Trainee Information System (TIS) Post Code (and local post number if known)	King's College Hospital – General (Internal) Medicine 19/LDN/RJZ01/F1/001 19/LDN/RJZ01/F1/002 19/LDN/RJZ01/F1/003
Placement details (i.e. the specialty and sub-specialty)	General (Internal) Medicine (N/A)
Department	General and acute medicine is part of the Urgent Care, Planned Care and Allied Clinical Services division. We have two medical admissions units (RD Lawrence and Annie Zunz wards) at the hospital that take all acute medical admissions. These are run by a team of acute physicians. The majority of medical admissions (either from primary care or the emergency department) are admitted via the acute assessment unit (AAU) on Twining ward which is open from 10am – 10pm. All patients receive a rapid consultant review during the day, until 9pm. A further post take ward round takes place at 8am to review the overnight admissions. There are daily consultant-led ward rounds for all other patients. Patients who are identified as requiring an admission of longer than 72 hours will be moved to one of the post-acute wards in either general medicine (Lonsdale, Mary Ray, Matthew Whiting and Oliver wards) or to one of the specialist clinical gerontology wards. These wards are run by general physicians with a variety of sub-speciality interests in gerontology, respiratory medicine, rheumatology, stroke medicine and gastroenterology and there is a daily senior review of all patients. There are close working relationships with cardiology, acute stroke care and critical care. All wards are staffed by consultant-led teams comprising higher speciality trainees, core trainees and foundation trainees. Both MAU and post-MAU wards are well supported by multidisciplinary teams, with daily board rounds and regular multidisciplinary meetings.
Type of work to expect and learning opportunities	In a four month attachment, two months will be spent on a post-acute ward and the other two on AMU, when they will participate in the medical take. The overall educational objectives of the F1 year are to provide the trainee with the knowledge, skills and attitudes to be able to: Take a history and examine a patient. Identify and synthesise problems. Recognise acute illness and institute prompt management.

	 Keep an accurate and relevant medical record. Obtain procedural competencies in line with curriculum. Manage time and clinical priorities effectively. Participate in effective handover of patients. Work within the multidisciplinary team and plan safe and effective patient discharge. Communicate effectively with patients, relatives and colleagues. Use evidence, guidelines and audit to benefit patient care.
	Cope with ethical and legal issues which occur during the management of patients with general
	medical problems.
	Educate patients effectively Page 1 if along learners and teachers
	Become lifelong learners and teachers.
Where the placement is based	King's College Hospital NHS Foundation Trust, London,
	Denmark Hill site.
Clinical supervisor(s) for the placement	Each ward has a designated consultant clinical lead and all trainees have a consultant educational and clinical supervisor.
Main duties of the placement	The F1 doctor is responsible with other staff for the ward care of patients and the maintenance of the patients' medical records. They are expected to attend the structured teaching programme provided by the department. The doctor will be responsible for such other specific clinical duties as allocated by consultants, occasional emergencies and unforeseen circumstances.
Typical working pattern in this	Post MAU Ward:
placement (e.g. ward rounds, clinics, theatre sessions)	0900 Board Round 0930 Consultant or SpR ward round 1400 Ward work 1700 Handover Weekly MDT meetings. Protected F1 Teaching, 1300-1400 – Tuesday or Thursday. Wednesday – Grand Round, 1300-1400. Plus monthly ward MDT forums, monthly mortality meetings.
Local education provider (LEP) / employer information	King's College Hospital is a large Teaching Hospital and NHS Foundation Trust situated in South Central London. Department	Planned Care and Allied Clinical Services division. We have two medical admissions units (RD Lawrence and Annie Zunz wards) at the hospital that take all acute
	physicians. The majority of medical admissions (either from primary care or the emergency department) are admitted via the acute assessment unit (AAU) on Twining ward which is open from 10am – 10pm. All patients receive a rapid consultant review during the day, until 9pm. A further post take ward round takes place at 8am to review the overnight admissions. There are daily consultant-led ward rounds for all other patients. Patients who are identified as requiring an admission of longer than 72 hours will be moved to one of the post-acute wards in either general medicine (Lonsdale, Mary Ray, Matthew Whiting and Oliver wards) or to one of the specialist clinical gerontology wards. These wards are run by general physicians with a variety of sub-speciality interests in gerontology, respiratory medicine, rheumatology, stroke medicine and gastroenterology and there is a daily senior review of all patients. There are close working relationships with cardiology, acute stroke care and critical care. All wards are staffed by consultant-led teams comprising higher speciality trainees, core trainees and foundation trainees. Both MAU and post-MAU wards are well supported by multidisciplinary teams, with daily board rounds and regular multidisciplinary meetings.
Type of work to expect and learning opportunities	In a four month attachment, two months will be spent on a post-acute ward and the other two on AMU, when they will participate in the medical take. The overall educational objectives of the F1 year are to provide the trainee with the knowledge, skills and attitudes to be able to: Take a history and examine a patient. Identify and synthesise problems. Recognise acute illness and institute prompt

	 Keep an accurate and relevant medical record. Obtain procedural competencies in line with curriculum. Manage time and clinical priorities effectively. Participate in effective handover of patients. Work within the multidisciplinary team and plan safe and effective patient discharge. Communicate effectively with patients, relatives and colleagues. Use evidence, guidelines and audit to benefit
	 patient care. Cope with ethical and legal issues which occur during the management of patients with general
	medical problems.
	 Educate patients effectively Become lifelong learners and teachers.

Placement details (i.e. the specialty and sub-specialty)	General (Internal) Medicine (N/A)
Department	General and acute medicine is part of the Urgent Care, Planned Care and Allied Clinical Services division. We have two medical admissions units (RD Lawrence and Annie Zunz wards) at the hospital that take all acute medical admissions. These are run by a team of acute physicians. The majority of medical admissions (either from primary care or the emergency department) are admitted via the acute assessment unit (AAU) on Twining ward which is open from 10am – 10pm. All patients receive a rapid consultant review during the day, until 9pm. A further post take ward round takes place at 8am to review the overnight admissions. There are daily consultant-led ward rounds for all other patients. Patients who are identified as requiring an admission of longer than 72 hours will be moved to one of the post-acute wards in either general medicine (Lonsdale, Mary Ray, Matthew Whiting and Oliver wards) or to one of the specialist clinical gerontology wards. These wards are run by general physicians with a variety of sub-speciality interests in gerontology, respiratory medicine, rheumatology, stroke medicine and gastroenterology and there is a daily senior review of all patients. There are close working relationships with cardiology, acute stroke care and critical care. All wards are staffed by consultant-led teams comprising higher speciality trainees, core trainees and foundation trainees. Both MAU and post-MAU wards are well supported by multidisciplinary teams, with daily board rounds and regular multidisciplinary meetings.
Type of work to expect and learning opportunities	In a four month attachment, two months will be spent on a post-acute ward and the other two on AMU, when they will participate in the medical take. The overall educational objectives of the F1 year are to provide the trainee with the knowledge, skills and attitudes to be able to: Take a history and examine a patient. Identify and synthesise problems. Recognise acute illness and institute prompt management.

	 Keep an accurate and relevant medical record. Obtain procedural competencies in line with curriculum. Manage time and clinical priorities effectively. Participate in effective handover of patients. Work within the multidisciplinary team and plan safe and effective patient discharge. Communicate effectively with patients, relatives and colleagues. Use evidence, guidelines and audit to benefit patient care. Cope with ethical and legal issues which occur during the management of patients with general medical problems.
	 Educate patients effectively Become lifelong learners and teachers.
Where the placement is based	King's College Hospital NHS Foundation Trust, London,
	Denmark Hill site.
Clinical supervisor(s) for the placement	Each ward has a designated consultant clinical lead and all trainees have a consultant educational and clinical supervisor.
Main duties of the placement	The F1 doctor is responsible with other staff for the ward care of patients and the maintenance of the patients' medical records. They are expected to attend the structured teaching programme provided by the department. The doctor will be responsible for such other specific clinical duties as allocated by consultants, occasional emergencies and unforeseen circumstances.
Typical working pattern in this placement (e.g. ward rounds, clinics, theatre sessions)	Post MAU Ward: 0900 Board Round 0930 Consultant or SpR ward round 1400 Ward work 1700 Handover Weekly MDT meetings. Protected F1 Teaching, 1300-1400 – Tuesday or Thursday. Wednesday – Grand Round, 1300-1400. Plus monthly ward MDT forums, monthly mortality meetings.
Local education provider (LEP) / employer information	King's College Hospital is a large Teaching Hospital and NHS Foundation Trust situated in South Central London. 	19/LDN/RJZ01/F1/002		
Placement details (i.e. the specialty	Intensive Care Medicine (N/A)		
and sub-specialty)			
Department	King's College Hospital has one of the largest critical care services in the UK with 5 adult intensive care units over two sites and approximately 3500 admissions per year in every speciality of critical care medicine (except Major Burns & Adult Congenital Heart Disease). A new 60 bedded unit is due to open later this year, making King's one of the largest critical care departments in the UK. The hospital not only serves a diverse local population but operates as one of the four Major Trauma Centres (MTC) within the capital, the MTC for Kent and as a tertiary services referral centre for cardiac (including primary PCI), neurosciences (including stroke, neurosurgery and spinal surgery), haematological oncology, cystic fibrosis, and hepatobiliary diseases (including transplantation). As a result, King's has an unrivalled patient population in terms of clinical diversity and complexity. The Critical Care Units (CCUs) at King's (Denmark Hill site) are divided into four distinct areas: Frank Stansil CCU- 14 level II/III beds – predominant focus medical Christine Brown CCU- 18-22 level II/III – predominant focus		
	surgical Jack Steinberg CCU- 18 level II/III – predominantly		
	neurosciences		
	Liver Intensive Therapy (LITU) - 19 level II/III		
	There are 35+ ICU consultants who work across the various		
	units. Most are full time intensivists with background		
	training in either Anaesthesia, medicine or Emergency medicine.		
	All are approved clinical and/or educational supervisors.		
	A new state of the art 60 bedded Critical Care Centre is due to open later in the year, alongside which the existing units will be redeveloped to provide specialist units (eg PACU, rehabilitation). All units are being upgraded with the latest		

STFS is a collaboration between HE Kent, Surrey & Sussex, HE South London, Brighton & Sussex Medical School, King's College London School of Medicine & St George's University of London

Type of work to expect and learning opportunities

software and hardware for electronic patient management (ICCA) which has been developed to meet the specific requirements of the patient population at King's.

All F1 doctors in ICM are supra-numerary and expected to attend FT learning activities provided by the Trust. The ICM F1 post holder spends 4 months based on one of the general units – all units admit a mixed case mix of patients. They are expected to work alongside the other junior doctors, both training and trust positions, within the limits of their competences and capabilities. The doctor will learn how to recognise, assess and manage critically ill patients requiring organ support. They will be supervised in advanced procedures such as central and arterial line insertion. We work in multi-disciplinary and interprofessional teams and the doctor will learn from a variety of formal and informal teaching activities. There are twice daily consultant-led interprofessional ward rounds, twice weekly neuroradiology meetings, weekly mandatory ICM teaching with input from journal club, mortality and morbidity and audit groups, as well as research meetings. The doctor will be expected to lead and participate in an audit activity and may have the opportunity to participate in research activities. It is expected they will present at the weekly meeting on at least one occasion, this will usually be a case presentation or their audit project.

The overall educational objectives of the F1 year are promoted within this innovative attachment and are: To provide the trainee with the knowledge, skills and attitudes to be able to

- Take a history and examine a patient.
- Identify and synthesise problems.
- Prescribe safely.
- Keep an accurate and relevant medical record.
- Write accurate and relevant discharge summaries.
- Manage time and clinical priorities effectively.
- Communicate effectively with patients, relatives and colleagues.
- Use evidence, guidelines and audit to benefit patient care.
- Act in a professional manner at all times.
- Cope with ethical and legal issues which occur during the management of patients with general medical problems.
- Identify issues / challenges with EOLC planning and discsussions
- Educate patients effectively.
- Become lifelong learners and teachers.

Placement details (i.e. the specialty	Intensive Care Medicine (N/A)		
and sub-specialty)	, ,		
` · · · · · · · · · · · · · · · · · · ·	King's College Hospital has one of the largest critical care services in the UK with 5 adult intensive care units over two sites and approximately 3500 admissions per year in every speciality of critical care medicine (except Major Burns & Adult Congenital Heart Disease). A new 60 bedded unit is due to open later this year, making King's one of the largest critical care departments in the UK. The hospital not only serves a diverse local population but operates as one of the four Major Trauma Centres (MTC) within the capital, the MTC for Kent and as a tertiary services referral centre for cardiac (including primary PCI), neurosciences (including stroke, neurosurgery and spinal surgery), haematological oncology, cystic fibrosis, and hepatobiliary diseases (including transplantation). As a result, King's has an unrivalled patient population in terms of clinical diversity and complexity. The Critical Care Units (CCUs) at King's (Denmark Hill site) are divided into four distinct areas: Frank Stansil CCU- 14 level II/III beds – predominant focus medical Christine Brown CCU- 18-22 level II/III – predominant focus surgical Jack Steinberg CCU- 18 level II/III – predominantly neurosciences Liver Intensive Therapy (LITU) - 19 level II/III There are 35+ ICU consultants who work across the various units. Most are full time intensivists with background training in either Anaesthesia, medicine or Emergency medicine. All are approved clinical and/or educational supervisors.		
	A new state of the art 60 bedded Critical Care Centre is due to open later in the year, alongside which the existing units will be redeveloped to provide specialist units (eg PACU, rehabilitation). All units are being upgraded with the latest		

Type of work to expect and learning opportunities

software and hardware for electronic patient management (ICCA) which has been developed to meet the specific requirements of the patient population at King's.

All F1 doctors in ICM are supra-numerary and expected to attend FT learning activities provided by the Trust. The ICM F1 post holder spends 4 months based on one of the general units – all units admit a mixed case mix of patients. They are expected to work alongside the other junior doctors, both training and trust positions, within the limits of their competences and capabilities. The doctor will learn how to recognise, assess and manage critically ill patients requiring organ support. They will be supervised in advanced procedures such as central and arterial line insertion. We work in multi-disciplinary and interprofessional teams and the doctor will learn from a variety of formal and informal teaching activities. There are twice daily consultant-led interprofessional ward rounds, twice weekly neuroradiology meetings, weekly mandatory ICM teaching with input from journal club, mortality and morbidity and audit groups, as well as research meetings. The doctor will be expected to lead and participate in an audit activity and may have the opportunity to participate in research activities. It is expected they will present at the weekly meeting on at least one occasion, this will usually be a case presentation or their audit project.

The overall educational objectives of the F1 year are promoted within this innovative attachment and are: To provide the trainee with the knowledge, skills and attitudes to be able to

- Take a history and examine a patient.
- Identify and synthesise problems.
- Prescribe safely.
- Keep an accurate and relevant medical record.
- Write accurate and relevant discharge summaries.
- Manage time and clinical priorities effectively.
- Communicate effectively with patients, relatives and colleagues.
- Use evidence, guidelines and audit to benefit patient care.
- Act in a professional manner at all times.
- Cope with ethical and legal issues which occur during the management of patients with general medical problems.
- Identify issues / challenges with EOLC planning and discsussions
- Educate patients effectively.
- Become lifelong learners and teachers.

Placement details (i.e. the specialty and sub-specialty)	General Surgery (Breast) - F1
Department	Surgery
Type of work to expect and learning opportunities	Mostly in-patient work with plenty of experience caring both for patients with acute surgical problems (operative and non-operative) and elective post op patients with chronic/known indications for surgery. Occasionally medical issues may be picked up and it may be necessary to organise further investigations. At any stage of the patient journey, there is an excellent exposure to multi-disciplinary team working. This may continue even after a patient is discharged e.g. liaising with the early discharge nurses. One learns how to manage common peri-op complications and gains further broad experience in acute and general surgery when on call. There will be many opportunities to do practical procedures on the ward and in theatre. Learning opportunities include surgery specific Teaching on Fridays, FY1 teaching sessions on Tuesday, monthly mortality and morbidity meetings and bedside teaching during ward rounds especially on post take. There may also be the opportunity to observe/ assist in theatre and outpatient clinic. Further learning opportunities include: On-call commitment includes assessment of acutely ill surgical patient, clerking and management. Breaking bad news. Communication links with patient and relatives. Liaison with other specialities. Discussing images with Radiologist and appropriate investigations.
Where the placement is based	Princess Royal University Hospital; Surgical ward 3, 4 and 5. Plus outlier patients on S6,7&8.

STFS is a collaboration between HE Kent, Surrey & Sussex, HE South London, Brighton & Sussex Medical School, King's College London School of Medicine & St George's University of London

	residents of a densely populated surrounding
	locality, as well as many tertiary services for
	South-East England and beyond.

Trust	Kings College Hospital NHS Foundation Trust
Site	Princess Royal University Hospital
Trainee Information System (TIS) Post Code (and local post number if known)	19/LDN/RJZ30/F1/016 19/LDN/RJZ30/F1/017 19/LDN/RJZ30/F1/018
Placement details (i.e. the specialty and sub-specialty)	General Surgery – F1
Department	Surgery
Type of work to expect and learning opportunities	Mostly in-patient work with plenty of experience caring both for patients with acute surgical problems (operative and non-operative) and elective post op patients with chronic/known indications for surgery. Occasionally medical issues may be picked up and it may be necessary to organise further investigations. At any stage of the patient journey, there is an excellent exposure to multi-disciplinary team working. This may continue even after a patient is discharged e.g. liaising with the early discharge nurses. One learns how to manage common peri-op complications and gains further broad experience in acute and general surgery when on call. There will be many opportunities to do practical procedures on the ward and in theatre. Learning opportunities include surgery specific Teaching on Fridays, FY1 teaching sessions on Tuesday, monthly mortality and morbidity meetings and bedside teaching during ward rounds especially on post take. There may also be the opportunity to observe/ assist in theatre and outpatient clinic. Further learning opportunities include: On-call commitment includes assessment of acutely ill surgical patient, clerking and management. Breaking bad news. Communication links with patient and relatives. Liaison with other specialities. Discussing images with Radiologist and appropriate investigations.
Where the placement is based	Princess Royal University Hospital; Surgical ward 3, 4 and 5. Plus outlier patients on S6,7&8.

STFS is a collaboration between HE Kent, Surrey & Sussex, HE South London, Brighton & Sussex Medical School, King's College London School of Medicine & St George's University of London

Department	General Practice with compromises of a multi-
	disciplinary team and a Practice Manager
Type of work to expect and	The Foundation doctors have broad exposure to all
learning opportunities	patients attending the practice. Patients identified as
	being 'difficult' are filtered so that the F2 Doctors do not
	see them: otherwise they see a range of patients of all
	ages and backgrounds.
	The F2 Doctors do not take part in the sexual health
	clinic, baby or ante-natal clinics as practitioners, but do have some exposure to these clinics during their
	placement. They do not usually undertake home visits
	but may do some at the end of their attachment,
	particularly if they are for patients with whom they have
	had involvement.
	The F2 doctor is supervised by the Clinical Supervisor
	but can also be covered by other doctors in the
	practice. This gives them experience of the different
	approaches that can be taken by different doctors.
	The F2 doctors do not participate in any out of hours'
	care provision.
	As well as participation with work in the practices, the
	F2 doctors also have the opportunity to visit affiliated
	clinics. There are several meetings held on a weekly
	basis including a business meeting, clinical meeting,
	referrals management meeting and sometimes others (e.g. health and safety).
Where the placement is based	Various Practices
Clinical supervisor(s) for the	Various GP Practitioners
placement	Validad di Traditionolo
Main duties of the placement	General practice. This involves seeing patients (adults
	and children) and meeting their needs, dealing with
	referrals, managing result and correspondence, dealing
	with telephone messages and signing prescriptions
	(both the latter only of patients known to the F2 doctor).
	The F2 doctor is encouraged to participate in the
	activities of the clinical and practice teams (meetings
	etc).
Typical working pattern in this	Typical working pattern in this post e.g ward rounds,

Placement details (i.e. the specialty	General (Internal) Medicine
and sub-specialty)	(N/A)
Department	General and acute medicine is part of the Urgent Care, Planned Care and Allied Clinical Services division. We have two medical admissions units (RD Lawrence and Annie Zunz wards) at the hospital that take all acute medical admissions. These are run by a team of acute physicians. The majority of medical admissions (either from primary care or the emergency department) are admitted via the acute assessment unit (AAU) on Twining ward which is open from 10am – 10pm. All patients receive a rapid consultant review during the day, until 9pm. A further post take ward round takes place at 8am to review the overnight admissions. There are daily consultant-led ward rounds for all other patients. Patients who are identified as requiring an admission of longer than 72 hours will be moved to one of the post-acute wards in either general medicine (Lonsdale, Mary Ray, Matthew Whiting and Oliver wards) or to one of the specialist clinical gerontology wards. These wards are run by general physicians with a variety of sub-speciality interests in gerontology, respiratory medicine, rheumatology, stroke medicine and gastroenterology and there is a daily senior review of all patients. There are close working relationships with cardiology, acute stroke care and critical care. All wards are staffed by consultant-led teams comprising higher speciality trainees, core trainees and foundation trainees. Both MAU and post-MAU wards are well supported by multidisciplinary teams, with daily board rounds and regular multidisciplinary meetings.
Type of work to expect and learning opportunities	In a four-month attachment, two months will be spent on a post-acute ward and the other two on AMU, when they will participate in the medical take. The overall educational objectives of the F2 year are to provide the trainee with the knowledge, skills and attitudes to be able to:
	Take a history and examine a patient.
	Identify and synthesise problems.
	Recognise acute illness and institute prompt
	management.
	Prescribe safely.

	• Voor on accurate and relevant readical reserva
	Keep an accurate and relevant medical record.
	Obtain procedural competencies in line with
	curriculum.
	Manage time and clinical priorities effectively.
	Participate in effective handover of patients.
	Work within the multidisciplinary team and plan
	safe and effective patient discharge.
	Communicate effectively with patients, relatives
	and colleagues.
	Use evidence, guidelines and audit to benefit
	patient care.
	Cope with ethical and legal issues which occur
	during the management of patients with general
	medical problems.
	Educate patients effectively
	Become lifelong learners and teachers.

Placement details (i.e. the specialty	Emergency Medicine
and sub-specialty)	(N/A)
Department	The Emergency Department comprises of 25 Consultants. Many of the Consultants have specialist interests, examples of which include; Paediatric, Emergency Medicine, Major Trauma, Intensive Care Medicine and Ultrasound. There is 24/7 Registrar presence on the shop floor and a resident Consultant covering Major Trauma 24/7. There is a general ED Consultant presence until midnight. The department is part of a large urban teaching hospital and is a designated Major Trauma Centre for South London. Approximately 120,000 patients attend the department annually, 22% of which are paediatric.
Type of work to expect and learning opportunities	Every clinical encounter is used to facilitate teaching and learning. All F2 doctors will be based in the Emergency Department. Some of the key skills expected to be gained and consolidated include being able to: • Take an appropriate and timely history from a patient. • Carry out focussed clinical examinations. • Recognise the sick patient. • Combine the above and formulate a differential diagnosis and suitable management plan. • Prescribe appropriately and safely in the Emergency setting. • Act upon the results of any investigations ordered. • Discuss a management plan with senior doctors and to be able to either discharge a patient or refer them onwards for specialist input as necessary. • Communicate effectively with colleagues, patients and relatives. • Keep accurate medical notes. • Develop an awareness of ethical and medico-legal issues. • Develop skills in time management and clinical prioritisation of workloads.
Where the placement is based	Emergency Department
Clinical supervisor(s) for the placement	Mr Tunji Lasoye, Dr Emer Sutherland and Dr Jacqui Butler.
Main duties of the placement	Working as part of a multidisciplinary team, F2 Doctors contribute to the management of patients presenting to the Emergency Department. They will work alongside Junior Clinical Fellows, Registrars, Consultants,

	Emergency Nurse Practitioners and other nursing and ancillary staff in formulating in the initial assessment of a range of patients, the formulation of management plans, differential diagnosis and the subsequent treatment, onward referral or discharge of patients. Some doctors will be capable of discharging patients autonomously by the end of the rotation. Opportunities exist to work in all areas of the department, with designated shifts in 'Majors' and covering the 'Resuscitation room.' In addition, there is a one month block in the Paediatric Emergency Department. There is a formal induction programme at the start of the post which is supplemented by the 'Kwiki' intranet resource and weekly departmental teaching sessions. Each doctor will also be expected to present a case presentation and an audit during their time in the department.
Typical working pattern in this	Rostered shifts.

	Hospital and NHS Foundation Trust situated in
	South Central London. It provides healthcare for
	residents of a densely populated surrounding
	locality, as well as many tertiary services for
	South-East England and beyond.

^{*}It is important to note that this description is a typical example of the placement and may be subject to change.

Trust	King's College Hospital NHS Foundation Trust
Site	King's College Hospital
Trainee Information System (TIS)	20/LDN/RJZ01/F2/014A
Post Code (and local post number if	20/LDN/RJZ01/F2/027A
known)	20/LDN/RJZ01/F2/040A
Placement details (i.e. the specialty	Emergency Medicine
and sub-specialty)	(N/A)
Department	The Emergency Department comprises of 25 Consultants. Many of the Consultants have specialist interests, examples of which include; Paediatric, Emergency Medicine, Major Trauma, Intensive Care Medicine and Ultrasound. There is 24/7 Registrar presence on the shop floor and a resident Consultant covering Major Trauma 24/7. There is a general ED Consultant presence until midnight. The department is part of a large urban teaching hospital and is a designated Major Trauma Centre for South London. Approximately 120,000 patients attend the department annually, 22% of which are paediatric. There is a 14 bedded adult short stay ward known as Clinical Decision Unit (CDU) and a separate Paediatric CDU.
Type of work to expect and learning opportunities	Every clinical encounter is used to facilitate teaching and learning. All F2 doctors will be based in the Emergency Department. Some of the key skills expected to be gained and consolidated include being able to: Take an appropriate and timely history from a patient. Carry out focussed clinical examinations. Recognise the sick patient. Combine the above and formulate a differential diagnosis and suitable management plan. Prescribe appropriately and safely in the Emergency setting. Act upon the results of any investigations ordered. Discuss a management plan with senior doctors and to be able to either discharge a patient or refer them onwards for specialist input as necessary. Communicate effectively with colleagues, patients and relatives. Keep accurate medical notes. Develop an awareness of ethical and medicolegal issues.

	Develop skills in time management and clinical
	prioritisation of workloads.
Where the placement is based	Emergency Department
Clinical supervisor(s) for the	Mr Tunji Lasoye, Dr Emer Sutherland and Dr Jacqui
placement	Butler.
Main duties of the placement	Working as part of a multidisciplinary team, F2 Doctors contribute to the management of patients presenting to the Emergency Department. They will work alongside Junior Clinical Fellows, Registrars, Consultants, Emergency Nurse Practitioners and other nursing and ancillary staff in formulating in the initial assessment of a range of patients, the formulation of management plans, differential diagnosis and the subsequent treatment, onward referral or discharge of patients. Some doctors will be capable of discharging patients autonomously by the end of the rotation. Opportunities exist to work in all areas of the department, with designated shifts in 'Majors.' 'Minors' and covering the 'Resuscitation room.' In addition, there is a one-month block in the Paediatric Emergency Department. There is a formal induction programme at the start of the post which is supplemented by the 'Kwiki' intranet resource and weekly departmental teaching sessions. Each doctor will also be expected to present a case presentation and an audit during their time in the department.
Typical working pattern in this	Rostered shifts.

Trainee Information System (TIS) Post Code (and local post number if known)	King's College Hospital – General (Internal) Medicine 23/LDN/RJZ01/F1/008 23/LDN/RJZ01/F1/009 23/LDN/RJZ01/F1/030A
Placement details (i.e. the specialty	General (Internal) Medicine
and sub-specialty) Department	(N/A) General and acute medicine is part of the Urgent Care, Planned Care and Allied Clinical Services division. We have two medical admissions units (RD Lawrence and
	Annie Zunz wards) at the hospital that take all acute medical admissions. These are run by a team of acute physicians. The majority of medical admissions (either from primary care or the emergency department) are admitted via the acute assessment unit (AAU) on Twining ward which is open from 10am – 10pm. All patients receive a rapid consultant review during the day, until 9pm. A further post take ward round takes place at 8am to review the overnight admissions. There are daily consultant-led ward rounds for all other patients. Patients who are identified as requiring an admission of longer than 72 hours will be moved to one of the post-acute wards in either general medicine (Lonsdale, Mary Ray, Matthew Whiting and Oliver wards) or to one of the specialist clinical gerontology wards. These wards are run by general physicians with a variety of sub-speciality interests in gerontology, respiratory medicine, rheumatology, stroke medicine and gastroenterology and there is a daily senior review of all patients. There are close working relationships with cardiology, acute stroke care and critical care. All wards are staffed by consultant-led teams comprising higher speciality trainees, core trainees and foundation trainees. Both MAU and post-MAU wards are well supported by multidisciplinary teams, with daily board
Type of work to expect and learning opportunities	rounds and regular multidisciplinary meetings. In a four month attachment, two months will be spent on a post-acute ward and the other two on AMU, when they will participate in the medical take. The overall educational objectives of the F1 year are to provide the trainee with the knowledge, skills and attitudes to be able to:
	 Take a history and examine a patient. Identify and synthesise problems. Recognise acute illness and institute prompt management. Prescribe safely. Keep an accurate and relevant medical record.

	 Obtain procedural competencies in line with curriculum. Manage time and clinical priorities effectively. Participate in effective handover of patients. Work within the multidisciplinary team and plan safe and effective patient discharge. Communicate effectively with patients, relatives and colleagues. Use evidence, guidelines and audit to benefit patient care. Cope with ethical and legal issues which occur during the management of patients with general medical problems. Educate patients effectively Become lifelong learners and teachers.
Where the placement is based	King's College Hospital NHS Foundation Trust, London, Denmark Hill site.
Clinical supervisor(s) for the placement	Each ward has a designated consultant clinical lead and all trainees have a consultant educational and clinical supervisor.
Main duties of the placement	The F1 doctor is responsible with other staff for the ward care of patients and the maintenance of the patients' medical records. They are expected to attend the structured teaching programme provided by the department. The doctor will be responsible for such other specific clinical duties as allocated by consultants, occasional emergencies and unforeseen circumstances.
Typical working pattern in this placement (e.g. ward rounds, clinics, theatre sessions)	Post MAU Ward: 0900 Board Round 0930 Consultant or SpR ward round 1400 Ward work 1700 Handover Weekly MDT meetings. Protected F1 Teaching, 1300-1400 – Tuesday or Thursday. Wednesday – Grand Round, 1300-1400. Plus monthly ward MDT forums, monthly mortality meetings.
Local education provider (LEP) / employer information	King's College Hospital is a large Teaching Hospital and NHS Foundation Trust situated in South Central London. It provides healthcare for residents of a densely populated surrounding locality, as well as many tertiary services for South-East England and beyond.

^{*}It is important to note that this description is a typical example of the placement and may be subject to change.

Placement details (i.e. the specialty	Public Health Medicine
and sub-specialty)	(N/A)
Department	Public Health
Type of work to expect and learning opportunities	The Foundation Year 2 Doctor will join a consultant-led multidisciplinary team of approximately 35 specialists including specialty trainees and consultant. The doctor will support and provide public health and
	policy advice to the Division of Public Health in the London Borough of Southwark.
	Identify and respond to inequalities arising through the wider determinants of health and inequitable access to health, care and other services.
	 Develop and employ Public Health Medicine skills (including application of epidemiology and health intelligence approaches) to population health challenges.
	 Demonstrate skills in medical management and leadership, recognising the importance of advocacy, influencing, stakeholder management and organisational politics.
	 Design and implement reviews of evidence and apply these insights into local policy development and action.
	 Understand the organisational structure/context of the NHS and its relationship to other statutory and voluntary sector organisations as well as local and national government.
	Typical projects and activities include:
	 Draft scientific and policy briefings for senior decision-makers (including politicians). Contribute to Health Needs Assessment and other health intelligence products that utilise routinely collected data (such as Hospital Episode Statistics) to develop insights into health behaviours, health care processes and / or health outcomes. Provide operational management and support to existing programmes of work ranging from

	mental health improvement programmes
	through to operational health protection.
	 Support the development and implementation
	of strategy: such work includes evaluation and
	Public and Patient Engagement (PPE).
	3 3 ()
	Shadow senior members of the team in board-level
	work with NHS and other statutory partners.
Where the placement is based	160 Tooley Street, London SE1 2QH

Placement details (i.e. the specialty	Haematology
and sub-specialty)	(Clinical Attachment)
Department	Department of Haematology
Type of work to expect and	 Managing acute leukaemia/lymphoma patients
learning opportunities	receiving chemotherapy, bone marrow
	transplantation, and complications of disease and
	treatment e.g. neutropaenic sepsis, graft versus
	host disease.
	Experience managing of patients sickle cell anaemia
	patients.
	Management of patients on anticoagulants and clotting disorders.
	Opportunity to learn specialised procedures
	including bone marrow biopsy, removal of Hickman
	lines, lumbar puncture.
	5. Key learning opportunities in addition to clinical
	experience include:
	 Weekly teaching for SHOs/registrars.
	- Weekly journal club.
	- Weekly case of the week presentations.
	- Weekly departmental seminars delivered by
	invited international speakers.
	- Weekly radiology meeting.
	- Weekly MDT meeting.
	 Monthly morbidity and mortality meeting.
	 Audit/research opportunities with possible
	presentations at international meetings.
	 Local haematology forums/meetings.
Where the placement is based	Department of Haematology King's College Hospital
Clinical supervisor(s) for the	Professor R. Arya (Thrombosis and clotting)
placement	Professor D Rees(Sickle Cell)
	Haemato-oncology and BMT – various supervisors
Main duties of the placement	1. Daily wardround initially supervised by registrars but
	eventually working towards independent
	assessment of patients in wardround.

	 Ensure clinical tasks for patients are completed e.g. radiological imaging, interventional procedures, correcting electrolytes, and appropriate blood product support. Order specialised investigations and how to interpret the test results. Liaise with other specialities when appropriate. Being able to recognise and manage haematological emergencies e.g. neutropenic sepsis, mucositis, nausea/vomiting, tumour lysis syndrome, acute sickle crisis. Opportunities to be the on-call SHO although this is dependent on level of personal experience and competence. Carry out an audit/research project.
Typical working pattern in this	The placement is supernumerary thus daily hours are
placement (e.g. ward rounds, clinics, theatre sessions)	from 9am-5pm.
,	Weekly schedule for placement:
	Monday – Consultant wardround. Tuesday – SpR/SHO wardround. Microbiology wardround in the afternoon. General haematology outpatient in the morning. Wednesday – SpR/SHO wardround. Thursday: Radiology meeting. MDT meeting. Afternoon consultant wardround. Afternoon sickle cell outpatient. Friday: SpR/SHO wardround. Handover to weekend team.
	There is flexibility for additional study leave to attend conferences or time spent in haematology laboratories.

Placement details (i.e. the specialty	Cardiology
and sub-specialty)	
Department	Department of General Medicine at the Princess Royal is organised such that all consultants undertake General Internal Medicine and an arrangement of subspecialities. Departments are organised in such a way that each consultant has a ward based team, with each ward having a sub-specialty "flavour". Patients are triaged from the EAU to the wards according to specialty need.
	Discharges from Acute Medicine are supported by post acute care and intermediate care resources. There is a good working relationship with social services and each ward has a ward based social care officer.
	The Department holds a weekly Grand Round and a weekly Governance Meeting. In Cardiology there is a teaching meeting held Thursday lunchtimes. The department of geriatric medicine holds a Journal Club. There is a range of specialist radiology meetings and cancer meetings to which F2's are welcome.
Type of work to expect and learning opportunities	The F2's join a rota with all SHO level doctors to take part in the general take. During the general take they work with a Physician of the day (POD), a specialist registrar, SHOs and an F1 to ensure the admission assessment, senior review and management planning of all patients referred to the department either from General Practice or Emergency Medicine. Foundation Doctors are expected to assess, formulate a diagnosis and present to the POD for immediate feedback and evaluation. When not part of the on call team Foundation Teams are expected to work on their ward and take ownership for any patients transferred to the ward from EAU. They are responsible for the day to day care presenting patients on ward rounds to consultants, ensuring proper communication with general practice and relatives. They also monitor the work of the F1 including supporting their development, ensuring the accuracy of their assessments and their completion of summaries of care for primary care.

	Further learning opportunities include –
	 FY2 weekly teaching – Wednesday morning. Access to study leave for relevant courses and learning as per Foundation School requirements.
Where the placement is based	Princess Royal University Hospital – Medical Wards are as follows - M4, M2, Chartwell, M3, M6, M1, CCU/M8, S2, S1, Farnborough Ward, S7, Stroke, M7/M8/EAU, M9.
Clinical supervisor(s) for the placement	All F2's are allocated a Clinical and Educational Supervisor. This is always a Consultant who has undergone the required training on supervision.
Main duties of the placement	To monitor the day to day care of patients, supervisor the F1, ensure preparation for Ward Rounds and all instructions from Consultants are completed participate in the general take.
	The F2 undertakes ward rounds with the consultants, ensures availability of all results, presents cases, ensures accurate completion of summary of care. They are responsible for updating relatives on progress of patients and supervision of F1.
	The doctor will be responsible for such other specific clinical duties as allocated by consultants including performing other duties in occasional emergencies and unforeseen circumstances.
Typical working pattern in this	Timings of ward rounds vary from ward to ward.
placement (e.g. ward rounds, clinics, theatre sessions)	FY2 Teaching – weekly – Wednesday morning. Grand Round – Every Friday.
Local education provider (LEP) / employer information	King's College Hospital is a large Teaching Hospital and NHS Foundation Trust situated in South Central London. It provides healthcare for residents of a densely populated surrounding locality, as well as many tertiary services for South-East England and beyond.

Placement details (i.e. the specialty	Emergency Medicine – FY2
and sub-specialty)	Emergency Department (ED)
Department	There are 12 wte EM Consultants covering 0800 –
	2400hrs 7 days a week.
	There are also 12 registrar grade doctors working
	various shift patterns, including night shifts.
	In conjunction with the Urgent Care Centre, the Emergency Department at the Princess Royal University Hospital sees 105,000 patients per year. Special ED interests include initiation of NIV in the ED, Severe Sepsis Care, Hyper-Acute Stroke Management and ED ultrasound. The department has 4 fully equipped resuscitation bays, 25 Majors cubicles, 3 Sub-acute cubicles and 7 Paediatric cubicles
	The Emergency Department also has a dedicated 9 bedded CDU (observation ward) for head injury management, toxicology, epilepsy, and other short period observational cases.
Type of work to expect and learning opportunities	Core work is assessing all types of undifferentiated emergency patients presenting to the ED with access to senior advice, supervision and teaching 24/7. The range of problems managed covers the breadth of emergency medicine with a large proportion of the workload being acute medical, general surgical and paediatric emergencies. As well as direct experiential learning from the above,
	 further learning opportunities include – 2 days of dedicated ED induction teaching at commencement of placement 2.5hrs weekly teaching incorporating x-ray sessions, case presentations and topic discussions from consultants. Electronic emergency medicine specific resources. Access to study leave for relevant courses and learning as per Foundation School requirements.

Where the placement is based	Princess Royal University Hospital Emergency Department.
Clinical supervisor(s) for the placement	All F2's are allocated a Clinical and/or Educational Supervisor. This is always an ED Consultant who has undergone the required training on supervision.
Main duties of the placement	The primary duties of the post are to see new patients within the Emergency Department, with ready access to supervision from more senior staff. Secondary expectations include attending regular teaching programme, undertaking a clinical audit project and participating in teaching medical students attached to the department
Typical working pattern in this placement (e.g. ward rounds, clinics, theatre sessions)	Full Time, up to 48 hours per week on a full shift, EWTD compliant rota. F2 work is across all areas of ED and CDU.
Local education provider (LEP) / employer information	King's College Hospital is a large Teaching Hospital and NHS Foundation Trust situated in South Central London. and sub-specialty)	Emergency Department (ED)
Department	There are 12 wte EM Consultants covering 0800 –
	2400hrs 7 days a week.
	There are also 12 registrar grade doctors working
	various shift patterns, including night shifts.
	In conjunction with the Urgent Care Centre, the Emergency Department at the Princess Royal University Hospital sees 105,000 patients per year. Special ED interests include initiation of NIV in the ED, Severe Sepsis Care, Hyper-Acute Stroke Management and ED ultrasound. The department has 4 fully equipped resuscitation bays, 25 Majors cubicles, 3 Sub-acute cubicles and 7 Paediatric cubicles
	The Emergency Department also has a dedicated 9 bedded CDU (observation ward) for head injury management, toxicology, epilepsy, and other short period observational cases.
Type of work to expect and learning opportunities	Core work is assessing all types of undifferentiated emergency patients presenting to the ED with access to senior advice, supervision and teaching 24/7. The range of problems managed covers the breadth of emergency medicine with a large proportion of the workload being acute medical, general surgical and paediatric emergencies. As well as direct experiential learning from the above,
	 further learning opportunities include – 2 days of dedicated ED induction teaching at commencement of placement 2.5hrs weekly teaching incorporating x-ray sessions, case presentations and topic discussions from consultants. Electronic emergency medicine specific resources. Access to study leave for relevant courses and learning as per Foundation School requirements.

Where the placement is based	Princess Royal University Hospital Emergency Department.
Clinical supervisor(s) for the placement	All F2's are allocated a Clinical and/or Educational Supervisor. This is always an ED Consultant who has undergone the required training on supervision.
Main duties of the placement	The primary duties of the post are to see new patients within the Emergency Department, with ready access to supervision from more senior staff. Secondary expectations include attending regular teaching programme, undertaking a clinical audit project and participating in teaching medical students attached to the department
Typical working pattern in this placement (e.g. ward rounds, clinics,	Full Time, up to 48 hours per week on a full shift, EWTD compliant rota.
theatre sessions)	F2 work is across all areas of ED and CDU.
Local education provider (LEP) / employer information	King's College Hospital is a large Teaching Hospital and NHS Foundation Trust situated in South Central London. It provides healthcare for residents of a densely populated surrounding locality, as well as many tertiary services for South-East England and beyond.

Placement details (i.e. the specialty and sub-specialty)	14/LDN/RYQ30/F2/018 14/LDN/RYQ30/F2/020 14/LDN/RYQ30/F2/021
Department	General (Internal) Medicine – Gastro F2
Type of work to expect and learning opportunities	Department of General Medicine at the Princess Royal is organised such that all consultants undertake General Internal Medicine and an arrangement of subspecialities. Departments are organised in such a way that each consultant has a ward based team, with each ward having a sub-specialty "flavour". Patients are triaged from the EAU to the wards according to specialty need. Discharges from Acute Medicine is supported by a post acute care and intermediate care resources. There is a good working relationship with social services and each ward has a ward based social care officer. • The Department holds a weekly Grand Round and a monthly Governance Meeting. • The department of geriatric medicine holds a Journal Club. There is a range of specialist radiology meetings and cancer meetings to which F2's are welcome. • Access to study leave for relevant courses and
	learning as per Foundation School requirements. Weekly 'Gastroenterology learning forum' • Quarterly 'Gastroenterology education forum' • Weekly 'Gastroenterology learning forum' • Monthly Risk and Governance meeting • FY2 Topic Teaching – Wednesday 11:45-12:30
Where the placement is based	The F2's join a rota with all SHO level doctors to take part in the general take. During the general take they work with a Physician of the day (POD), a specialist registrar, SHOs and an F1 to ensure the admission assessment, senior review and management planning

	of all patients referred to the department either from General Practice or Emergency Medicine. Foundation Doctors are expected to assess, formulate a diagnosis and present to the POD for immediate feedback and evaluations. When not concentrating with the on call team Foundation Teams are expected to work on their ward and take ownership for any patients transferred to the ward from EAU. They are responsible for the day to day care presenting patients on ward rounds to consultants, ensuring proper communication with general practice and relatives. They also monitor the work of the F1 including supporting their development, ensuring the accuracy of their assessments and there completion of summaries of care for primary care.
Clinical supervisor(s) for the placement	Princess Royal University Hospital – Medical Wards are as follows - M4, M2, Chartwell, M3, M6, M1, CCU/M8, S2, S1, Farnborough Ward, S7, Stroke, M7/M8/EAU, M9. All F2's are allocated a Clinical and Educational Supervisor. This is always a Consultant who has undergone the required training on supervision.
Main duties of the placement	
Typical working pattern in this placement (e.g. ward rounds, clinics, theatre sessions)	To monitor the day to day care of patients, supervisor the F1, ensure preparation for Ward Rounds and all instructions from Consultants are completed participate in the general take.
	The F2 undertakes ward rounds with the consultants, ensures availability of all results, presents cases, ensures accurate completions of summary of care. They are responsible for updating relatives on progress of patients and supervision of F1s.
	The doctor will be responsible for such other specific clinical duties as allocated by consultants including performing other duties in occasional emergencies and unforeseen circumstances.

specialty and sub-specialty)			
Department	Emerton Close		
Type of work to expect	The trainee's main work will be in the community. It is an		
and learning opportunities	opportunity to see how patients with a high level of need are		
	offered an alternative to admission.		
	There will have the opportunity to work as a member of a Multi-disciplinary team (Psychologists, Occupational Therapists, Psychiatric nurses and Pharmacists) and manage patients with complex psychiatric presentations. This will enable the trainee to gain a better insight into the management of chronic conditions. The trainee will acquire a number of transferrable skills such as learning about multi-agency working/collaboration and the role of carers/ family in the management of patients with chronic conditions.		
Where the placement is based	The employer Oxleas NHS Foundation Trust was formed in April 1995 and is a provider of Community and Hospital Mental Health and Learning Disability Services for Greenwich, Bexley and Bromley. It is a specialist provider of Forensic and Challenging Behaviour services for Bexley, Greenwich, Lewisham, North Southwark, Bromley and Kent Prisons. Since 2010, Oxleas also provides a range of physical health services to adults and children in the community in the boroughs of Bexley and Greenwich. These range from health visitors and community midwives working with the very young, to district nurses and therapists meeting the physical health needs of older people. The Trust has a national reputation for innovation and excellence. It became one of the country's first mental health foundation trusts in May 2006. Since then it has maintained consistently high ratings for quality and financial management from Monitor and CQC. It has won many awards for the quality of its management and clinical services, including the prestigious HSJ Best Mental health trust in 2011 and the Royal College of Psychiatrists' 2009 "Provider of the Year" award. Oxleas has been at the forefront of IT developments, New Ways of Working for Psychiatrists, NICE Guidelines implementation and POMH-UK audits. It was the first Mental Health Trust in London to fully implement RiO (electronic patient records) as part of The London Programme for IT.		

- Complex Adult Mental Health and Learning Disability Services
- Adult Acute Mental Health Services
- Older People's Mental Health Services
- Forensic and Prison Services
- Adult Community Health Services
- Children and Young People's Services

The Older People Mental Health Directorate

The Older People Mental Health Directorate forms part of the broader Trust and provides planned and integrated whole system service and care that is delivered in conjunction with in-patient, crisis and specialist community services. The Directorate serves the older adult population of the London Boroughs of Bromley, Bexley and Greenwich.

The Directorate, which is divided into Acute/Inpatient and Community sectors, is led by the Service Director. There is a Clinical Director for the Directorate and there are two Service Managers for each sector of the directorate. Within each sector, there are different teams that are managed by individual team managers.

The Service/team

The Older People's Mental Health Service has just undergone a reconfiguration of their community services. Bridgeways Day Hospital is based in the centre of the borough and provides an intensive day therapy services to the older adult age group. It is an alternative to hospital based treatment and promotes healthy aging. It uses the Recovery model as its template.

It has key relationships with other directorates in the Trust, Bromley Social Services department and 3rd sector and local voluntary agencies.

Clinical supervisor(s) for the placement

Clinical Supervision

The clinical supervisor Dr Karen Yeung has the main responsibility for monitoring, supporting and assessing day to day the clinical and professional work of the trainee; there will be a minimum of 1 hour/week supervision with the named clinical supervisor. As a trainee who is new to psychiatry, it is mandatory for the post-holder to discuss all patient management decisions, prior to their being enacted. The name of the clinical supervisor and the advice given must be clearly documented in the patient's clinical record.

Educational Supervision

An educational supervisor will be allocated to you via the Foundation School. You will be encouraged and supported to attend regular meetings with him/her. There is also a Foundation Trainee Tutor in Oxleas and you will have the opportunity to meet with him at the beginning and end of the placement to review learning objectives and reflect on the placement. During the placement the Foundation Tutor can be contacted at any time to ask questions, reflect on learning objectives and to provide pastoral support.

Main duties of the placement

The trainee's main responsibilities will be to interview and assess patients admitted to the day therapy service. This includes a full

	psychiatric history, mental state examination and physical examination in preparation for MDT meetings. There will also be the opportunity of co- facilitating a group within the service. The trainee will undertake reviews of patients' mental state on a weekly basis. The trainee will also carry out community visits with other members of the MDT for patients who need out-reach services. The trainee will attend an in-patient ward round once a week and have a small number of patients which they will be expected to discuss in the ward round. The trainee will assess a patient with memory problems once a week as part of the memory service.
Typical working pattern in this placement (e.g. ward rounds, clinics, theatre sessions)	Trainee's timetable NB. During the week on standard days there is no visits of patients in hospital. It is all community.
	Typical weekly timetable: Mon AM & PM = home visits, MDT 12:30-2:30pm
	Tues AM & PM = home visit, group reflection 1-2pm, supervision 2-3pm.
	Weds AM = F2 teaching 11:30-12:30, PM = home visits/audit/QIP
	Thurs AM & PM = home visits, MDT 12:30-2:30pm
	Friday AM & PM = memory clinic all day (this is done with Bromley Memory Service in Bromley at Bridgeways day hospital), with psych teaching 1-3pm alternate weeks
	- F2s now do oncalls at Oxleas House, QEH, Woolwich. -F2s are second on call on Wednesday PMs to cover Oxleas house (QEH) or Green House parks (PRUH).
Local education provider (LEP) / employer information	King's College Hospital is a large Teaching Hospital and NHS Foundation Trust situated in South Central London. It provides healthcare for residents of a densely populated surrounding locality, as well as many tertiary services for South-East England and beyond.

^{*}It is important to note that this description is a typical example of the placement and may be subject to change.

specialty and sub-specialty)	Bromley Acute Inpatient Unit – Older Adults			
	Base: Scadbury Ward, Green Parks House			
Donartmont	Oxleas NHS Foundation Trust			
Department	Oxleas NHS Foundation Trust Oxleas NHS Trust was formed in 1995 by the amalgamation of Greenwich Healthcare Trust psychiatric services and Bexley Community Health. In April 1997, Bromley's mental health services joined Oxleas. Oxleas NHS Foundation Trust is now the provider of general mental health and learning disability services for Bromley, Bexley and Greenwich, and a specialist provider of Forensic and Challenging Behaviour services for Bexley, Greenwich, Lewisham, North Southwark and Bromley. The Trust is therefore a specialist mental health and learning disability trust. The Trust provides a service to a total population of around 735,000 excluding Lewisham and North Southwark. The Trust was rated a 3 star organisation for 3 consecutive years and became one of the country's first mental health foundation trusts in May 2006. Oxleas has been at the forefront of IT developments, New Ways of Working for the Psychiatrists and NICE Guidelines implementation. It is the first Mental Health Trust in London to fully implement RiO as part of London Programme for IT. Oxleas received national recognition as 'RCPsych Mental Health Service Provider of the Year 2009' awarded by The Royal College of Psychiatrists			
	and the CQC rated its services as a five in 2009.			
Type of work to expect and learning opportunities	Trusts four must do priorities These are based directly on the feedback from service users and carers: Support families and carers Provide information for service users and carers Improve care planning Improve relationships with service users and carers Five critical priorities for the year Promote clinical quality Promote social inclusion To increase service users' opportunities for employment (paid and unpaid), training, education and community participation Increase access to psychological therapies Establish common care pathways across the trust To put in place a more standardised service and link together clinical quality, service outcomes and finance			

Community provider services

Work with local commissioners regarding future provision of community health services such as district nursing, health visiting and therapies

Oxleas NHS Trust is divided into six directorates as follows: Complex Adult Mental Health & Learning Disabilities Services Directorate

Adult Acute Mental Health Services Directorate Forensic and Prison Services Directorate Older People's Mental Health Services Directorate Adult Community Heath Services Children & Young People's Services Directorate Bromley Borough Services

Following the implementation of the Change Programme in April 2010 Bromley Mental Health Services are provided within 3 sub-directorates of Complex Adult Mental Health and Learning Disabilities Service, Short-term & Acute Inpatient Services and Older Adult Services. The Complex Needs Service comprises of the low secure unit, ACT & Rehabilitation services.

Professional relationships

Each team is led by a Consultant who is also the Educational Supervisor for the trainee psychiatrist. Each team also have their own clinical lead.

The training opportunities available through different multidisciplinary teams in Bromley are in the areas of Liaison & Intake Team (LIT), Short-term Intervention Team (SIT), Recovery East and West Teams, Assertive Community Team (ACT) and rehab service in the community. The inpatient service comprises of acute inpatient units for working age adults, functional and organic disorders for older adults, low secure unit and a rehab ward.

Induction

At the beginning of the placement you will take part in an induction programme. Induction will introduce you to the organisation if you have not worked at the Trust before. You will also be introduced to the workplace and informed of the requirements of the post, including the nature of your 'out of hours' commitment. You also will have an educational induction with your trainer that will help you write your individual learning plan for the placement.

Where the placement is based

Scadbury Ward, Green Parks House

Clinical supervisor(s) for the placement

Clinical Supervision is provided by Dr Surya Goudaman who is a Consultant in Old Age Psychiatry and who is present on the ward most days of the week (see timetable) and who has an SpR attending the ward rounds twice weekly and who deputises in her absence. Clinical supervision can be provided by other Bromley consultants as may be appropriate on occasions. From time to time it may be appropriate for the post holder to receive clinical supervision from non-medical members, for example, in providing psychotherapy. The clinical supervisor has the main responsibility for monitoring, supporting and assessing day to day the clinical

and professional work of the trainee; there will be a minimum of 1 hour/week supervision with the named clinical supervisor. As a trainee who is new to psychiatry, it is mandatory for the post-holder to discuss all patient management decisions, prior to their being enacted. The name of the clinical supervisor and the advice given must be clearly documented in the patient's clinical record.

During out of hours duties, clinical supervision will be available via the on-call higher trainee/SpR and the on-call consultant. Educational Supervision

An educational supervisor will be allocated to you via the Foundation School. You will be encouraged and supported to attend regular meetings with him/her. There is also a Foundation Trainee Tutor in Oxleas and you will have the opportunity to meet with him at the beginning and end of the placement to review learning objectives and reflect on the placement. During the placement the Foundation Tutor can be contacted at any time to ask questions, reflect on learning objectives and to provide pastoral support.

Main duties of the placement

The duties of the post, performance criteria and the learning opportunities available are set out following the structure of the Psychiatry Specialty Curriculum (as approved by PMETB, 2006), which in turn, is based on the headings of the GMC's Good Medical Practice.

Providing a good standard of practice and care

Undertake clinical assessment of patients with mental health problems

The F2 post is allocated to full-time in-patient duties serving Scadbury Ward at Green Parks House. A GPVTS doctor is also allocated to these same duties for 8 sessions a week and therefore these 2 trainees are expected to act as a pair to ensure safe cover especially during periods of leave or on-call. Scadbury ward is a 23 bed ward for older adults over the age of 65 years who have a functional mental illness (ie. depressions, psychotic illness or severe anxiety states).

Occasionally we are required to assess older adults with memory problems and substance abuse problems.

The ward doctors are expected to maintain accurate patient records and produce discharge summaries of all patients in a timely manner.

The F2 is released for their Wednesday teaching session and Tuesdays and Fridays are for ward work with encouragement to attend the Grand Medical Round in the Postgraduate Centre every Friday from 1 to 2pm.

Training in communication and interview skills as appropriate to the practice of psychiatry is available and will be tailored to the needs of the post holder.

You will maintain accurate, legible, contemporaneous and useful clinical records for all patients in whose care you are involved.

2. Decisions about access to care

Use the results of the clinical assessment to ensure effective patient management

Under the supervision of a clinical supervisor, you will prescribe pharmacological and psychosocial treatments for the patients that you are working with. You will refer them promptly to other professionals as directed by your clinical supervisors.

3. Treatment in emergencies

Manage emergencies

You will see patients who require urgent psychiatric assessment when you are on call.

There is a daily on call duty doctor that deals with emergencies between 9am-9pm. You are not expected to carry a bleep or do out of hours on-calls.

4. Maintaining good medical practice

Maintain and use systems to update knowledge and its application to any aspect of your professional practice

During the placement you will follow the Foundation Training Programme and maintain an up-to-date learning portfolio that you will bring to meetings with the trainer when asked to do so. As a minimum, this will be at the beginning, mid-term and the end of the placement.

Opportunities are provided to attend basic psychiatry training for new starters in the first few weeks of appointment.

5. Maintaining performance

Monitor and maintain professional performance

You will participate fully in the workplace-based assessment programme of the Foundation Training Programme and will use the feedback that you receive from this process to inform your critical self-awareness. You will discuss every item of assessment with your trainer.

You will undertake one audit project during the four months under the direction of your trainer.

All trainees are expected to satisfactorily complete competency assessments while in post. Trainees must note that the completion of these assessments is the responsibility of the trainee and the initiation of discussions and assessments is their responsibility. Ownership of the records is theirs and the process will be overseen by both the postgraduate department of Oxleas trust as well as the deanery program director.

6. Teaching and training, appraising and assessing

Plan, deliver, and evaluate teaching and learning in a variety of environments

You may participate in the teaching of medical students attached to the unit, as appropriate. This will include assisting the 'bedside' teaching of junior and senior students by helping identify and consent suitable patients for the students to see and by helping the students develop their clinical skills by giving them opportunities to present and discuss the patients they have seen. You may also have the opportunity to be involved in small group teaching and lecturing to clinical medical students under the supervision of senior colleagues.

Assess, appraise and evaluate learning and learners

You will evaluate your own learning and progress, using selfassessment forms that you may retain in your learning portfolio. You will participate in the assessment of others, including clinical medical students and colleagues using multi-source feedback tools.

7. Relationships with patients

Conduct professional patient relationships

Whenever possible, you will obtain informed consent from patients for whom you provide treatment.

You will observe patient confidentiality at all times. When guided by your clinical supervisors, you should share information appropriately with colleagues. Whenever possible, and especially towards the end of the placement, you will inform your patients of the ending of your relationship with them in a timely manner.

8. Dealing with problems in professional practice

Conduct or performance of colleagues

If you become aware of problems with the conduct or performance of a colleague, you must bring this to the attention of a senior colleague.

Complaints and formal inquiries

You must always cooperate fully with any complaints procedure or formal inquiry

Providing assistance at inquiries and inquests

You must always cooperate fully with any formal inquiry or inquest into a patient's death.

Indemnity insurance

Early in the placement, you must discuss the provisions of the NHS indemnity insurance with your trainer.

9. Working with colleagues

Continuously promote value based non prejudicial practice You must maintain a legal, ethical and fair approach toward working with colleagues and respect diversity.

Work effectively as a member and a leader of multidisciplinary team

Demonstrate appropriate leadership

During this placement you will be a full member of the multidisciplinary team (MDT) and will attend its weekly meeting. You will discuss your experience of the MDT in meetings with your trainer.

You will cross cover for other core training post/s in the Service from time to time as required.

Communicate effectively with other healthcare professionals You will keep clear, accurate and contemporaneous clinical records. You will send regular written reports on patients to general practitioners and other professionals involved in patient care.

Appropriately assume, delegate and devolve responsibility Access advice, assistance and second opinion when delegating and making referrals

Your trainer and clinical supervisors will give you guidance as to the level of responsibility you should assume in individual clinical situations. If you are unsure, you must always obtain advice and assistance

10. Maintaining probity

Ensure that reports, evidence and documents you have a responsibility for are complete, honest and accurate.

Your written reports will use the standard report format and will be sent as follows: Out-patient letters within two weeks of the

consultation; brief discharge notifications within the same working day of a patient's discharge and full discharge summaries within two weeks of discharge. You will be expected to complete formulation summary in the core assessment folder for every patient that has been discharged under your care. They will be signed. Until instructed otherwise, all reports that you write must be checked by one of your clinical supervisors before being sent out. You will not provide any other written reports about patients, unless this has been sanctioned by one of your clinical supervisors. Properly manage financial and commercial dealings

You must report receiving any gift from patients with your trainer and you must not solicit any fee or payment from a patient or third party unless your trainer has sanctioned this. You will not meet with any representatives of the pharmaceutical industry during work time, unless this is at a postgraduate meeting that has been organised within ABPI Guidelines.

Avoid conflicts of interest and advise others on preventing and dealing with conflicts of interest

Inform your trainer of any real or potential conflict of interest you may have.

11. Health

Ensure that your health and the health of others does not put patients at risk

You must always obtain advice and treatment for mental and physical health problems and must ensure that your health does not put patients at risk. You must comply with the Trust's occupational health policy.

12. Confidentiality

The Post holder must maintain the confidentiality of information about patients, staff and other health service business in accordance with Trust Policy.

13. Risk Management

The Post holder will ensure compliance with the Trust's risk management policies and procedures. These describe the Trust's commitment to risk management, the recognition that our aim is to protect patients, staff and visitors from harm and stress and that all staff have a responsibility to minimise risk.

14. Infection Control

All staff are required to be familiar with the Trusts infection control policies, and national guidance in relation to infection control. All staff whose normal duties are directly or indirectly concerned with patient care must ensure that they complete mandatory infection control training and are compliant with all measures known to be effective in reducing Healthcare Associated Infections.

15. Equality, Diversity and Human Rights

The Post holder will treat all colleagues, service users, carers and members of the public with respect and dignity regardless of their gender, age, race, colour, religious beliefs, religion, nationality, ethnic origin, social background, sexual orientation, marital status, disability, real or suspected HIV/Aids status, criminal background and Trade Union status. The Trust has a Policy for Equality and Human Rights and it is the responsibility of all staff to ensure that this is implemented.

16. Health & Safety

All staff must be aware of the responsibility placed on them by the Health & Safety at Work Act (1974) to ensure that the agreed safety procedures are carried out to maintain a safe condition for employees, patients and visitors.

17. Professional and NHS Codes of Conduct

You are required to act at all times in accordance with the relevant professional Codes of Conduct and Accountability (including, where applicable, those for Board Members). In addition, all management staff must comply with the 'Code of Conduct for NHS Managers' and 'Standards of Business Conduct for NHS Staff'.

18. Safeguarding Children

Safeguarding children is everyone's responsibility. Whatever your role within the trust the welfare of children should be your paramount consideration. In cases of suspected abuse or neglect the duty of care that member of Oxleas staff owes to a child, will take precedence over any obligation to the parent or other adult. All members of Oxleas staff who have contact with service users, or their families, should be familiar with guidance on Child Protection/Safeguarding Children from their own Professional organisations; the trust and the London Safeguarding Children Procedures. Staff are also required to attend mandatory safeguarding children training.

19. Financial Management and Control of Resources

All staff are responsible for the security and the property of the Trust, avoiding loss or damage and being economical and efficient in the use of resources. Staff are required to act in accordance with the rules and regulations as described in the Trust's Policy relating to the Financial Management and Control of Resources'.

20. Customer Care

It is the aim of the Trust to provide patients and clients with the best possible care. All staff are required to put the patient/client first and do their utmost to meet requests and needs courteously and efficiently.

21. Personal/Professional Development Planning/Mandatory Training

All staff should have a personal development plan and in conjunction with their manager, should actively determine and pursue agreed training and development needs and opportunities. All staff are required to attend mandatory training as designated by the Trust.

22. No Smoking

Oxleas NHS Foundation Trust has a no smoking policy. Staff are not permitted to smoke within or on Trust premises.

Typical working pattern in this placement (e.g. ward rounds, clinics, theatre sessions)

NB, this programme is indicative only, it may vary in the light of the trainee's learning needs and the needs of the clinical service.

if known)	19/LDN/RJZ30/F2/010
Placement details (i.e. the specialty	General surgery – F2
and sub-specialty)	
Department	Surgery
Type of work to expect and learning opportunities	Mostly in-patient work with plenty of experience caring both for patients with acute surgical problems (operative and non-operative) and elective post op patients with chronic/known indications for surgery. Occasionally medical issues may be picked up and it may be necessary to organise further investigations. At any stage of the patient journey, there is an excellent exposure to multi-disciplinary team working. This may continue even after a patient is discharged e.g. liaising with the early discharge nurses. One learns how to manage common peri-op complications and gains further broad experience in acute and general surgery when on call. There will be many opportunities to do practical procedures on the ward and in theatre. Learning opportunities include surgery specific Teaching on Fridays, FY1 teaching sessions on Tuesday, monthly mortality and morbidity meetings and bedside teaching during ward rounds especially on post take. There may also be the opportunity to observe/ assist in theatre and outpatient clinic. Further learning opportunities include: Clinics and theatres – see patients in clinic under supervision and opportunities to learn operative procedures. On-call commitment includes assessment of acutely ill
	surgical patient, clerking and management. Breaking bad news. Communication links with patient and relatives. Liaison with other specialities. Discussing images with Radiologist and appropriate investigations.

Where the placement is based	Princess Royal University Hospital; Surgical ward 3, 4 and 5. Plus outlier patients on S6,7&8.
Clinical supervisor(s) for the placement	Mr Ellul, Mr Smedley, Mr El-Hasani, Miss Scarpinata and Mr Doddi.
Main duties of the placement	Working as one of the surgical team managing inpatients on S3-5. Working as part of the multidisciplinary team to aid recovery and rehabilitation, and to facilitate safe and timely discharge and follow-up with written communication to primary care or other specialties on discharge. Supporting the FY1 doctor.
	Acute care of patients on take as part of on call team headed by a consultant with appropriate communication and handover of care. Can be part of the admitting or ward cover team when on call.
	The doctor will be responsible for such other specific clinical duties as allocated by consultants including performing other duties in occasional emergencies and unforeseen circumstances.
	This includes things like ordering and chasing investigations, checking the results and updating patient lists.
Typical working pattern in this placement(e.g. ward rounds, clinics, theatre sessions)	Typical working pattern in this post: 8am to 5pm week days One afternoon off per week for private learning and e- portfolio; subject to agreement with team and adequate F1 cover. Max 13 hour shifts when on call either with general surgery ward cover team on the weekends (8am -5pm) and evenings (5-9pm) or with surgery admitting team on weekday evenings or urology team on weekends (8am – 9pm).
	F2 will have a ward round each day with the Higher Grade/Consultant.
	Team timetable Mon: Ward round. Day surgery unit alternate weeks/ Surgical clinic weekly Tues: Ward round, ward work. Wed: Ward round, FY2 teaching, ward work Thurs: Ward round, ward work Fri: Consultant ward rounds, grand round, ward work
	On call requirements: 1 in 7 weekends, Generally 1 weekday evening on call

	Nights – 16 week rotation. 3 nights Monday-Thursday or Friday-Sunday.

At any stage of the patient journey, there is an excellent exposure to multi-disciplinary team working. This may continue even after a patient is discharged e.g. liaising with the early discharge nurses. One learns how to manage common peri-op complications and gains further broad experience in acute and general surgery when on call. There will be many opportunities to do practical procedures on the ward and in theatre. Learning opportunities include surgery specific Teaching on Fridays, FY1 teaching sessions on Tuesday, monthly mortality and morbidity meetings and bedside teaching during ward rounds especially on post take. There may also be the opportunity to observe/ assist in theatre and outpatient clinic. Further learning opportunities include: Clinics and theatres – see patients in clinic under supervision and opportunities to learn operative procedures. On-call commitment includes assessment of acutely ill surgical patient, clerking and management. Breaking bad news. Communication links with patient and relatives. Liaison with other specialities. Discussing images with Radiologist and appropriate investigations.

Where the placement is based	Princess Royal University Hospital; Surgical ward 3, 4
where the placement is based	and 5. Plus outlier patients on S6,7&8.
Clinical supervisor(s) for the placement	Mr Ellul, Mr Smedley, Mr El-Hasani, Mr Sinha and Mr Doddi.
Main duties of the placement	Working as one of the surgical team managing inpatients on S3-5. Working as part of the multidisciplinary team to aid recovery and rehabilitation, and to facilitate safe and timely discharge and follow-up with written communication to primary care or other specialties on discharge. Supporting the FY1 doctor.
	Acute care of patients on take as part of on call team headed by a consultant with appropriate communication and handover of care. Can be part of the admitting or ward cover team when on call.
	The doctor will be responsible for such other specific clinical duties as allocated by consultants including performing other duties in occasional emergencies and unforeseen circumstances.
	This includes things like ordering and chasing investigations, checking the results and updating patient lists.
Typical working pattern in this placement(e.g. ward rounds, clinics, theatre sessions)	Typical working pattern in this post: 8am to 5pm week days One afternoon off per week for private learning and e- portfolio; subject to agreement with team and adequate F1 cover. Max 13 hour shifts when on call either with general surgery ward cover team on the weekends (8am -5pm) and evenings (5-9pm) or with surgery admitting team on weekday evenings or urology team on weekends (8am – 9pm). F2 will have a ward round each day with the Higher Grade/Consultant. Team timetable Mon: Ward round. Day surgery unit alternate weeks/ Surgical clinic weekly Tues: Ward round, ward work. Wed: Ward round, FY2 teaching, ward work Thurs: Ward round, ward work Fri: Consultant ward rounds, grand round, ward work
	On call requirements: 1 in 7 weekends, Generally, 1 weekday evening on call

	Nights – 16-week rotation. 3 nights Monday-Thursday or Friday-Sunday.
Local education provider (LEP) / employer information	King's College Hospital is a large Teaching Hospital and NHS Foundation Trust situated in South Central London. It provides healthcare for residents of a densely populated surrounding locality, as well as many tertiary services for South-East England and beyond.

There are also links to the intermediate care facilities (rehabilitation) and a tilt test service.
Type of work to expect and learning opportunities	When working a Standard day – Teams are expected to work on their ward and take ownership for any patients transferred to the ward from AMU. They are responsible for the day to day care presenting patients on ward rounds to consultants, ensuring proper communication with general practice and relatives. They also monitor the work of the F1 including supporting their development, ensuring the accuracy of their assessments and their completion of summaries of care for primary care.
	When working on Orthogeriatric ward – For the Orthogeriatric ward the FY2 will be expected to ensure patients are optimised for theatre. The Orthogeriactric Consultant provides daily supervision. When On-call - The F2's join a rota with all SHO level doctors to take part in the general take. During the general take they work with a Physician of the day (POD), a specialist registrar, SHOs and an F1 to ensure the admission assessment, senior review and management planning of all patients referred to the department either from General Practice or Emergency Medicine. The FY2 on-call will also be on the cardiac arrest team.

	a diagnosis and present to the POD for immediate feedback and evaluations.
Where the placement is based	Princess Royal University Hospital. Medical 3, Medical 4, Darwin 1, Darwin 2, Medical 7 and S7 Orthogeriatric Ward
Clinical supervisor(s) for the placement	Our Consultant geriatricians are clinical and educational supervisors and have a special interest in medical education.
Main duties of the placement	To monitor the day to day care of patients, supervise the F1, ensure preparation for ward rounds and board rounds and to participate in the general take.
	The F2 undertakes ward rounds with the consultants, ensures availability of all results, presents cases, ensures accurate completions of summary of care. They are responsible for updating relatives on progress of patients and supervision of F1.
	The doctor will be responsible for such other specific clinical duties as allocated by consultants including performing other duties in occasional emergencies and unforeseen circumstances.
Typical working pattern in this placement(e.g. ward rounds, clinics, theatre sessions)	There are daily ward rounds, board rounds and a weekly multi-disciplinary team meeting (MDT meeting).
	FY2 Teaching – weekly – Wednesday 11:30-12:30. Elderly Medicine X-ray meeting – alternate Tuesday 13:30-14:00 Elderly Medicine Journal club –Tuesday 14.00-15.00 Grand Round-Friday 13.00-14.00
	All foundation doctors have an opportunity to complete a quality improvement project (QiP).
Local education provider (LEP) / employer information	King's College Hospital is a large Teaching Hospital and NHS Foundation Trust situated in South Central London. Trainee Information System (TIS) Post Code (and local post number if known)	19/LDN/RJZ30/F1/019 19/LDN/RJZ30/F1/020 19/LDN/RJZ30/F1/021
Placement details (i.e. the specialty and sub-specialty)	Intensive Care Medicine
Department	The critical care unit is a 10 bedded unit, consisting of both HDU & ITU beds. It offers multi-organ support, including inotropes, non-invasive and invasive mechanical ventilation, haemofiltration and advanced cardiac monitoring. It admits around 600-700 adult (≥16 years) patients a year, around 60% of whom require level 3 care. The unit is run by 13 consultant intensivists.
Type of work to expect and learning opportunities	The placement will be spent on the intensive care unit, working with the ITU team, caring for critically ill patients throughout the hospital but mainly in the intensive care unit. There is the opportunity to spend time with our outreach team (iMobile) to gain more experience of the deteriorating patients. Key learning objectives include assessing patients at risk of becoming critically ill and using simple measures to prevent further physiological deterioration, assessing critically ill patients and managing abnormal physiology in an ITU setting, basic understanding of mechanical ventilation and haemofiltration, fluid management and the use of inotropes and vasoconstrictors to manipulate the circulation in conjunction with advanced cardiac monitoring. The safe prescribing and monitoring of drugs, understanding the importance of adequate nutrition in the critically ill patient, appropriate end-of-life care including the opportunity for organ donation and working in a multidisciplinary team. There will also be ample opportunity to place invasive monitoring lines, vascaths and possibly percutaneous tracheostomies, using ultrasound where appropriate. You will be expected to work closely with the critical care outreach team. There is a critical care follow up clinic each month that you can arrange to attend to help understand the impact that critical care admission has on people's lives.
Where the placement is based	Princess Royal University Hospital, Intensive Care Unit

Trainee Information System (TIS) Post Code (and local post number if known) Placement details (i.e. the specialty and sub-specialty)	19/LDN/RJZ30/F1/004 19/LDN/RJZ30/F1/005 19/LDN/RJZ30/F1/006 Urology (Surgery)
Department Department	Urology
Type of work to expect and learning opportunities	You are a key member of a firm which is the South London centre for inpatient Urology Mostly in-patient work with plenty of experience caring both for patients with acute and chronic urological problems (operative and non-operative) and elective post op patients with chronic/known indications for surgery. Common problems include haematuria, urinary retention, testicular pain and urological malignancies, acute renal colic, cancer related admissions including end of life care At any stage of the patient journey, there is an excellent exposure to multi-disciplinary team working. This may continue even after a patient is discharged e.g. liaising with the early discharge nurses. One learns how to manage common peri-op complications and gains further broad experience in acute and general surgery when on call. There will be many opportunities to do practical procedures on the ward and in theatre particularly male and female catheters (urinary and suprapubic). You will also be given opportunity to attend the outpatient based clinics and procedures at the dedicated outpatient urology unit at the Beckenham Beacon to enable follow through of patient journeys and learning about urological diseases that can be managed in outpatients and primary care. Learning opportunities include daily consultant bedside teaching on the ward round, FY1 teaching sessions on Tuesday, dedicated urology teaching on Thursday,
	general surgery teaching on Friday. Monthly mortality and morbidity and audit meetings. There will be the opportunity to observe/ assist in theatre and outpatient clinic.

STFS is a collaboration between HE Kent, Surrey & Sussex, HE South London, Brighton & Sussex Medical School, King's College London School of Medicine & St George's University of London

Wed: Consultant ward round, ward work Thurs: Consultant ward round, ward work, lunchtime urology teaching session Fri: Consultant ward rounds, general surgery teaching weekend handover meeting, ward work On call requirements: 1 in 7 weekends, Generally, 1 weekday evening on call
Local education provider (LEP) / employer information	King's College Hospital is a large Teaching Hospital and NHS Foundation Trust situated in South Central London. It provides healthcare for residents of a densely populated surrounding locality, as well as many tertiary services for South-East England and beyond.

Foundation Programme Individual Placement Descriptor

Trust	Kings College Hospital NHS Foundation Trust
Site	Princess Royal University Hospital
Trainee Information System (TIS) Post Code (and local post number if known) Placement details (i.e. the specialty and sub-specialty)	19/LDN/RJZ30/F1/008 19/LDN/RJZ30/F1/010 19/LDN/RJZ30/F1/012 Urology (Surgery)
Department Department	Urology
Type of work to expect and learning opportunities	You are a key member of a firm which is the South London centre for inpatient Urology Mostly in-patient work with plenty of experience caring both for patients with acute and chronic urological problems (operative and non-operative) and elective post op patients with chronic/known indications for surgery. Common problems include haematuria, urinary retention, testicular pain and urological malignancies, acute renal colic, cancer related admissions including end of life care At any stage of the patient journey, there is an excellent exposure to multi-disciplinary team working. This may continue even after a patient is discharged e.g. liaising with the early discharge nurses. One learns how to manage common peri-op complications and gains further broad experience in acute and general surgery when on call. There will be many opportunities to do practical procedures on the ward and in theatre particularly male and female catheters (urinary and suprapubic). You will also be given opportunity to attend the outpatient based clinics and procedures at the dedicated outpatient urology unit at the Beckenham Beacon to enable follow through of patient journeys and learning about urological diseases that can be managed in outpatients and primary care. Learning opportunities include daily consultant bedside teaching on the ward round, FY1 teaching sessions on Tuesday, dedicated urology teaching on Thursday,
	general surgery teaching on Friday. Monthly mortality and morbidity and audit meetings. There will be the opportunity to observe/ assist in theatre and outpatient clinic.

STFS is a collaboration between HE Kent, Surrey & Sussex, HE South London, Brighton & Sussex Medical School, King's College London School of Medicine & St George's University of London
