisions will be led by Dr Ratneswaran who is a suitable highly experienced and senior SASG doctor. In addition another consultant psychiatrist is nominated to cover responsible clinician responsibilities and the foundation year one trainee will be notified well in advance of such arrangements.</p>
3.4 Additional comments	<p>The post offers a broad experience in all aspects of general psychiatry and there will be opportunities for the trainee to experience other teams within the Newham Directorate (home treatment team, perinatal service, early intervention team, learning disability, CAMHS and psychiatry liaison) depending on the trainee's interest and enthusiasm.</p>
4) INDUCTION – describe the arrangements including any out of service leave required	
4.1 Team/Departmental Induction	<p>The trainee will be inducted to the team/ward following standard local induction for all trainees. They will receive information about their job, roles and responsibilities prior to commencing the post also.</p>

**Foundation Programme
Individual Placement Descriptor**

5) SPECIFIC CURRICULA PRIORITIES – describe how these are met in the post	
5.1 Community Orientation	The post is based solely in Newham Centre for Mental Health. However, there is daily contact with community teams, the Home Treatment Team, Early Intervention Services, Drug & Alcohol and other community teams, referring patients for on-going community support and treatment. The trainee will learn about the biopsychosocial approach of care and treatment for psychiatric inpatients in addition to the foundations of psychiatric continuity of care after discharge from a psychiatric ward to manage severe and enduring and chronic mental illness in the community.
5.2 Long Term Conditions	The trainee will gain experience of assessment, diagnosis and management and care of patients with mental health illness presenting in crisis for the first time to mental health services or following relapse of a chronic mental disorder. They will see a broad range of mental illness including psychotic illness (including Schizophrenia, Schizoaffective Disorder, Bipolar Disorder), Depression, Anxiety Disorders, Personality Disorder, Neurodiversity, Conversion Disorders and also co-morbid substance misuse as well as psychosocial factors impacting on mental illness.
5.3 Holistic Care	A holistic approach to care is integral to the way general adult psychiatry is practiced in both an inpatient and community setting, and is essential because of the complex nature of the problems presented. A biopsychosocial approach is key to working holistically with patients within the psychiatric inpatient unit. The team therefore provides an excellent environment for the trainee to achieve competencies in these areas.
5.4 Inter-professional and Integrated Working	The psychiatric inpatient teams work closely with all the other psychiatric services within the secondary care mental health. Multidisciplinary working is key to the discipline, and joint interventions are very common. The trainee would participate in these as part of their placement. Integrated working is also required with other mental health services including home treatment team, general practices, and with social care providers.
5.5 Additional Comments	Ivory ward is a teaching friendly environment that accommodates the teaching of fourth year medical students on five week rotations at least five times a years. There is an expectation that the foundation year trainee subscribes to this ethos and engages actively by imparting learning and medical knowledge to medical students, students of other MDT disciplines as well as other more junior health professionals working on the ward where there are informal and formal opportunities.

**Foundation Programme
Individual Placement Descriptor**

6) LOCAL ACADEMIC SUPPORT	
6.1 Local academic programme	<p>The trainee will attend the weekly Foundation Programme at Newham University Hospital.</p> <p>There is also scope for attending the monthly psychiatry academic programme based at Barts and the weekly academic programme at Newham Centre for Mental Health. This programme includes a weekly case presentation, psychotherapy balint group, additional teaching in topics allied to psychiatry and a journal club.</p> <p>The trainee will get the opportunity to present a case at this forum, supervised by their consultant if they express an interest to do so and if there is availability on the local weekly academic programme.</p>
6.2 Local Knowledge eg Library Resources	Access to Library at NUH as well as online resources.
6.3 Additional comments	The trainee will be signposted by Dr Iyiola to Royal College of Psychiatrist courses and conferences offered at a subsidised fee to trainees.

Job Description FY1 Obstetrics and Gynaecology

Newham University Hospital is a busy East London unit, that serves a population of approximately 350,000.

Newham is an area of high deprivation (with regards to employment, education, health and housing). The borough has the UK's lowest proportion of White British people (16.7%), and 42.4 % of residents were born overseas (London average 26.4%). Newham has the lowest proportion of people with English as their main language of all local authority areas in England and Wales. It has one of the highest rates of households in temporary accommodation, and one of the highest population turnover rates in London; with large numbers of people moving into the borough transiently. It is also believed to have the highest number of asylum seekers and refugees of any London borough. In 2016 only 56.7% of Newham's women were employed. This is reflected

The hospital is the site of approximately 5,800 births annually, and deals with a wide range of gynaecological pathology. The size of the O&G department is considerable, when compared to the relatively small size of the hospital, and offers exceptional training opportunities for Foundation Doctors – for both those considering a career in O&G, and those looking to acquire generic competencies,

Junior Doctors

3 Staff Grade Doctors	3-4 GPVTS
11 Deanery ST1 -ST7 O&G Trainees	2-3 Foundation Year 2
4 Speciality Doctors	2 Foundation Year 1
4 Clinical Fellows	
2 Associate Specialists	

Duties

FY1 Doctors are largely supernumerary, and rostered to give a range of experience in both Obstetrics and Gynaecology. These include acute obstetric cover, acute gynaecology cover, obstetric and gynaecology ward rounds, ward cover, elective obstetric theatre and gynaecology theatre. Depending on staffing levels, you may also be scheduled to assist in elective antenatal and gynaecology clinics, and Maternity triage/ Maternity Assessment Unit. Presence in the hospital is required for all shifts.

The rolling rota will be provided prior to commencement of the post. A weekly rota is sent out each Friday, detailing daily duties.

Standard working days 0800-1730

Teaching

In addition to local FY1 teaching, attendance is expected at daily departmental teaching 0800-0845 (unless scheduled for acute duties).

Foundation doctors will have the opportunity to present cases for local learning at Risk Management meetings. Foundation doctors are also required to attend PROMPT obstetric simulation training during their placement,

Foundation doctors will be allocated a clinical supervisor during their time in the department- and should arrange a meeting with their supervisor within the first 4 weeks of their rotation.

Medical students are placed within the department, and all staff are expected to support their training.

Leave

All leave should be requested with 6 weeks' notice, on Health Roster and by emailing the rota coordinator, who is required to approve all requests.

Conditions

All doctors should be aware of current local recommendations regarding vaccination and are requested to have hepatitis vaccinations available via the Occupational Health Department at Newham University Hospital.

Termination of pregnancy is carried out within the unit; however no staff member is compelled to directly participate in the administration of a procedure which results in the termination of a pregnancy if they have a conscientious objection, except in the case of emergency care (when all doctors must provide care/ act in the best interest of a patient).

There is no statutory right to conscientious objection in the case of emergency hormonal contraception as this is not an abortifacient, but concerns should be discussed with the supervising consultant.

Placement	F1 Paediatrics
The department	<p>Department of Paediatrics comprise of 18 beds which includes 2 High Dependency beds, 8 cubicles and 2 bays accommodating 4 beds each.</p> <p>There are clinics every day including outreach specialist clinics of cardiology, neurology, haematology and endocrinology from Great Ormond Street Hospital and Royal London Hospital.</p> <p>FY1 doctor works in paediatrics for 4 months. During paediatric placement, he/she works in the ward from Monday to Friday from 08:30-17:00. He/she does not participate out of hours duties.</p> <p>The department has a high case mix with complex pathology, unique place for trainee doctors to get wealth of clinical experiences.</p> <p>The department is closely linked to Great Ormond Street Hospital and Royal London Hospital which provide tertiary services to Newham paediatric population. The department has close link with Queen Mary medical school, getting fourth year and final year medical students for 6 weeks rotating in paediatric, neonates and Accident & Emergency. The department employs a teaching registrar who is responsible for medical students training in the department.</p>
Duration	This post rotates with two other specialty posts at NUHT 3 x 4 month posts
The type of work to expect and learning opportunities	<p>All F1 Doctors in hospital posts will generally be ward based during the 'normal' working day and expected to deliver the daily medical care of all the patients on their ward irrespective of specialty. Whilst in the Paediatric attachment the F1 will be involved with the generic clerking of patients being admitted from A&E and the ongoing care of the patients in the unit.</p> <p>The overall educational objectives of the F1 year are to provide the trainee with the knowledge, skills and attitudes to be able to</p> <ul style="list-style-type: none"> • Take a history and examine a patient • Identify and synthesise problems • Prescribe safely • Keep an accurate and relevant medical record • Manage time and clinical priorities effectively • Communicate effectively with patients, relatives and colleagues • Use evidence, guidelines and audit to benefit patient care • Act in a professional manner at all times • Cope with ethical and legal issues which occur during the management of patients with general medical problems • Educate patients effectively • Become life-long learners and teachers.
Where the placement is based	Newham General Hospital; Paediatric ward (Rainbow Ward)

Clinical Supervisor(s) for the placement	Any paediatric consultant
Main duties of the placement	The F1 doctor is responsible with other staff for the ward care of patients and the maintenance of the patient's medical record. They will have opportunity to work with the consultants in outpatients clinics for at least one day each week, and also take responsibility for problems arising in patients on the ward. They are expected to attend the structured teaching programmes provided by the department. The doctor will be responsible for such other specific clinical duties as allocated by consultants including performing other duties in occasional emergencies and unforeseen circumstances.
Typical working pattern in this placement	<p>Daily clinical hand over from 08:30-0900 in academic centre. Newham University Hospital

Job Description FY2 Obstetrics and Gynaecology

Newham University Hospital is a busy East London unit, that serves a population of approximately 350,000.

Newham is an area of high deprivation (with regards to employment, education, health and housing). The borough has the UK's lowest proportion of White British people (16.7%), and 42.4 % of residents were born overseas (London average 26.4%). Newham has the lowest proportion of people with English as their main language of all local authority areas in England and Wales. It has one of the highest rates of households in temporary accommodation, and one of the highest population turnover rates in London; with large numbers of people moving into the borough transiently. It is also believed to have the highest number of asylum seekers and refugees of any London borough. In 2016 only 56.7% of Newham's women were employed. This is reflected

The hospital is the site of approximately 5,800 births annually, and deals with a wide range of gynaecological pathology. The size of the O&G department is considerable, when compared to the relatively small size of the hospital, and offers exceptional training opportunities for Foundation

Doctors – for both those considering a career in O&G, and those looking to acquire generic competencies,

11 Deanery ST1 -ST7 O&G Trainees	2-3 Foundation Year 2
4 Speciality Doctors	2 Foundation Year 1
4 Clinical Fellows	
2 Associate Specialists	

Duties

FY2 Doctors are on the general SHO rota (consisting of ST trainees, GP trainees, FY2, and staff grades) and rostered to give a range of experience in both Obstetrics and Gynaecology.

These include acute obstetric cover, acute gynaecology cover, obstetric and gynaecology ward rounds, ward cover, elective obstetric theatre and gynaecology theatre.

Depending on staffing levels, you may also be scheduled to assist in elective antenatal and gynaecology clinics, and Maternity triage/ Maternity Assessment Unit. Presence in the hospital is required for all shifts.

The rolling rota consists of a variety of day and nights shifts, and will be provided prior to commencement of the post. A weekly rota is sent out each Friday, detailing daily duties.

Teaching

In addition to local FY1 teaching, attendance is expected at daily departmental teaching 0800-0845 (unless scheduled for acute duties).

Foundation doctors will have the opportunity to present cases for local learning at Risk Management meetings. Foundation doctors are also required to attend PROMPT obstetric simulation training during their placement,

Foundation doctors will be allocated a clinical supervisor during their time in the department- and should arrange a meeting with their supervisor within the first 4 weeks of their rotation.

Medical students are placed within the department, and all staff are expected to support their training.

Leave

All leave should be requested with 6 weeks' notice, on Health Roster and by emailing the rota coordinator, who is required to approve all requests.

Conditions

All doctors should be aware of current local recommendations regarding vaccination and are requested to have hepatitis vaccinations available via the Occupational Health Department at Newham University Hospital.

Termination of pregnancy is carried out within the unit; however no staff member is compelled to directly participate in the administration of a procedure which results in the termination of a pregnancy if they have a conscientious objection, except in the case of emergency care (when all doctors must provide care/ act in the best interest of a patient).

There is no statutory right to conscientious objection in the case of emergency hormonal contraception as this is not an abortifacient, but concerns should be discussed with the supervising consultant.

Foundation Programme Individual Placement Descriptor*

Where the placement is based	Royal London Hospital
Clinical supervisor(s) for the placement	Mr Andrew Coombes

Main duties of the placement	Focus is particularly on developing history and examination skills (as well as differential diagnosis and management plans) in ophthalmology (delivering patient centred care and maintaining trust). There is the expectation of professional behaviour at all times and behaviours in accordance with ethical and legal requirements. There will be the opportunity to develop and update practice through learning and teaching, as well as to engage in career planning. Communication skills will be required in a variety of settings and team working is important as are leadership skills. Focus will be directed to recognising, assessing and managing patients with long term conditions eg glaucoma & AMD (particularly in the context of understanding of the principles of health promotion and illness prevention). Requesting relevant investigations and acting upon results in addition to prescribing safely is expected. It is also expected that there will be the opportunity to learn to perform procedures safely (likely to include: sub-Tenons local anaesthesia, syringe & probe tear duct, insertion of punctal plugs etc). Patient safety in clinical practice is important particularly in the context of being able to recognise and work within limits of personal. Attendance at audit meetings (and involvement in audit) will ensure contributions to quality improvement.
Typical working pattern in this placement <i>(e.g. ward rounds, clinics, theatre sessions)</i>	Working pattern: Basic hours only

East London Foundation NHS Trust

Community CAMHS, Tower Hamlets East Locality

Psychiatry Foundation Post

Base: Tower Hamlets CAMHS, 16-18 Greatorex Street E1 5NF

Trainer: Dr Justin Wakefield

The Service

The Tower Hamlets Child and Adolescent Mental Health Service is a multi-disciplinary Tier 2/3 mental health, providing comprehensive assessment and treatment to a population of around 80,000 children and young people and their families from a wide variety of cultural and ethnic backgrounds and with a high level of deprivation.

The service includes a wide variety of professional disciplines including child psychotherapy, clinical psychology, family therapy, psychiatric nursing, psychiatry, social work and administrative staff.

Professional relationships

Child Psychiatry in Tower Hamlets consists of 2 CAMHS localities, the Emanuel Miller Centre, serving the Eastern community of Tower Hamlets (E3 and E14) and the Children and Young People's Centre at Greatorex Street, serving the Western community of Tower Hamlets (E1 and E2). The service has 4 FT Consultants, 2 ST4-6s and 2 CT 2-3s. There is a great opportunity for trainees to gain experience in the assessment and treatment of key conditions in child psychiatry: ADHD, autistic spectrum disorders, emotional and affective disorders, early onset psychosis and conduct disorder. The trainee will be encouraged to gain a wider range of experience by also working with the other consultants and other professions of the multidisciplinary team, such as family therapy and child psychotherapy.

There are several established clinical teams with care pathways for several clinical presentations. The core trainee is encouraged to participate in all of the teams, including the Emotional and Behavioural Disorders Team, the CAMHS in Social Care Team (Looked after Children and children subject to a Child Protection Plan), the Psychosis and Bipolar Disorder Team and the Neuro-developmental Disorder/Disability Team. There is good access to and liaison with the Tier4 inpatient service at the Coborn Centre for Adolescent Mental Health in Newham and the Paediatric Liaison Team based at the Royal London Hospital. Good working relationships have been established with schools and Children Social Care.

Induction

At the beginning of the placement you will take part in an induction programme. Induction will introduce you to the organisation if you have not worked at the Trust before. You will also be introduced to the workplace and informed of the requirements of the post, including the nature of your on-call commitment. You also will have an educational induction with your trainer that will help you write your individual learning plan for the placement.

Clinical Supervision

Dr Justin Wakefield will provide regular supervision, with additional supervision in

therapeutic modalities provided by appropriate personnel as needed.

The name of the clinical supervisor and the advice given must be clearly documented in the patient's clinical record.

Educational Supervision

Educational supervision will be provided by your educational tutor.

Duties and opportunities

The duties of the post, performance criteria and the learning opportunities available are set out following the structure of the Psychiatry Specialty Curriculum as approved by the GMC 2013, based on the headings of the GMC's Good Medical Practice.

1. Providing a good standard of practice and care

- **UNDERTAKE CLINICAL ASSESSMENT OF PATIENTS WITH MENTAL HEALTH PROBLEMS**

You will undertake clinical assessments under the supervision of Dr Bruce. Additional opportunities include participation in a fortnightly family therapy clinic, observation of specialist assessments for autism and a wide variety of other modalities, including CBT supervision.

You will ensure that all patients under your care are fully assessed and that paperwork is completed in accordance with the service protocols. You will maintain accurate, legible, contemporaneous and useful clinical records for all patients in whose care you are involved.

All patients should have a Comprehensive Needs and Mental Health Assessment completed on the proforma in the notes and uploaded on RIO. Similarly the proforma for risk assessment should be filled in during the assessment period. For patients on medication, regular mental state examinations should be conducted and any changes in medication and side effects documented in the RIO progress notes and communicated to the referrer and GP. All blood tests and results of investigations as well as physical health monitoring should be clearly documented in the relevant section of the notes.

You will also ensure that all patients are enrolled on CAMHS outcome measuring at case opening, 6-monthly review and case closure.

Training in communication and interview skills as appropriate to the practice of psychiatry is available and will be tailored to the needs of the trainee.

2. Decisions about access to care

- **USE THE RESULTS OF THE CLINICAL ASSESSMENT TO ENSURE EFFECTIVE PATIENT MANAGEMENT**

Under the supervision of a clinical supervisor, you will discuss pharmacological and psychosocial treatments for the patients that you are working with. You will refer them promptly to other professionals as directed by your clinical supervisors.

3. Treatment in emergencies

- **MANAGE EMERGENCIES**

You will have the opportunity to take part in emergency assessments both in the accident

and emergency department and in the community under supervision.

The junior medical staff in CAMHS provide the first on-call service for psychiatry during the day, supported by a Consultant. The first point of contact is a generic, duty CAMHS worker, who will contact you if necessary.

4. Maintaining good medical practice

During the placement you will follow the Psychiatry Specialty Curriculum and maintain an up-to-date learning portfolio that you will bring to meetings with the trainer when asked to do so. As a minimum, this will be at the beginning, mid-term and the end of the placement.

We also welcome the presentation of a child psychiatry-related case at our fortnightly Open Forum and value the input of Trainees towards educating the MDT about topics of interest in psychiatry.

5. Maintaining performance

- **MONITOR AND MAINTAIN PROFESSIONAL PERFORMANCE**

You will participate fully in the foundation assessment programme of the Psychiatry Specialty Training Curriculum and will use the feedback that you receive from this process to inform your critical self-awareness. You will discuss every item of assessment with your trainer.

6. Teaching and training, appraising and assessing

- **PLAN, DELIVER, AND EVALUATE TEACHING AND LEARNING IN A VARIETY OF ENVIRONMENTS**

You will participate in the teaching of medical students (e.g. Medicine in Society programme) attached to the unit. This will include assisting the 'bedside' teaching of junior and senior students by helping identify and consent suitable patients for the students to see and by helping the students develop their clinical skills by giving them opportunities to present and discuss the patients they have seen. You may also have the opportunity to be involved in small group teaching and lecturing to clinical medical students under the supervision of senior colleagues.

- **ASSESS, APPRAISE AND EVALUATE LEARNING AND LEARNERS**

You will evaluate your own learning and progress, using self-assessment forms that you may retain in your learning portfolio. You will participate in the assessment of others, including clinical medical students and colleagues using multi-source feedback tools.

7. Relationships with patients

- **Conduct professional patient relationships**

Whenever possible, you will obtain informed consent from patients for whom you provide treatment. You will observe patient confidentiality at all times. When guided by your clinical supervisors, you should share information appropriately with colleagues. Whenever possible, and especially towards the end of the placement, you will inform your patients of the ending of your relationship with them in a timely manner.

8. Dealing with problems in professional practice

- **CONDUCT OR PERFORMANCE OF COLLEAGUES**

If you become aware of problems with the conduct or performance of a colleague, you must bring this to the attention of a senior colleague.

- **COMPLAINTS AND FORMAL INQUIRIES**

You must always cooperate fully with any complaints procedure or formal inquiry

- **PROVIDING ASSISTANCE AT INQUIRIES AND INQUESTS**

You must always cooperate fully with any formal inquiry or inquest into a patient's death.

- **INDEMNITY INSURANCE**

Early in the placement, you must discuss the provisions of the NHS indemnity insurance with your trainer.

9. Working with colleagues

- **CONTINUOUSLY PROMOTE VALUE BASED NON PREJUDICIAL PRACTICE**

You must maintain a legal, ethical and fair approach toward working with colleagues and respect diversity.

- **WORK EFFECTIVELY AS A MEMBER AND A LEADER OF MULTIDISCIPLINARY TEAM**

- **DEMONSTRATE APPROPRIATE LEADERSHIP**

During this placement you will be a full member of the various Tower Hamlets CAMHS multi-disciplinary teams (MDTs) and will attend their meetings as appropriate at Greator Street. You will discuss your experience of the MDTs in meetings with your trainer.

- **COMMUNICATE EFFECTIVELY WITH OTHER HEALTHCARE PROFESSIONALS**

You will keep clear, accurate and contemporaneous clinical records on RIO. You will send regular written reports on patients to general practitioners and other professionals involved in patient care.

- **APPROPRIATELY ASSUME, DELEGATE AND DEVOLVE RESPONSIBILITY**

- **ACCESS ADVICE, ASSISTANCE AND SECOND OPINION WHEN DELEGATING AND MAKING REFERRALS**

Your trainer and clinical supervisors will give you guidance as to the level of responsibility you should assume in individual clinical situations. If you are unsure, you must always obtain advice and assistance

10. Maintaining probity

- **ENSURE THAT REPORTS, EVIDENCE AND DOCUMENTS YOU HAVE A RESPONSIBILITY FOR ARE COMPLETE, HONEST AND ACCURATE**

Your written reports, including Specialist Assessment Reports, other Mental Health Reports and Out-patient letters will use the standard report format and be sent out within two weeks of the consultation, copied to the family where appropriate. All reports and letters must be signed by the author. Until instructed otherwise, all reports that you write must be checked

by one of your clinical supervisors before being sent out. You will not provide any other written reports about patients, unless this has been sanctioned by one of your clinical supervisors.

- **PROPERLY MANAGE FINANCIAL AND COMMERCIAL DEALINGS**

You must report receiving any gift from patients with your trainer and you must not solicit any fee or payment from a patient or third party unless your trainer has sanctioned this. You will not meet with any representatives of the pharmaceutical industry during work time, unless this is at a postgraduate meeting that has been organised within ABPI Guidelines.

- **AVOID CONFLICTS OF INTEREST AND ADVISE OTHERS ON PREVENTING AND DEALING WITH CONFLICTS OF INTEREST**

Inform your trainer of any real or potential conflict of interest you may have.

11. Health

- **ENSURE THAT YOUR HEALTH AND THE HEALTH OF OTHERS DOES NOT PUT PATIENTS AT RISK**

You must always obtain advice and treatment for mental and physical health problems and must ensure that your health does not put patients at risk. You must comply with the Trust's occupational health policy.

Typical weekly programme

NB, this programme is indicative only, it may vary in the light of the trainee's learning needs and the needs of the clinical service.

1) INTRODUCTION	
1.1 Grade of Post	Foundation Year 1
1.2 Specialty/Sub-Specialty	Psychiatry/Psychiatry of Learning Disability
1.3 Type of Contract/WTE	Foundation School Contract
1.4 Duration of Post	4 months
1.5 Trainer Name	Dr Nicole Eady
1.6 Base/Address	Community Learning Disability Service Beaumont House Mile End Hospital Bancroft Road London E1 4DG
1.7 Service Line	Specialist Services
2) DESCRIPTION OF THE POST and TRAINING OPPORTUNITIES	
2.1 Qualifications and Experience of the Trainer	<p>Qualification: MB BS, MSc, MRCPsych, PGcert Medical Education.</p> <p>Substantive consultant psychiatrist with experience of supervising both core and higher trainees for educational and clinical supervision. For the past year I have also held the post of Training Program Director for Higher Trainees in Intellectual Disability Psychiatry as a job share.</p> <p>Experience in providing medical student clinical placements, and special interest sessions. Experience in examining medical students in both formative and summative OSCE examinations. I have experience in both large group and workshop based teaching for medical and multidisciplinary audiences.</p> <p>I am currently the deputy chair of the Royal College of Psychiatrists Examinations Standard Setting committee and have been a member of this examinations committee since 2013.</p> <p>Educational Portfolio and Appraisal (London Deanery Framework) completed.</p>
2.2 Description of the Clinical Service	<p>The Community Learning Disability Service provides specialist healthcare services for adults with learning disability and also organises social care for them.</p> <p>The Foundation Year Doctor would join the Mental Health Care Program part of the service which provides specialist assessment and treatment for adults with mental health problems in community settings.</p>
2.2 Description of Clinical/Medical Team	<p>The Foundation trainee will join a medical team of 1 Consultant Psychiatrist, 1 ST4-6 trainee in Psychiatry of Learning Disability and 1 ST2/3 Core Psychiatry trainee.</p> <p>The clinical team also includes psychologists, nurses, social workers, occupational therapists, physiotherapists and speech and language therapists</p>
2.3 Training Opportunities	The trainee will be encouraged to undertake programmed

	<p>Supervised Learning Activities (SLEs) and Work Place Based Activities in accordance with the Foundation Curriculum.</p> <p>We see a very wide range of psychiatric disorders, as well as developmental disorders such as autism, so the trainee will gain experience of the assessment and treatment of all such conditions in a multidisciplinary context. There is the opportunity to further develop specialist clinical communication skills. There are also opportunities for liaison work particularly with neurology and paediatrics as part of transition to adult services.</p> <p>The development of safe and effective community practice skills is an essential element of this placement.</p> <p>The work is highly structured, with a well-defined caseload, and clear role definition so that the work is appropriate for a doctor at this level of training.</p> <p>One day every two weeks is allocated to closely supervised psychiatric liaison work at the Royal London Hospital.</p>
2.5 Additional comments	<p>Skills and knowledge gained are readily transferable to other psychiatric specialities, to general practice and also all medical settings where people with mental health problems or with learning disability present with physical problems.</p> <p>The trainee will be offered information and advice about careers in psychiatry.</p>
3) CLINICAL SUPERVISION	
3.1 Clinical Supervision arrangements	Trainee will receive structured close clinical supervision at all times. Trainer or named deputy will be available for advice at all times, and meet for one hour a week supervision session.
3.2 One to One Trainer Educational Supervision Arrangements	Educational Supervision is provided by the North Thames Foundation School.
3.3 Trainer cover arrangements	Trainer cover is provided by a Consultant Psychiatrist for people with learning disability from a neighbouring service (Hackney or Newham) with senior cover from the ST4-6 in the service on site when the trainer is away
3.4 Additional comments	<p>A strong specialist multidisciplinary team experienced at working with junior doctors provides excellent additional support and training for all trainees.</p> <p>Supervised experience in Quality Improvement Projects is also available</p>
4) INDUCTION – describe the arrangements including any out of service leave required	
4.3 Team/Departmental Induction	Trainee will be inducted to the team/department following standard local induction for all trainees. They will shadow other members of the medical team during their first two weeks of placement.
4.4 Additional comments	Out of service leave will be provided for any mandatory training required at induction such as the Acute site induction

5) SPECIFIC CURRICULA PRIORITIES – describe how these are met in the post				
5.1 Community Orientation		<p>This is a very community orientated post. The team base is in the hospital, but all the patients live in community settings, often living with families or carers that support them.</p> <p>Initial assessments and, where appropriate, interventions are often carried out in community settings, and close liaison with GPs and other community services is a crucial part of the work. The team has clear guidelines to do this safely. The Foundation Doctor would always be with another staff member when working in community settings.</p>		
5.2 Long Term Conditions		<p>The Trainee will gain experience of management and care of patients with several long term conditions, both Learning Disability itself and major mental disorders such as schizophrenia, bipolar affective disorder, and autism.</p>		
5.3 Holistic Care		<p>An holistic approach to care is integral to the way the team delivers interventions, and is essential because of the complex nature of the problems presented. ‘Personalisation’ or an individualised, needs led approach is central to the team’s philosophy.</p> <p>The team therefore provides an excellent environment for the trainee to achieve competencies in this area.</p>		
5.4 Inter-professional and integrated Working		<p>Multidisciplinary assessments are the norm, and joint interventions are very common. The trainee would participate in these as part of their placement.</p> <p>The team is integrated with social services, so that social care is provided that supports people’s health needs to be met.</p> <p>Integrated working is also required with other mental health services (e.g. the out of hours home treatment team, the inpatient services), with general practice, and with social care providers e.g. day services.</p>		
6) LOCAL ACADEMIC SUPPORT				
6.1 Local academic programme		<p>Trainee will attend the weekly academic program based on site the Tower Hamlets Centre for Mental Health at Mile End Hospital, and the monthly Psychiatry of Learning Disability academic program based at Barts.</p> <p>They would also attend Foundation Year teaching at the acute site as required</p>		
6.2 Local Knowledge eg Library Resources		<p>Available as for all current trainees. Comprehensive collection of e-resources available via Athens including the ProQuest Psychology Journal Collection and BMJ. Training in searching the health databases and making the most of Athens is also available.</p>		
7) TIMETABLE – pls insert or append				
7.1 Trainee timetable

Job Description

FY2 in Liaison Psychiatry
Clinical Supervisor: Dr Nick Walsh
Locality: Tower Hamlets
Main Base: Royal London Hospital

Address / Contact details: Department of Psychological Medicine, David Hughes Building, Royal London Hospital, Stepney Way, E1 1BB

Introduction & Summary

This job description is for a Foundation Year 2 post in Liaison Psychiatry, working at the Royal London and St Barts Hospitals

The post holder will spend four months in this post, under the Clinical Supervision of Dr Nick Walsh but also providing some clinical support to other Consultants as appropriate.

The post-holder will gain experience in assessment and management of: psychiatric emergencies in the Emergency Department and general medical/surgical wards, medically unexplained symptoms, cardiac, cancer, neuroscience, intensive care, HIV, renal and trauma liaison.

Brief description / profile of Clinical Supervisor

Dr Nick Walsh is Consultant Psychiatrist, with a special interest in HIV liaison and trauma.

The team (including staffing) / service description

The team members come from multiple disciplines with individual expertise. The team consists of: 3 WTE consultant psychiatrists, 2 WTE ST4-6, 1 CT3, 1 FY2 (this post), 1 nurse/CBT therapist, 1 WTE senior clinical psychologist, 1 nurse consultant, 1 team manager, and a team of PLNs providing the core ED liaison service.

Role of the Trainee / Main Duties and Responsibilities

The post-holder will provide a clinical psychiatric service, including emergency, urgent and routine assessments at the Royal London and St Barts Hospitals. All clinical work is supervised by a consultant psychiatrist.

Any other specific characteristics of this job

The Royal London Hospital has the UK's busiest trauma service. The service is acute and sees a large number of patients each year. St Barts Hospital is a specialist cardiac and cancer centre.

Trainee Information System (TIS) Post Code (and local post number if known)	LDN/R1HKH/FND/FY2/007 LDN/R1HKH/FND/FY2/008
Placement details (i.e. the specialty and sub-specialty)	FY2
Department	General Surgery
Type of work to expect and learning opportunities	<p>There are a variety of education and training opportunities during this placement to support you in obtaining the competences as required of the UKFPO (http://www.foundationprogramme.nhs.uk/curriculum/) by the end of the foundation year. In addition to the local departmental teaching, the FY2 doctor is expected to attend the structured FY2 teaching and simulation training days. There will also be opportunities to develop skills as a clinical teacher. The personalised work schedule is to be discussed further with your Educational Supervisor</p> <p>The overall educational objectives of the F2 year are to provide the trainee with the knowledge, skills and attitudes to be able to</p> <ul style="list-style-type: none"> • Take a history and examine a patient • Identify and synthesise problems • Prescribe safely • Keep an accurate and relevant medical record • Manage time and clinical priorities effectively • Communicate effectively with patients, relatives and colleagues • Use evidence, guidelines and audit to benefit patient care • Act in a professional manner at all times • Cope with ethical and legal issues which occur during the management of patients with general medical problems • Educate patients effectively • Become life-long learners and teachers <p>Daily: 0900 – Daily ward round</p> <p>Tues: 13:00 Grand Round</p> <p>Wed: 13:00-15:00 Formal teaching programme</p> <p>Thurs: 07:45-08:30 Departmental Teaching</p>

Where the placement is based	Whipps Cross University Hospital
Clinical supervisor(s) for the placement	To be confirmed
Main duties of the placement	During foundation year 2 (F2), doctors remain under clinical supervision (as do all doctors in training) but take on increasing responsibility for patient care. They will be exposed to more clinical environments e.g. outpatients and emergency departments where there will be new challenges and greater time constraints. In particular, they begin to make more complex management decisions as part of maturing professional responsibility. F2 doctors will further develop their core generic skills and contribute more to the supervision, education and training of the wider healthcare workforce e.g. nurses, medical students and less experienced doctors. At the end of F2, they will have begun to demonstrate clinical effectiveness, leadership and decision-making responsibilities that are essential for general practice, core or specialty training.
Typical working pattern in this placement (e.g. ward rounds, clinics, theatre sessions)	Shift
Local education provider (LEP) / employer information	Barts Health, Whipps Cross Hospital

*It is important to note that this description is a typical example of the placement and may be subject to change.
