| Department  | General and acute medicine is part of the Urgent Care, Planned Care and Allied Clinical Services division. We have two Acute Medical Units - AMUs (Guthrie and Annie Zunz wards) at the hospital that take acute medical admissions. These are run by a team of Acute Medicine Physicians. All newly admitted patients receive a consultant review during the day until 8pm, on the Acute medical take. A further post take ward round takes place at 8am to review the overnight admissions. There are daily consultant-led ward rounds for all other patients. Patients who are identified as requiring an admission of longer than 72 hours will be moved to one of the post-acute wards in either General Medicine (Lonsdale, Mary Ray, Twining and Oliver wards) or to one of the Clinical Gerontology wards. These wards are run by General Physicians with a variety of sub-speciality interests in Gerontology, Respiratory Medicine, Endocrinology and Gastroenterology. There are close working relationships with Cardiology, Stroke teams and Critical Care. All wards are staffed by consultant-led teams comprising higher speciality trainees, core trainees and foundation trainees. Both AMU and post-AMU wards are well supported by multidisciplinary teams, with daily board rounds and regular multidisciplinary meetings. |

| Department  | General and acute medicine is part of the Urgent Care, Planned Care and Allied Clinical Services division. We have two Acute Medical Units - AMUs (Guthrie and Annie Zunz wards) at the hospital that take acute medical admissions. These are run by a team of Acute Medicine Physicians. All newly admitted patients receive a consultant review during the day until 8pm, on the Acute medical take. A further post take ward round takes place at 8am to review the overnight admissions. There are daily consultant-led ward rounds for all other patients. Patients who are identified as requiring an admission of longer than 72 hours will be moved to one of the postacute wards in either General Medicine (Lonsdale, Mary Ray, Twining and Oliver wards) or to one of the Clinical Gerontology wards. These wards are run by General Physicians with a variety of sub-speciality interests in Gerontology, Respiratory Medicine, Endocrinology and Gastroenterology. There are close working relationships with Cardiology, Stroke teams and Critical Care. All wards are staffed by consultant-led teams comprising higher speciality trainees, core trainees and foundation trainees. Both AMU and post-AMU wards are well supported by multidisciplinary teams, with daily board rounds and regular multidisciplinary meetings. |
| Type of work to expect and learning opportunities | In a four month attachment, two months will be spent on a post-acute ward and the other two on AMU, when they will participate in the medical take. The overall educational objectives of the F1 year are to provide the trainee with the  |
|   | <ul> <li>knowledge, skills and attitudes to be able to:</li> <li>Take a history and examine a patient.</li> <li>Identify and synthesise problems.</li> <li>Recognise acute illness and institute prompt management.</li> </ul>   |

| Placement details (i.e. the specialty and sub-specialty)                    | General (Internal) Medicine (N/A)  |
| Department  | General and acute medicine is part of the Urgent Care, Planned Care and Allied Clinical Services division. We have two Acute Medical Units - AMUs (Guthrie and Annie Zunz wards) at the hospital that take acute medical admissions. These are run by a team of Acute Medicine Physicians. All newly admitted patients receive a consultant review during the day until 8pm, on the Acute medical take. A further post take ward round takes place at 8am to review the overnight admissions. There are daily consultant-led ward rounds for all other patients. Patients who are identified as requiring an admission of longer than 72 hours will be moved to one of the postacute wards in either General Medicine (Lonsdale, Mary Ray, Twining and Oliver wards) or to one of the Clinical Gerontology wards. These wards are run by General Physicians with a variety of sub-speciality interests in Gerontology, Respiratory Medicine, Endocrinology and Gastroenterology. There are close working relationships with Cardiology, Stroke teams and Critical Care. All wards are staffed by consultant-led teams comprising higher speciality trainees, core trainees and foundation trainees. Both AMU and post-AMU wards are well supported by multidisciplinary teams, with daily board rounds and regular multidisciplinary meetings. |
| Type of work to expect and learning opportunities                           | In a four month attachment, two months will be spent on a post-acute ward and the other two on AMU, when they will participate in the medical take. The overall educational objectives of the F1 year are to provide the trainee with the knowledge, skills and attitudes to be able to:  Take a history and examine a patient.  Identify and synthesise problems.   |
|   | Recognise acute illness and institute prompt management.   |

| Department                                   | General and acute medicine is part of the Urgent Care, Planned Care and Allied Clinical Services division. We have two Acute Medical Units - AMUs (Guthrie and Annie Zunz wards) at the hospital that take acute medical admissions. These are run by a team of Acute Medicine Physicians. All newly admitted patients receive a consultant review during the day until 8pm, on the Acute medical take. A further post take ward round takes place at 8am to review the overnight admissions. There are daily consultant-led ward rounds for all other patients. Patients who are identified as requiring an admission of longer than 72 hours will be moved to one of the post-acute wards in either General Medicine (Lonsdale, Mary Ray, Twining and Oliver wards) or to one of the Clinical Gerontology wards. These wards are run by General Physicians with a variety of sub-speciality interests in Gerontology, Respiratory Medicine, Endocrinology and Gastroenterology. There are close working relationships with Cardiology, Stroke teams and Critical Care. All wards are staffed by consultant-led teams comprising higher speciality trainees, core trainees and foundation trainees. Both AMU and post-AMU wards are well supported by multidisciplinary teams, with daily board rounds and regular multidisciplinary meetings. |
| Type of work to expect and learning          | In a four month attachment, two months will be spent on a   |
| opportunities                                | post-acute ward and the other two on AMU, when they will participate in the medical take. The overall educational objectives of the F1 year are to provide the trainee with the knowledge, skills and attitudes to be able to:  Take a history and examine a patient. Identify and synthesise problems. Recognise acute illness and institute prompt management.  |

| Placement details (i.e. the specialty and sub-specialty) | Paediatrics (N/A)   |
| Department   | The Variety Children's Hospital (VCH) contains four wards, a paediatric intensive care and high dependency unit and a day care unit. Approximately 20000 children per year referred from primary care are seen in 10 general paediatric outpatient's clinic at King's. There are about 4000 general paediatric admissions per year, mainly to the 15 bed acute paediatric medical ward (Tony and Guy ward) and 6 beds paediatric short stay unit. There are 14 consultant paediatricians who do a consultant of the week General Paediatric rota which involves a daily ward round and responsibility for all General Paediatric admissions during the day. After hours cover during the week is provided by another General Paediatric consultant. There are 7 paediatric ST2/3 trainees, 5 GPVTS and 5 Junior Clinical Fellows who cover General Paediatrics, ED and Paediatric Neurology.  General Paediatrics and ED are covered during the day by 3 Clinical Fellows. The specialist registrars in respiratory medicine, neurology and endocrinology at King's, research fellows and community SpR's cover the late shifts and on call at nights and weekends. A team of three CNS' support safeguarding work.  Dr Sreena Das leads on safeguarding children in the trust. |
| Type of work to expect and learning opportunities        | All F1 doctors in Paediatrics will be ward based during the "normal" working day and are expected to help deliver the daily medical care of all the patients on their service.  The objectives of the post include the development of:  the skills required for the assessment and management of common diseases in children  competence in feeding techniques, IV drug administration, immunisation  competence in the management of fluid and nutritional support for III children  experience in dealing with the relatives of children with illness   |

| Department                                | King's College Hospital has one of the largest critical care services in the UK with 5 adult intensive care units over two sites and approximately 3500 admissions per year in every speciality of critical care medicine (except Major Burns & Adult Congenital Heart Disease). A new 60 bedded general intensive unit has opened this year, alongside Jack Steinberg Critical Care Unit making King's one of the largest critical care departments in the UK. The hospital not only serves a diverse local population but operates as one of the four Major Trauma Centres (MTC) within the capital, the MTC for Kent and as a tertiary services referral centre for cardiac (including primary PCI), neurosciences (including stroke, neurosurgery and spinal surgery), haematological oncology, and cystic fibrosis). Alongside the Liver Intensive Therapy Unit managing acute liver failure, acute on chronic liver failure, as well as one of Europe's largest liver transplant programmes, King's has an unrivalled patient population in terms of clinical diversity and complexity.  There are 35+ICU consultants who work across the various units. Most are full time intensivists with background training in either Anaesthesia, medicine or Emergency medicine.  All are approved clinical and/or educational supervisors. |

# Type of work to expect and learning opportunities

All F1 doctors in ICM are supra-numerary and expected to attend FT learning activities provided by the Trust. The ICM F1 post holder spends 4 months based on one of the general units – all units admit a mixed case mix of patients. They are expected to work alongside the other junior doctors, both training and trust positions, within the limits of their competences and capabilities. The doctor will learn how to recognise, assess and manage critically ill patients requiring organ support. They will be supervised in advanced procedures such as central and arterial line insertion. We work in multi-disciplinary and inter-professional teams and the doctor will learn from a variety of formal and informal teaching activities. There are twice daily consultant-led interprofessional ward rounds, twice weekly neuroradiology meetings, weekly mandatory ICM teaching with input from journal club, mortality and morbidity and audit groups, as well as research meetings. The doctor will be expected to lead and participate in an audit activity and may have the opportunity to participate in research activities. It is expected they will present at the weekly meeting on at least one occasion, this will usually be a case presentation or their audit project.

Within the 4 months there is also time (typically 6 weeks) spent as part of the Acute Surgery team providing ward care for surgical admissions.

The overall educational objectives of the F1 year are promoted within this innovative attachment and are: To provide the trainee with the knowledge, skills and attitudes to be able to

- Take a history and examine a patient.
- Identify and synthesise problems.
- Prescribe safely.
- Keep an accurate and relevant medical record.
- Write accurate and relevant discharge summaries.
- Manage time and clinical priorities effectively.
- Communicate effectively with patients, relatives and colleagues.
- Use evidence, guidelines and audit to benefit patient care.
- Act in a professional manner at all times.
- Cope with ethical and legal issues which occur during the management of patients with general medical problems.
- Identify issues / challenges with EOLC planning and discsussions
- Educate patients effectively.
- Become lifelong learners and teachers.

| Clinical supervisor(s)       | for | the | Drs P Reddy, D Wilson, S Hasan, C Bryant, J Myers  |
|------------------------------|-----|-----|--|
| Main duties of the placement |     |     | Usual working day on geriatric medicine ward will be as part of a team with a core trainee (GP or CMT) and geriatric medicine registrar working for a geriatric medicine consultant and also as part of the wider multidisciplinary team (MDT) caring for geriatric medicine patients either admitted straight from emergency medicine or transferred from other wards after identification by geriatric medicine liaison teams in medicine and surgery in the Trust.  The F1 will be expected to attend a daily MDT board round. The F1 will attend a minimum of twice weekly Consultant ward rounds and twice weekly registrar ward rounds. They will attend a weekly MDT multidisciplinary meeting to discuss all patients. In addition to their Trust F1 teaching programme they will attend a weekly journal club and audit meeting (and be expected to present when rostered to do so), weekly radiology meeting and weekly departmental academic meeting. The F1 will be expected to participate in clerking all new patients to the ward and summarising their condition. They will have be expected to record progress for patients with the team in the electronic patient record and as part of the team be able to refer to other specialist teams as required, be involved in continuing health care assessments, write discharge summaries, be involved in advance care planning and liaise with community services. The F1 will be expected to develop and consolidate excellent communication skills, written and oral, handover communication, discussing complex discharge arrangements and palliative care decisions and end of life care. The F1 will be expected to help update patients and their next of kin on their medical progress and management plans and ensure patient centred care at all times.  As well as developing and consolidating general medical skills in managing patients with complex com- morbidities and multiorgan disease and managing acute decompensation of disease (including appropriate senior escalation) the F1 will also be able to develop their knowledge and skil |

|   | through the ward.  Procedures the F1 will be exposed to during this placement will be venesection, intravenous cannulation, arterial blood gas  |
|---|---|
|   | sampling, urethral catheterisation and lumbar puncture.   |
|   | The F1 will participate in the F1 on call rota in medicine out of hours providing on call medical cover to the medical wards and as part of the acute medicine on call team. They will be under the supervision of core trainees, medical registrars and the consultant on call for medicine. |

| <b>Placement details</b> (i.e. the specialty and sub-specialty)             | General (Internal) Medicine (N/A)  |
| Department  | General and acute medicine is part of the Urgent Care, Planned Care and Allied Clinical Services division. We have two medical admissions units (RD Lawrence and Annie Zunz wards) at the hospital that take all acute medical admissions. These are run by a team of acute physicians. The majority of medical admissions (either from primary care or the emergency department) are admitted via the acute assessment unit (AAU) on Twining ward which is open from $10am - 10pm$ . All patients receive a rapid consultant review during the day, until 9pm. A further post take ward round takes place at 8am to review the overnight admissions. There are daily consultant-led ward rounds for all other patients. Patients who are identified as requiring an admission of longer than 72 hours will be moved to one of the post-acute wards in either general medicine (Lonsdale, Mary Ray, Matthew Whiting and Oliver wards) or to one of the specialist clinical gerontology wards. These wards are run by general physicians with a variety of sub-speciality interests in gerontology, respiratory medicine, rheumatology, stroke medicine and gastroenterology and there is a daily senior review of all patients. There are close working relationships with cardiology, acute stroke care and critical care. All wards are staffed by consultant-led teams comprising higher speciality trainees, core trainees and foundation trainees. Both MAU and post-MAU wards are well supported by multidisciplinary teams, with daily board rounds and regular multidisciplinary meetings. |
| Type of work to expect and learning opportunities                           | In a four-month attachment, two months will be spent on a post-acute ward and the other two on AMU, when they will participate in the medical take. The overall educational objectives of the F2 year are to provide the trainee with the knowledge, skills and attitudes to be able to:  • Take a history and examine a patient.  • Identify and synthesise problems.  • Recognise acute illness and institute prompt management.  • Prescribe safely.  |

| Where the placement is based  | <ul> <li>Keep an accurate and relevant medical record.</li> <li>Obtain procedural competencies in line with curriculum.</li> <li>Manage time and clinical priorities effectively.</li> <li>Participate in effective handover of patients.</li> <li>Work within the multidisciplinary team and plan safe and effective patient discharge.</li> <li>Communicate effectively with patients, relatives and colleagues.</li> <li>Use evidence, guidelines and audit to benefit patient care.</li> <li>Cope with ethical and legal issues which occur during the management of patients with general medical problems.</li> <li>Educate patients effectively</li> <li>Become lifelong learners and teachers.</li> </ul> |  |
|---|---|--|
| Where the placement is based  | King's College Hospital NHS Foundation Trust, London, Denmark Hill site.  |  |
| Clinical supervisor(s) for the placement  | Each ward has a designated consultant clinical lead and all trainees have a consultant educational and clinical supervisor.   |  |
| Main duties of the placement  | The F2 doctor is responsible with other staff for the ward care of patients and the maintenance of the patients' medical records. They are expected to attend the structured teaching programme provided by the department. The doctor will be responsible for such other specific clinical duties as allocated by consultants, occasional emergencies and unforeseen circumstances.  |  |

All patients receive a rapid consultant review during the day, until 9pm. A further post take ward round takes place at 8am to review the overnight admissions. There are daily consultant-led ward rounds for all other patients. Patients who are identified as requiring an admission of longer than 72 hours will be moved to one of the post-acute wards in either general medicine (Lonsdale, Mary Ray, Matthew Whiting and Oliver wards) or to one of the specialist clinical gerontology wards. These wards are run by general physicians with a variety of sub-speciality interests in gerontology, respiratory medicine, rheumatology, stroke medicine and gastroenterology and there is a daily senior review of all patients. There are close working relationships with cardiology, acute stroke care and critical care. All wards are staffed by consultant-led teams comprising higher speciality trainees, core trainees and foundation trainees. Both MAU and post-MAU wards are well supported by multidisciplinary teams, with daily board rounds |  |
|   | and regular multidisciplinary meetings.   |  |
| Type of work to expect and learning opportunities               | In a four-month attachment, two months will be spent on a post-acute ward and the other two on AMU, when they will participate in the medical take. The overall educational objectives of the F2 year are to provide the trainee with the knowledge, skills and attitudes to be able to:  • Take a history and examine a patient.  • Identify and synthesise problems.  • Recognise acute illness and institute prompt management.  • Prescribe safely.   |  |

|   | <ul> <li>Keep an accurate and relevant medical record.</li> <li>Obtain procedural competencies in line with curriculum.</li> <li>Manage time and clinical priorities effectively.</li> <li>Participate in effective handover of patients.</li> <li>Work within the multidisciplinary team and plan safe and effective patient discharge.</li> <li>Communicate effectively with patients, relatives and colleagues.</li> <li>Use evidence, guidelines and audit to benefit patient care.</li> <li>Cope with ethical and legal issues which occur during the management of patients with general medical problems.</li> <li>Educate patients effectively</li> <li>Become lifelong learners and teachers.</li> </ul> |  |

| Department                                | The Emergency Department comprises of 25 Consultants.   |
|   | Many of the Consultants have specialist interests, examples of which include; Paediatric, Emergency Medicine, Major Trauma, Intensive Care Medicine and Ultrasound. There is 24/7 Registrar presence on the shop floor and a resident Consultant covering Major Trauma 24/7. There is a general ED Consultant presence until midnight. The department is part of a large urban teaching hospital and is a designated Major Trauma Centre for South London.  |
|   | Approximately 120,000 patients attend the department annually, 22% of which are paediatric.   |
| Type of work to expect and learning       | Every clinical encounter is used to facilitate teaching and   |
| opportunities                             | learning. All F2 doctors will be based in the Emergency Department. Some of the key skills expected to be gained and consolidated include being able to:  • Take an appropriate and timely history from a patient.  • Carry out focussed clinical examinations.  • Recognise the sick patient.  Combine the above and formulate a differential diagnosis and suitable management plan.  Prescribe appropriately and safely in the Emergency setting.  • Act upon the results of any investigations ordered.  Discuss a management plan with senior doctors and to be able to either discharge a patient or refer them onwards for specialist input as necessary.  Communicate effectively with colleagues, patients and relatives.  • Keep accurate medical notes.  Develop an awareness of ethical and medico-legal issues.  Develop skills in time management and clinical prioritisation of workloads. |
|   |   |
| Where the placement is based              | Emergency Department  |
| Clinical supervisor(s) for the placement  | Mr Tunji Lasoye, Dr Emer Sutherland and Dr Cara Jennings  |
| Main duties of the placement              | Working as part of a multidisciplinary team, F2 Doctors contribute to the management of patients presenting to the Emergency Department. They will work alongside Junior Clinical Fellows, Registrars, Consultants,   |

|   | Emergency Nurse Practitioners and other nursing and   |
|---|---|
|   | ancillary staff in formulating in the initial assessment of a   |
|   | range of patients, the formulation of management plans,   |
|   | differential diagnosis and the subsequent treatment, onward   |
|   | referral or discharge of patients.  |
|   | Some doctors will be capable of discharging patients  |
|   | autonomously by the end of the rotation. Opportunities exist to work in all areas of the department, with designated shifts in 'Majors' and covering the 'Resuscitation room.' In |
|   | addition, there is a one month block in the Paediatric  |
|   | Emergency Department. There is a formal induction   |
|   | programme at the start of the post which is supplemented by the 'Kwiki' intranet resource and weekly departmental   |
|   | teaching sessions. Each doctor will also be expected to   |
|   | present a case  |
|   | presentation and an audit during their time in the department.  |
| Typical working pattern in this placement | Rostered shifts.  |
| (e.g. ward rounds, clinics, theatre       |   |

There is 24/7 Registrar presence on the shop floor and a resident Consultant covering Major Trauma 24/7. There is a general ED Consultant presence until midnight. The department is part of a large urban teaching hospital and is a designated Major Trauma Centre for South London. Approximately 120,000 patients attend the department annually, 22% of which are paediatric. There is a 14 bedded adult short stay ward known as Clinical Decision Unit (CDU) and a separate Paediatric CDU.  |
| Type of work to expect and learning opportunities  | Every clinical encounter is used to facilitate teaching and learning.  All F2 doctors will be based in the Emergency Department.  Some of the key skills expected to be gained and consolidated include being able to:  • Take an appropriate and timely history from a patient.  • Carry out focussed clinical examinations.  • Recognise the sick patient.  • Combine the above and formulate a differential diagnosis and suitable management plan.  • Prescribe appropriately and safely in the Emergency setting.  • Act upon the results of any investigations ordered.  • Discuss a management plan with senior doctors and to be able to either discharge a patient or refer them onwards for specialist input as necessary.  • Communicate effectively with colleagues, patients and relatives.  • Keep accurate medical notes.  • Develop an awareness of ethical and medicolegal issues. |

| Department  | The Emergency Department comprises of 25 Consultants. Many of the Consultants have specialist interests, examples of which include; Paediatric, Emergency Medicine, Major Trauma, Intensive Care Medicine and Ultrasound. There is 24/7 Registrar presence on the shop floor and a resident Consultant covering Major Trauma 24/7. There is a general ED Consultant presence until midnight. The department is part of a large urban teaching hospital and is a designated Major Trauma Centre for South London. Approximately 120,000 patients attend the department annually, 22% of which are paediatric. There is a 14 bedded adult short stay ward known as Clinical Decision Unit (CDU) and a separate Paediatric CDU.  |
| Type of work to expect and learning opportunities   | Every clinical encounter is used to facilitate teaching and learning.  All F2 doctors will be based in the Emergency Department.  Some of the key skills expected to be gained and consolidated include being able to:  • Take an appropriate and timely history from a patient.  • Carry out focussed clinical examinations.  • Recognise the sick patient.  • Combine the above and formulate a differential diagnosis and suitable management plan.  • Prescribe appropriately and safely in the Emergency setting.  • Act upon the results of any investigations ordered.  • Discuss a management plan with senior doctors and to be able to either discharge a patient or refer them onwards for specialist input as necessary.  • Communicate effectively with colleagues, patients and relatives.  • Keep accurate medical notes.  • Develop an awareness of ethical and medicolegal issues. |

| Placement details (i.e. the specialty and         | General (Internal) Medicine (N/A)   |
| sub-specialty)                                    |   |
|   | General and acute medicine is part of the Urgent Care, Planned Care and Allied Clinical Services division. We have two medical admissions units (RD Lawrence and Annie Zunz wards) at the hospital that take all acute medical admissions. These are run by a team of acute physicians. The majority of medical admissions (either from primary care or the emergency department) are admitted via the acute assessment unit (AAU) on Twining ward which is open from 10am – 10pm. All patients receive a rapid consultant review during the day, until 9pm. A further post take ward round takes place at 8am to review the overnight admissions. There are daily consultant-led ward rounds for all other patients. Patients who are identified as requiring an admission of longer than 72 hours will be moved to one of the post-acute wards in either general medicine (Lonsdale, Mary Ray, Matthew Whiting and Oliver wards) or to one of the specialist clinical gerontology wards. These wards are run by general physicians with a variety of sub-speciality interests in gerontology, respiratory medicine, rheumatology, stroke medicine and gastroenterology and there is a daily senior review of all patients. There are close working relationships with cardiology, acute stroke care and critical care. All wards are staffed by consultant-led teams comprising higher speciality trainees, core trainees and foundation trainees. Both MAU and post-MAU wards are well supported by multidisciplinary teams, with daily board rounds and regular multidisciplinary meetings. |
| Type of work to expect and learning opportunities | In a four month attachment, two months will be spent on a post-acute ward and the other two on AMU, when they will participate in the medical take. The overall educational objectives of the F1 year are to provide the trainee with the knowledge, skills and attitudes to be able to:  Take a history and examine a patient. Identify and synthesise problems. Recognise acute illness and institute prompt management. Prescribe safely. Keep an accurate and relevant medical record.  |

| Type of work to expect and learn-<br>ing opportunities | The Low Intensity Team in Southwark manages patients which chronic and enduring mental illness, usually schizophrenia, who are relatively stable in their mental state and on medication requiring specialist psychiatric oversight. It has a caseload of around 300 and a team which works to provide medical, nursing, psychological, peer support and occupational input.   |  |  |
|  | We provide care for patients who are aged 18 and above, and have been held in community mental health teams, stable for more than one year without admission or crisis, and no longer requiring care coordination (higher level input to manage multiple needs or agencies involved e.g. complex physical health, finances, social services input). Patients must also be unable to be discharged to GP due to their medication regimen. Patients in the team have regular medical input both for general review and managing issues or crises as and when they present.   |  |  |
|  | During the placement, the consultant psychiatrist will supervise the FY1 trainee in conducting mental health, medication reviews, risk assessments and in developing patient-centred care plans. They will be trained to formulate psychiatric problems and discuss treatment options with patients and carers in a collaborative way. They are not expected to lead on making treatment decisions. After a period of induction and shadowing other team members, the trainee will undertake autonomous assessments of routine and urgent referrals. These assessments will be subsequently discussed and assessed in weekly consultant supervision. The trainee may participate in emergency assessments, when they occur, usually conducted with another senior team member.  Clinical knowledge |  |  |
|  | <ol> <li>Epidemiology and presentation of chronic and severe mental health problems in the general community with an emphasis of schizophrenia, mood, anxiety and personality disorders</li> <li>Presentation of acute crises on the background of chronic illness</li> <li>Management of specialist medication in psychiatry e.g. clozapine, trevicta etc</li> <li>Management of both side effects of medication and complex comorbidity</li> <li>Management of long term aspects of schizophrenia both positive and negative symptoms</li> </ol>   |  |  |

6. Understanding the relationship between physical illness and psychological distress and the social network within which the patient operates in. 7. Understanding of the recovery model Clinical skills 1. Conducting bio-psycho-social assessments of patients in a community mental health setting 2. Detailed assessment of mental state 3. Systematic assessment of side effects including EPSE, use of GASS 4. Assessment of alcohol and drug problems 5. Assessment of risks including that of suicide and self-6. Conducting structured cognitive assessments 7. Developing collaborative care plans and communicating them with GPs, alcohol/substance misuse and social care professionals Competency-based learning 1. The consultant psychiatrist will help the trainee in maintaining their Foundation e-portfolio and guide them in planning and completing appropriate supervised learning assessments. 2. The trainee would be encouraged and supported to complete at least one of an audit/research/service improvement project. 3. S/he will be encouraged to deliver clinical teaching sessions at a level appropriate for FY1. Practical skills 1. Collaborating with members of the multi-professional team 2. Collaborating with other agencies involved including GPs, carers, social services, Community Mental Health Teams (CMHTs), psychiatric inpatient units and other sub-specialties in Psychiatry 3. Collaborating with clinical psychology, counselling, primary care, social care and law enforcement services Marina House, 63-65 Denmark Hill SE5 8AZ Where the placement is based Clinical supervisor(s) for the Dr Lisa Conlan - Consultant Psychiatrist placement This FY1 trainee would be placed in Marina House 4 days a week for 4 Main duties of the placement months. The trainee will work in a multidisciplinary team including one Consultant Psychiatrist, a Psychologist, a Team Leader, 6 Community Psychiatric Leads, a peer support worker, a Senior Employment Specialist. a Clinical Service Lead and a Team Administrator. The main duties include: Conducting comprehensive assessments, reviews and follow-ups of people with mental health and physical health problems in an outpatient setting, under supervision Attending and contributing to referrals meetings and multidisciplinary team meetings

| Department                                | King's College Hospital has one of the largest critical care services in the UK with 5 adult intensive care units over two sites and approximately 3500 admissions per year in every speciality of critical care medicine (except Major Burns & Adult Congenital Heart Disease). A new 60 bedded general intensive unit has opened this year, alongside Jack Steinberg Critical Care Unit making King's one of the largest critical care departments in the UK. The hospital not only serves a diverse local population but operates as one of the four Major Trauma Centres (MTC) within the capital, the MTC for Kent and as a tertiary services referral centre for cardiac (including primary PCI), neurosciences (including stroke, neurosurgery and spinal surgery), haematological oncology, and cystic fibrosis). Alongside the Liver Intensive Therapy Unit managing acute liver failure, acute on chronic liver failure, as well as one of Europe's largest liver transplant programmes, King's has an unrivalled patient population in terms of clinical diversity and complexity.  There are 35+ICU consultants who work across the various units. Most are full time intensivists with background training in either Anaesthesia, medicine or Emergency medicine. All are approved clinical and/or educational supervisors. |

### Type of work to expect and learning opportunities

The ICM F2 post holder spends 4 months on the resident rota on one of the general units – all units admit a mixed case mix of patients. They work alongside the other junior doctors, both training and trust positions, within the limits of their competences and capabilities, with direct supervision by the senior resident and consultant. The doctor will learn how to recognise, assess and manage critically ill patients requiring organ support. They will be supervised in advanced procedures such as central and arterial line insertion. We work in multi-disciplinary and inter- professional teams and the doctor will learn from a variety of formal and informal teaching activities. There are twice daily consultant-led interprofessional ward rounds, twice weekly neuroradiology meetings, weekly mandatory ICM teaching with input from journal club, mortality and morbidity and audit groups, as well as research meetings. The doctor will be expected to

|                              | lead and participate in an audit activity and may have the op-  |

| and sub-specialty)                                |   |
| Department  | Department of General Medicine at the Princess Royal is organised such that all consultants undertake General Internal Medicine and an arrangement of subspecialities. Departments are organised in such a way that each consultant has a ward based team, with each ward having a sub-specialty "flavour". Patients are triaged from the EAU to the wards according to specialty need.   |
|   | Discharges from Acute Medicine are supported by post acute care and intermediate care resources. There is a good working relationship with social services and each ward has a ward based social care officer.  |
|   | The Department holds a weekly Grand Round and a weekly Governance Meeting. In Cardiology there is a teaching meeting held Thursday lunchtimes. The department of geriatric medicine holds a Journal Club. There is a range of specialist radiology meetings and cancer meetings to which F2's are welcome.  |
| Type of work to expect and learning opportunities | The F2's join a rota with all SHO level doctors to take part in the general take. During the general take they work with a Physician of the day (POD), a specialist registrar, SHOs and an F1 to ensure the admission assessment, senior review and management planning of all patients referred to the department either from General Practice or Emergency Medicine.  Foundation Doctors are expected to assess, formulate a diagnosis and present to the POD for immediate feedback and evaluation. When not part of the on call team Foundation Teams are expected to work on their ward and take ownership for any patients transferred to the ward from EAU. They are responsible for the day to day care presenting patients on ward rounds to consultants, ensuring proper communication with general practice and relatives. They also monitor the work of the F1 including supporting their development, ensuring the accuracy of their assessments and their completion of summaries of care for primary care. |
|   | Further learning opportunities include –  |

| Trainee Information System (TIS) Post Code (and local post number if known) Placement details (i.e. the specialty and sub-specialty) Department | 24/LDN/RJZ30/F2/001 24/LDN/RJZ30/F2/014 24/LDN/RJZ30/F2/023 Intensive Care Unit  The critical care unit is a 10 bedded unit, consisting of   |
|   | both HDU & ITU beds. It offers multi-organ support, including inotropes, non-invasive and invasive mechanical ventilation, haemofiltration and advanced cardiac monitoring. It admits around 600-700 adult (≥16 years) patients a year, around 60% of whom require level 3 care. The unit is run by consultant intensivists from King's Critical Care  |
| Type of work to expect and learning opportunities   | The placement will be spent on the intensive care unit, working with the ITU team, caring for critically ill patients throughout the hospital but mainly in the intensive care unit. There is the opportunity to spend time with our outreach team (iMobile) to gain more experience of the deteriorating patients.  Key learning objectives include assessing patients at risk of becoming critically ill and using simple measures to prevent further physiological deterioration, assessing critically ill patients and managing abnormal physiology in an ITU setting, basic understanding of mechanical ventilation and haemofiltration, fluid management and the use of inotropes and vasoconstrictors to manipulate the circulation in conjunction with advanced cardiac monitoring. The safe prescribing and monitoring of drugs, understanding the importance of adequate nutrition in the critically ill patient, appropriate end-of-life care including the opportunity for organ donation and working in a multidisciplinary team. There will also be ample opportunity to place invasive monitoring lines, vascaths and possibly percutaneous tracheostomies, using ultrasound where appropriate. You will be expected to work closely with the critical care outreach team.  There is a critical care follow up clinic each month that you can arrange to attend to help understand the impact that critical care admission has on people's lives. |

| Department  | Stroke Medicine (Stroke Unit)  |
| Type of work to expect and                        | KCH has a two site stroke service and at the PRUH  |
| Type of work to expect and learning opportunities | there is both a Hyperacute Stroke Unit (HASU), one of  |
| learning opportunities                            | 8 in London, and an Acute Stroke Unit (HASO), one of   |
|   | stroke service comprises a team of stroke physicians   |
|   | and stroke neurologists, some based fully at PRUH  |
|   | and others rotating between King's Denmark Hill and  |
|   | King's PRUH. The stroke consultants rotate to share  |
|   | cover for the HASU and the stroke on call rota, as well  |
|   | as seeing any stroke outliers, doing clinics and sharing   |
|   | in the management of the daily TIA clinic. The GIM-  |
|   | trained physicians of the group also cover the 26  |
|   | bedded SU.   |
|   | This post is based primarily on the Stroke Unit and will   |
|   | enable plenty of experience caring for acute and   |
|   | rehabilitating stroke patients and some stroke mimics.   |
|   | There is excellent exposure to multi-disciplinary team   |
|   | working including complex discharge-planning as well   |
|   | as managing many common medical problems   |
|   | affecting acute and subacute stroke patients. Learning opportunities include neuroradiology learning and |
|   | multi-disciplinary team (MDT) teaching sessions.   |
|   | Weekly teaching sessions are also provided in geriatric  |
|   | medicine. There may also be the opportunity to assist  |
|   | in the care of patients on the HASU.   |
| Where the placement is based                      | In-patient work at PRUH Stroke Unit.   |

|                              | disciplinary team (Psychologists, Occupational Therapists,  |
|                              | Psychiatric nurses and Pharmacists) and manage patients with  |
|                              | complex psychiatric presentations. This will enable the trainee   |
|                              | to gain a better insight into the management of chronic   |
|                              | conditions. The trainee will acquire a number of transferrable  |
|                              | skills such as learning about multi-agency working/   |
|                              | collaboration and the role of carers/family in the management   |
|                              | of patients with chronic conditions.  |
| Where the placement is       | The employer  |
| based                        | Oxleas NHS Foundation Trust was formed in April 1995 and is a provider of Community and Hospital Mental Health and Learning Disability Services for Greenwich, Bexley and Bromley. It is a specialist provider of Forensic and Challenging Behaviour  |
|                              | services for Bexley, Greenwich, Lewisham, North Southwark, Bromley and Kent Prisons. Since 2010, Oxleas also provides a range of physical health services to adults and children in the community in the boroughs of Bexley and Greenwich. These range from health visitors and community midwives working with the very young, to district nurses and therapists meeting the physical health needs of older people.  |
|                              | The Trust has a national reputation for innovation and excellence. It became one of the country's first mental health foundation trusts in May 2006. Since then it has maintained consistently high ratings for quality and financial management from Monitor and CQC. It has won many awards for the quality of its management and clinical services, including the prestigious HSJ Best Mental health trust in 2011 and the Royal College of Psychiatrists' 2009 "Provider of the Year" award.  Oxleas has been at the forefront of IT developments, New Ways |
|                              | of Working for Psychiatrists, NICE Guidelines implementation and POMH-UK audits. It was the first Mental Health Trust in London to fully implement RiO (electronic patient records) as part of The London Programme for IT.   |

STFS is a collaboration between HE Kent, Surrey & Sussex, HE South London, Brighton & Sussex Medical School, King's College London School of Medicine & St George's University of London

Page 33 of 340

Oxleas NHS Trust is divided into six directorates as follows:

- Complex Adult Mental Health and Learning Disability Services
- Adult Acute Mental Health Services
- Older People's Mental Health Services
- Forensic and Prison Services
- Adult Community Health Services
- Children and Young People's Services

#### The Older People Mental Health Directorate

The Older People Mental Health Directorate forms part of the broader Trust and provides planned and integrated whole system service and care that is delivered in conjunction with in-patient, crisis and specialist community services. The Directorate serves the older adult population of the London Boroughs of Bromley, Bexley and Greenwich.

The Directorate, which is divided into Acute/Inpatient and Community sectors, is led by the Service Director. There is a Clinical Director for the Directorate and there are two Service Managers for each sector of the directorate. Within each sector, there are different teams that are managed by individual team managers.

#### The Service/team

The Older People's Mental Health Service has just undergone a reconfiguration of their community services. Bridgeways Day Hospital is based in the centre of the borough and provides an intensive day therapy services to the older adult age group. It is an alternative to hospital based treatment and promotes healthy aging. It uses the Recovery model as its template.

It has key relationships with other directorates in the Trust, Bromley Social Services department and 3<sup>rd</sup> sector and local voluntary agencies.

### Clinical supervisor(s) for the placement

#### Clinical Supervision

The clinical supervisor Dr Karen Yeung has the main responsibility for monitoring, supporting and assessing day to day the clinical and professional work of the trainee; there will be a minimum of 1 hour/week supervision with the named clinical supervisor. As a trainee who is new to psychiatry, it is mandatory for the post-holder to discuss all patient management decisions, prior to their being enacted. The name of the clinical supervisor and the advice given must be clearly documented in the patient's clinical record.

#### **Educational Supervision**

An educational supervisor will be allocated to you via the Foundation School. You will be encouraged and supported to attend regular meetings with him/her. There is also a Foundation Trainee Tutor in Oxleas and you will have the opportunity to meet with him at the beginning and end of the placement to review learning objectives and reflect on the placement. During the placement the Foundation Tutor can be contacted at any time to ask questions, reflect on learning objectives and to provide pastoral support.

STFS is a collaboration between HE Kent, Surrey & Sussex, HE South London, Brighton & Sussex Medical School, King's College London School of Medicine & St George's University of London

#### Main duties of the The trainee's main responsibilities will be to interview and assess patients admitted to the day therapy service. This includes a full placement psychiatric history, mental state examination and physical examination in preparation for MDT meetings. There will also be the opportunity of co-facilitating a group within the service. The trainee will undertake reviews of patients' mental state on a weekly basis. The trainee will also carry out community visits with other members of the MDT for patients who need out-reach services. The trainee will attend an in-patient ward round once a week and have a small number of patients which they will be expected to discuss in the ward round. The trainee will assess a patient with memory problems once a week as part of the memory service. Typical working pattern in Trainee's timetable this placement (e.g. ward NB. During the week on standard days there is no visits of clinics. patients in hospital. It is all community. rounds. theatre sessions) Typical weekly timetable: Mon AM & PM = home visits, MDT 12:30-2:30pm Tues AM & PM = home visit, group reflection 1-2pm, supervision 2-3pm. Wednesday = F2 teaching 12:00-13:00, PM = home visits/audit/QIP Thurs AM & PM = home visits, MDT 12:30-2:30pm Friday AM & PM = memory clinic all day (this is done with Bromley Memory Service in Bromley at Bridgeways day hospital), with psych teaching 1-3pm alternate weeks - F2s now do oncalls at Oxleas House, QEH, Woolwich. On-call commitment: ~1 long day per 8 days from 17:00-21:00 after normal clinic day (both day services allow F2 to leave early to arrive in time) ~ 1 weekend day (Sat or Sun) 09:00-21:00 per month 14 total night shifts over 4 month period split into weekend night cover (Fri- Sun) x2 and weeknights cover x2 (Mon – Thurs) Local education provider King's College Hospital is a large Teaching (LEP) / employer Hospital and NHS Foundation Trust situated in information South Central London. It provides healthcare for residents of a densely populated surrounding locality, as well as many tertiary services for South-East England and beyond.

STFS is a collaboration between HE Kent, Surrey & Sussex, HE South London, Brighton & Sussex Medical School, King's College London School of Medicine & St George's University of London

| Placement details (i.e. the specialty and sub-specialty)                    | Oxleas NHS Foundation Trust Bromley Acute Inpatient Unit – Older Adults Base: Scadbury Ward, Green Parks House  |
| Department  | Oxleas NHS Foundation Trust Oxleas NHS Trust was formed in 1995 by the amalgamation of Greenwich Healthcare Trust psychiatric services and Bexley Community Health. In April 1997, Bromley's mental health services joined Oxleas. Oxleas NHS Foundation Trust is now the provider of general mental health and learning disability services for Bromley, Bexley and Greenwich, and a specialist provider of Forensic and Challenging Behaviour services for Bexley, Greenwich, Lewisham, North Southwark and Bromley. The Trust is therefore a specialist mental health and learning disability trust. The Trust provides a service to a total population of around 735,000 excluding Lewisham and North Southwark. The Trust was rated a 3 star organisation for 3 consecutive years and became one of the country's first mental health foundation trusts in May 2006. Oxleas has been at the forefront of IT developments, New Ways of Working for the Psychiatrists and NICE Guidelines implementation. It is the first Mental Health Trust in London to fully implement RiO as part of London Programme for IT. Oxleas received national recognition as 'RCPsych Mental Health Service Provider of the Year 2009' awarded by The Royal College of Psychiatrists and the CQC rated its services as a five in 2009. |
| Type of work to expect and learning opportunities                           | Trusts four must do priorities These are based directly on the feedback from service users and carers:  Support families and carers  Provide information for service users and carers  Improve care planning Improve relationships with service users and carers  Five critical priorities for the year  Promote clinical quality Promote social inclusion To increase service users' opportunities for employment (paid and unpaid), training, education and community participation Increase access to psychological therapies  Establish common care pathways across the trust   |

To put in place a more standardised service and link together clinical quality, service outcomes and finance

Community provider services

Work with local commissioners regarding future provision of community health services such as district nursing, health visiting and therapies

#### Professional relationships

Each team is led by a Consultant who is also the Educational Supervisor for the trainee psychiatrist. Each team also have their own clinical lead.

The training opportunities available through different multidisciplinary teams in Bromley are in the areas of Liaison & Intake Team (LIT), Short-term Intervention Team (SIT), Recovery East and West Teams, Assertive Community Team (ACT) and rehab service in the community. The inpatient service comprises of acute inpatient units for working age adults, functional and organic disorders for older adults, low secure unit and a rehab ward.

#### Induction

At the beginning of the placement you will take part in an induction programme. Induction will introduce you to the organisation if you have not worked at the Trust before. You will also be introduced to the workplace and informed of the requirements of the post, including the nature of your 'out of hours' commitment. You also will have an educational induction with your trainer that will help you write your individual learning plan for the placement.

### Where the placement is based

Scadbury Ward, Green Parks House

### Clinical supervisor(s) for the placement

Clinical Supervision is provided by Dr Surya Goudaman who is a Consultant in Old Age Psychiatry and who is present on the ward most days of the week (see timetable) and who has an SpR attending the ward rounds twice weekly and who deputises in her absence. Clinical supervision can be provided by other Bromley consultants as may be appropriate on occasions. From time to time it may be appropriate for the post holder to receive clinical supervision from non-medical members, for example, in providing psychotherapy.

The clinical supervisor has the main responsibility for monitoring, supporting and assessing day to day the clinical and professional work of the trainee; there will be a minimum of 1 hour/week supervision with the named clinical supervisor. As a trainee who is new to psychiatry, it is mandatory for the post-holder to discuss all patient management decisions, prior to their being enacted. The name of the clinical supervisor and the advice given must be clearly documented in the patient's clinical record.

During out of hours duties, clinical supervision will be available via the on-call higher trainee/SpR and the on-call consultant. Educational Supervision

An educational supervisor will be allocated to you via the Foundation School. You will be encouraged and supported to attend regular meetings with him/her. There is also a Foundation Trainee Tutor in Oxleas and you will have the

opportunity to meet with him at the beginning and end of the placement to review learning objectives and reflect on the placement. During the placement the Foundation Tutor can be contacted at any time to ask questions, reflect on learning objectives and to provide pastoral support.

## Main duties of the placement

The duties of the post, performance criteria and the learning opportunities available are set out following the structure of the Psychiatry Specialty Curriculum (as approved by PMETB, 2006), which in turn, is based on the headings of the GMC's Good Medical Practice.

Providing a good standard of practice and care

Undertake clinical assessment of patients with mental health problems

The F2 post is allocated to full-time in-patient duties serving Scadbury Ward at Green Parks House. A GPVTS doctor is also allocated to these same duties for 8 sessions a week and therefore these 2 trainees are expected to act as a pair to ensure safe cover especially during periods of leave or on-call. Scadbury ward is a 23 bed ward for older adults over the age of 65 years who have a functional mental illness (ie. depressions, psychotic illness or severe anxiety states).

Occasionally we are required to assess older adults with memory problems and substance abuse problems.

The ward doctors are expected to maintain accurate patient records and produce discharge summaries of all patients in a timely manner.

The F2 is released for their Wednesday teaching session and Tuesdays and Fridays are for ward work with encouragement to attend the Grand Medical Round in the Postgraduate Centre every Friday from 1 to 2pm.

Training in communication and interview skills as appropriate to the practice of psychiatry is available and will be tailored to the needs of the post holder.

You will maintain accurate, legible, contemporaneous and useful clinical records for all patients in whose care you are involved.

2. Decisions about access to care

Use the results of the clinical assessment to ensure effective patient management

Under the supervision of a clinical supervisor, you will prescribe pharmacological and psychosocial treatments for the patients that you are working with. You will refer them promptly to other professionals as directed by your clinical supervisors.

3. Treatment in emergencies

Manage emergencies

You will see patients who require urgent psychiatric assessment when you are on call.

There is a daily on call duty doctor that deals with emergencies between 9am-9pm. You are not expected to carry a bleep or do out of hours on-calls.

4. Maintaining good medical practice

STFS is a collaboration between HE Kent, Surrey & Sussex, HE South London, Brighton & Sussex Medical School, King's College London School of Medicine & St George's University of London

Maintain and use systems to update knowledge and its application to any aspect of your professional practice

During the placement you will follow the Foundation Training Programme and maintain an up-to-date learning portfolio that you will bring to meetings with the trainer when asked to do so. As a minimum, this will be at the beginning, mid-term and the end of the placement.

Opportunities are provided to attend basic psychiatry training for new starters in the first few weeks of appointment.

5. Maintaining performance

Monitor and maintain professional performance

You will participate fully in the workplace-based assessment programme of the Foundation Training Programme and will use the feedback that you receive from this process to inform your critical self-awareness. You will discuss every item of assessment with your trainer.

You will undertake one audit project during the four months under the direction of your trainer.

All trainees are expected to satisfactorily complete competency assessments while in post. Trainees must note that the completion of these assessments is the responsibility of the trainee and the initiation of discussions and assessments is their responsibility. Ownership of the records is theirs and the process will be overseen by both the postgraduate department of Oxleas trust as well as the deanery program director.

6. Teaching and training, appraising and assessing Plan, deliver, and evaluate teaching and learning in a variety of environments

You may participate in the teaching of medical students attached to the unit, as appropriate. This will include assisting the 'bedside' teaching of junior and senior students by helping identify and consent suitable patients for the students to see and by helping the students develop their clinical skills by giving them opportunities to present and discuss the patients they have seen. You may also have the opportunity to be involved in small group teaching and lecturing to clinical medical students under the supervision of senior colleagues.

Assess, appraise and evaluate learning and learners

You will evaluate your own learning and progress, using self-assessment forms that you may retain in your learning portfolio. You will participate in the assessment of others, including clinical medical students and colleagues using multi-source feedback tools.

7. Relationships with patients

Conduct professional patient relationships

Whenever possible, you will obtain informed consent from patients for whom you provide treatment.

You will observe patient confidentiality at all times. When guided by your clinical supervisors, you should share information appropriately with colleagues. Whenever possible, and especially towards the end of the placement, you will inform your patients of the ending of your relationship with them in a timely manner.

8. Dealing with problems in professional practice Conduct or performance of colleagues

If you become aware of problems with the conduct or performance of a colleague, you must bring this to the attention of a senior colleague.

Complaints and formal inquiries

You must always cooperate fully with any complaints procedure or formal inquiry

Providing assistance at inquiries and inquests

You must always cooperate fully with any formal inquiry or inquest into a patient's death.

Indemnity insurance

Early in the placement, you must discuss the provisions of the NHS indemnity insurance with your trainer.

9. Working with colleagues

Continuously promote value based non prejudicial practice You must maintain a legal, ethical and fair approach toward working with colleagues and respect diversity.

Work effectively as a member and a leader of multidisciplinary team

Demonstrate appropriate leadership

During this placement you will be a full member of the multidisciplinary team (MDT) and will attend its weekly meeting. You will discuss your experience of the MDT in meetings with your trainer.

You will cross cover for other core training post/s in the Service from time to time as required.

Communicate effectively with other healthcare professionals You will keep clear, accurate and contemporaneous clinical records. You will send regular written reports on patients to general practitioners and other professionals involved in patient care.

Appropriately assume, delegate and devolve responsibility Access advice, assistance and second opinion when delegating and making referrals

Your trainer and clinical supervisors will give you guidance as to the level of responsibility you should assume in individual clinical situations. If you are unsure, you must always obtain advice and assistance

10. Maintaining probity

Ensure that reports, evidence and documents you have a responsibility for are complete, honest and accurate.

Your written reports will use the standard report format and will be sent as follows: Out-patient letters within two weeks of the consultation; brief discharge notifications within the same working day of a patient's discharge and full discharge summaries within two weeks of discharge. You will be expected to complete formulation summary in the core assessment folder for every patient that has been discharged under your care. They will be signed. Until instructed otherwise, all reports that you write must be checked by one of your clinical supervisors before being sent out. You will not provide any other written reports about patients, unless this has been sanctioned by one of your clinical supervisors. Properly manage financial and commercial dealings

You must report receiving any gift from patients with your trainer and you must not solicit any fee or payment from a patient or third party unless your trainer has sanctioned this.

You will not meet with any representatives of the pharmaceutical industry during work time, unless this is at a postgraduate meeting that has been organised within ABPI Guidelines.

Avoid conflicts of interest and advise others on preventing and dealing with conflicts of interest

Inform your trainer of any real or potential conflict of interest you may have.

#### 11. Health

Ensure that your health and the health of others does not put patients at risk

You must always obtain advice and treatment for mental and physical health problems and must ensure that your health does not put patients at risk. You must comply with the Trust's occupational health policy.

#### 12. Confidentiality

The Post holder must maintain the confidentiality of information about patients, staff and other health service business in accordance with Trust Policy.

#### 13. Risk Management

The Post holder will ensure compliance with the Trust's risk management policies and procedures. These describe the Trust's commitment to risk management, the recognition that our aim is to protect patients, staff and visitors from harm and stress and that all staff have a responsibility to minimise risk.

#### 14. Infection Control

All staff are required to be familiar with the Trusts infection control policies, and national guidance in relation to infection control. All staff whose normal duties are directly or indirectly concerned with patient care must ensure that they complete mandatory infection control training and are compliant with all measures known to be effective in reducing Healthcare Associated Infections.

#### 15. Equality, Diversity and Human Rights

The Post holder will treat all colleagues, service users, carers and members of the public with respect and dignity regardless of their gender, age, race, colour, religious beliefs, religion, nationality, ethnic origin, social background, sexual orientation, marital status, disability, real or suspected HIV/Aids status, criminal background and Trade Union status. The Trust has a Policy for Equality and Human Rights and it is the responsibility of all staff to ensure that this is implemented.

#### 16. Health & Safety

All staff must be aware of the responsibility placed on them by the Health & Safety at Work Act (1974) to ensure that the agreed safety procedures are carried out to maintain a safe condition for employees, patients and visitors.

#### 17. Professional and NHS Codes of Conduct

You are required to act at all times in accordance with the relevant professional Codes of Conduct and Accountability (including, where applicable, those for Board Members). In addition, all management staff must comply with the 'Code of Conduct for NHS Managers' and 'Standards of Business Conduct for NHS Staff'.

18. Safeguarding Children

| and sub-specialty)                                | Emergency Department (ED)  |
| Department  | There are 12 wte EM Consultants providing shopfloor coverage 0800 – 2400hrs 7 days a week.  There are also 12 senior registrar grade doctors working various shift patterns, including night shifts, a further 4 senior specialty doctors who work a variety of shifts but not nights. In addition there are junior registrar, ST1-2 and ACP tiers covering 24/7.  In conjunction with the Urgent Care Centre, the Emergency Department at the Princess Royal University Hospital sees approximately 105,000 |
|   | patients per year.  Special ED interests include: Severe Sepsis Care, Hyper-Acute Stroke Management, Bedside Ultrasound, Trauma (as a trauma unit within the trauma network), Simulation, Elderly Care and Event Medicine.   |
|   | The department has 4 fully equipped Blue Resuscitation bays, 2 Red Resuscitation bays, 19 Majors cubicles, 4 bay Sub-acute assessment area and 7 Paediatric cubicles (including a dedicated paediatric HDU/resus cubicle).   |
|   | The Emergency Department also has: a dedicated CDU (observation ward) for head injury management, toxicology, epilepsy, and other short period observational cases; a rapid assessment area; a separate mental health assessment unit plus a dedicated ED mental health room.  |
| Type of work to expect and learning opportunities | Core work is assessing all types of undifferentiated emergency patients presenting to the ED with access to senior advice, supervision and teaching 24/7.  |
|   | The range of problems managed covers the breadth of emergency medicine with a large proportion of the workload being acute medical, general surgical and paediatric emergencies.   |

| <b>Placement details</b> (i.e. the specialty and sub-specialty) | General Practice  |
| Department  | F2s are placed in a GP Surgery within Southeast London. The size of the surgeries may vary but are all approved for training F2 trainees. They have a GP clinical supervisor based in the practice where they work.   |
| Type of work to expect and learning opportunities               | After an initial induction and orientation period in the GP Practice the F2 will have a weekly timetable which will include surgeries where they will see a variety of cases, both routine and emergency. In addition, there may be opportunities to observe GPs and other clinical staff consulting, attend patients in their homes and in care-homes, attend chronic disease clinics e.g. diabetes and asthma, and get involved with shadowing other community services e.g. pharmacists, palliative care teams. As well as learning from their own clinical work, they will have opportunities to get feedback from observed consultations from their supervisor, individual teaching from GPs within the Practice, as well as involvement in other educational activities within the Practice. There may be opportunities to teach other learners in the Practice and perform audits in the community setting. They will continue to attend the teaching programme at the PRUH. |
| Where the placement is based                                    | GP Surgery based in Southeast London.   |
| Clinical supervisor(s) for the placement                        | The Clinical Supervisor will be located at the GP surgery where trainee is based.  IT is expected that FY2 trainees always have an available named GP Supervisor for every clinical session that they undertake in the GP practice, and that they will have the opportunity to discuss all their patients with their supervisor on the same day   |

| Trainee Information System (TIS) Post Code (and local post number if known)  Placement details (i.e. the specialty and sub-specialty)  Department | 24/LDN/RJZ30/F2/029 24/LDN/RJZ30/F2/025 24/LDN/RJZ30/F2/026  General Practice  F2s are placed in a GP Surgery within Southeast London. The size of the surgeries may vary but are all approved for training F2 trainees. They have a GP clinical supervisor based in the practice where they work.  |
| Type of work to expect and learning opportunities  Where the placement is based   | After an initial induction and orientation period in the GP Practice the F2 will have a weekly timetable which will include surgeries where they will see a variety of cases, both routine and emergency. In addition, there may be opportunities to observe GPs and other clinical staff consulting, attend patients in their homes and in care-homes, attend chronic disease clinics e.g. diabetes and asthma, and get involved with shadowing other community services e.g. pharmacists, palliative care teams. As well as learning from their own clinical work, they will have opportunities to get feedback from observed consultations from their supervisor, individual teaching from GPs within the Practice, as well as involvement in other educational activities within the Practice. There may be opportunities to teach other learners in the Practice and perform audits in the community setting. They will continue to attend the teaching programme at the PRUH. |
| where the placement is based  | GP Surgery based in Southeast London.   |
| Clinical supervisor(s) for the placement  | The Clinical Supervisor will be located at the GP surgery where trainee is based.  IT is expected that FY2 trainees always have an available named GP Supervisor for every clinical session that they undertake in the GP practice, and that they will have the opportunity to discuss all their patients with their supervisor on the same day   |
| Main duties of the placement  | Daily surgeries including prescribing and referrals when appropriate. Dealing with investigations/results relating to patients F2 trainee has seen. Managing follow-up for patients when indicated.   |

| Placement details (i.e. the specialty and sub-specialty)                    | General surgery – F2  |  |  |
| Department  | Surgery   |  |  |
| Type of work to expect and learning opportunities                           | Mostly in-patient work with plenty of experience caring both for patients with acute surgical problems (operative and non-operative) and elective post op patients with chronic/known indications for surgery.  Occasionally medical issues may be picked up and it may be necessary to organise further investigations. At any stage of the patient journey, there is an excellent exposure to multi-disciplinary team working. This may continue even after a patient is discharged e.g. liaising with the early discharge nurses.  One learns how to manage common peri-op complications and gains further broad experience in acute and general surgery when on call. There will be many opportunities to do practical procedures on the ward and in theatre. Learning opportunities include surgery specific Teaching on Fridays, FY2 teaching sessions on Wednesday, monthly mortality and morbidity meetings and bedside teaching during ward rounds especially on post take. There may also be the opportunity to observe/ assist in theatre and outpatient clinic. |  |  |
|   | Further learning opportunities include: Clinics and theatres – see patients in clinic under supervision and opportunities to learn operative procedures. On-call commitment includes assessment of acutely ill surgical patient, clerking and management. Breaking bad news. Communication links with patient and relatives. Liaison with other specialities. Discussing images with Radiologist and appropriate investigations.  |  |  |
| Where the placement is based  | Princess Royal University Hospital; Surgical ward 3, 4, 5, 6, SAU. And outlier patients in medical wards.   |  |  |
| Clinical supervisor(s) for the placement                                    | Mr Al Chalabi, Mr Kostadinov, Mr El-Hasani, Mr Ypsilantis, Ms Scarpinata and Mr Doddi.  |  |  |

| Main duties of the placement   | Working as one of the surgical team managing inpatients on S3-6. Working as part of the multidisciplinary team to aid recovery and rehabilitation, and to facilitate safe and timely discharge and follow-up with written communication to primary care or other specialties on discharge. Supporting the FY1 doctor.  Acute care of patients on take as part of on call team headed by a consultant with appropriate communication and handover of care. Can be part of the admitting or ward cover team when on call.  The doctor will be responsible for such other specific clinical duties as allocated by consultants including performing other duties in occasional emergencies and unforeseen circumstances.  This includes things like ordering and chasing investigations, checking the results and updating patient lists. |
|--|--|
| Typical working pattern in this placement(e.g. ward rounds, clinics, theatre sessions) | Typical working pattern in this post: 8am to 5pm week days One afternoon off per week for private learning and e- portfolio; subject to agreement with team and adequate F1 cover. Max 13 hour shifts when on call either with general surgery ward cover team on the weekends (8am -5pm) and evenings (5-9pm) or with surgery admitting team on weekday evenings or urology team on weekends (8am – 9pm).  F2 will have a ward round each day with the Higher Grade/Consultant.   |
|  | Team timetable Mon: Ward round. Day surgery unit alternate weeks/ Surgical clinic weekly Tues: Ward round, ward work. Wed: Ward round, FY2 teaching, ward work Thurs: Ward round, ward work Fri: Consultant ward rounds, grand round, ward work  |
|  | On call requirements: 1 in 7 weekends, Generally, 1 weekday evening on call  Nights – 16-week rotation. 3 nights Monday-Thursday or Friday-Sunday.   |

| Department   | The department includes four Older Medicine wards including Acute Geriatrics/Frailty, Orthogeriatric and the Darwin Unit which looks after patients requiring a longer hospital stay. There is a newly opened Frailty Unit for urgent day assessments of older patients. There is a separate HASU and stroke rehabilitation ward.  There are specialist clinics for falls and movement disorders. There are also links to the intermediate care facilities (rehabilitation).   |
| Type of work to expect and learning opportunities  | When working a Standard day – Teams are expected to work on their ward and take ownership for any patients transferred to the ward from AMU. They are responsible for the day to day care presenting patients on ward rounds to consultants and ensuring proper communication with other health professionals, general practice and relatives. They also monitor the work of the F1 including supporting their development, ensuring the accuracy of their assessments and their completion of summaries of care for primary care.  When working on Orthogeriatric ward – For the Orthogeriatric ward the FY2 will be expected to ensure patients are optimised for theatre. The Orthogeriactric |
|  | Consultant provides daily supervision.  When On-call - The F2's join a rota with all SHO level doctors to take part in the general Acute Medical take. During the general take they work with a Physician of the day (POD), a specialist registrar, SHOs and an F1 to ensure the admission assessment, senior review and management planning of all patients referred to the department either from General Practice or Emergency Medicine. The FY2 on-call will also be on the cardiac arrest team.   |

| and sub-specialty)                                | element within Palliative Care  |
| Department  | Stroke Medicine   |
| Type of work to expect and learning opportunities | KCH has a two site stroke service and at the PRUH there is both a Hyperacute Stroke Unit (HASU), one of 8 in London, and an Acute Stroke Unit (SU). The stroke service comprises a team of stroke physicians and stroke neurologists, some based fully at PRUH and others rotating between King's Denmark Hill and King's PRUH. The stroke consultants rotate to share cover for the HASU and the stroke on call rota, as well as seeing any stroke outliers, doing clinics and sharing   |
|   | in the management of the daily TIA clinic. The GIM-trained physicians of the group also cover the 26 bedded SU.  This post is based across the two units and will enable plenty of experience caring both for hyperacute, acute and rehabilitating stroke patients and some stroke mimics. There is excellent exposure to multidisciplinary team working as well as many common medical problems affecting acute and subacute stroke patients. Learning opportunities include neuroradiology learning and multi-disciplinary team (MDT) teaching sessions. Weekly teaching sessions are also provided in geriatric medicine. There may also be the opportunity to assist in the assessment of patients in the TIA clinic. |
| Where the placement is based                      | In-patient work at PRUH between both HASU and SU (co-located units), split roughly with 2 months of each with some cross cover as needed on occasion. Community experience will be provided in conjunction with the palliative care team based from St Christopher's Hospice.   |
| Clinical supervisor(s) for the placement          | Dr Debbie Ramsey and the PRUH-based stroke Consultants.   |
| Main duties of the placement                      | Working as one of the medical team managing inpatients on the HASU or SU, with guidance from senior colleagues. Working as part of the multidisciplinary team to confirm diagnosis, investigate for various aetiologies, manage complications, aid recovery and rehabilitation, and to facilitate safe and timely repatriation to other hospitals for ongoing rehabilitation, or hospital discharge and follow-up with written communication to primary care or other receiving   |

|   | stroke units. Recognition of limitations of experience in management and prescribing as an FY1 and ability to seek support from more experienced colleagues. Some involvement in clerking of hyperacute stroke patients, as well as experience of general medical on call ward cover and HASU on call and ward cover.  |
|---|--|
| Typical working pattern in this placement (e.g. ward rounds, clinics, theatre sessions) | SU  - Consultant ward rounds daily, either full or partial; as well as some ward rounds by Registrar, SHO or F1  - Daily MDT board round and weekly full MDM  - Weekly F1 teaching  - Weekly Stroke academic teaching  - Weekly Elderly Care Journal Club  HASU  - Full daily Consultant ward rounds  - Daily MDT board round  - Weekly F1 teaching  - Weekly Stroke academic teaching  - Weekly Stroke academic teaching  - Weekly Elderly Care Journal Club  On call ward cover – as per GIM rota or stroke rota.  Palliative care community attachment. |
| Local education provider (LEP) / employer information                                   | King's College Hospital is a large Teaching Hospital and NHS Foundation Trust situated in South Central London. It provides healthcare for residents of a densely populated surrounding locality, as well as many tertiary services for South-East England and beyond.   |

| Department  | Surgery   |
| Type of work to expect and learning opportunities | Mostly in-patient work with plenty of experience caring both for patients with acute surgical problems (operative and non-operative) and elective post op patients with chronic/known indications for surgery. Occasionally medical issues may be picked up and it may be necessary to organise further investigations. At any stage of the patient journey, there is an excellent exposure to multi-disciplinary team working. This may continue even after a patient is discharged e.g. liaising  |
|   | with the early discharge nurses.  One learns how to manage common peri-op complications and gains further broad experience in acute and general surgery when on call. There will be many opportunities to do practical procedures on the ward and in theatre. Learning opportunities include surgery specific Teaching on Fridays, FY1 teaching sessions on Tuesday, monthly mortality and morbidity meetings and bedside teaching during ward rounds especially on post take. There may also be the opportunity to observe/ assist in theatre and outpatient clinic. |
|   | Further learning opportunities include: On-call commitment includes assessment of acutely ill surgical patient, clerking and management. Breaking bad news. Communication links with patient and relatives. Liaison with other specialities. Discussing images with Radiologist and appropriate investigations.   |

| Placement details (i.e. the specialty             | Cardiology – F1   |
| and sub-specialty)                                |   |
| Department  | Patients are triaged from the AMU to the wards according to specialty need.   |
|   | Cardiology has 8 Consultants, 3 Specialist Registrars, 4 "SHO" level doctors (Core Medicine, Foundation Year 2, ACCS or Vocational Training) and 2 Foundation Year 1 Doctors.   |
|   | Discharges from Acute Medicine are supported by post-acute care and intermediate care resources. There is a good working relationship with social services and each ward has a ward based social care officer.  |
|   | The Department holds a weekly Grand Round.  |
| Type of work to expect and learning opportunities | The F1's join a rota with all SHO level doctors to take part in the general take. During the general take they work with a Physician of the day (POD), a specialist registrar, 2 SHO's and an F2 to ensure the admission assessment, senior review and management planning of all patients referred to the department either from General Practice or Emergency Medicine.  Foundation Doctors are expected to assess, formulate a diagnosis and present to the POD for immediate feedback and evaluations. When not concentrating with the on call team Foundation Teams are expected to work on their ward and take ownership for any patients transferred to the ward from AMU. They are responsible for the day to day care presenting patients on ward rounds to consultants, ensuring proper communication with general practice and relatives. The Consultants also monitor the work of the F1 including supporting their development, ensuring the accuracy of their assessments and their completion of summaries of care for primary care.  A teaching meeting is held Monday lunchtimes. Trainees have the opportunity to present and have assessments for teaching observation. There is an opportunity to attend the cardiac catheter lab and the clinical measurements department. |

| Department  | Patients are triaged from the AMU to the wards   |
|   | according to specialty need.   |
|   | Ward based team consists of 7 Consultants, 2 Specialist Registrars, 2 "SHO" level doctors (Core Medicine, Foundation Year 2, ACCS or Vocational Training) and 2 Foundation Year 1 Doctors.  Discharges from Acute Medicine are supported by a post-acute care and intermediate care resources. There is a good working relationship with social  |
|   | There is a good working relationship with social services and each ward has a ward based social care officer. There is a designated Ward manager and Matron M6.  |
| Type of work to expect and learning opportunities | The F1's join a rota with all SHO level doctors to take part in the general take. During the general take they work with a Physician of the day (POD), a specialist registrar, 2 SHO's and an F1 to ensure the admission assessment, senior review and management planning of all patients referred to the department either from General Practice or Emergency Medicine or the Ambulatory clinic.   |
|   | Foundation Doctors are expected to assess, formulate a diagnosis and present to the POD for immediate feedback and evaluations. When not part of the on call team Foundation Teams are expected to work on their speciality ward and work with their team for any patients transferred to the ward from AMU. They are responsible for the day to day care presenting patients on ward rounds to consultants, ordering investigations, reviewing results and ensuring proper communication with general practice and relatives. |

|   | per week Monday.   |
| Department  | This is an Acute Medical Unit in a busy District General Hospital which typically sees 50-60 medical patients admitted over 24 hours. There are 8 acute physicians working on AMU. AMU is a Consultant delivered service and multiple Consultant led ward rounds take place daily.  The unit is supported by an experienced multidisciplinary team and multi-disciplinary meetings occur twice daily.  The unit is also supported by daily specialty in-reach from Cardiology, Respiratory, Gastroenterology and other teams.  |
|   | other teams.   |
| Type of work to expect and learning opportunities | AMU Consultants work as a large team of F1's, 5 SHO's from Core Medicine, Vocational Training and ACCS programs, and specialist registrars in Rheumatology and Endocrine Medicine.  The Trainee is expected to assess patients, formulate plans and present to seniors. They are responsible for medical tasks generated from take rounds, completions of summaries of care and ensuring communication with relatives. Average length of stay is 48 hours, and work is intense with a small number of patients.  There are ample learning opportunities for the assessment and management of acutely sick patients, to formulate plans and to work directly with seniors to enable timely discharge.  There is a teaching programme on AMU providing sessions twice weekly with lunch provided. In addition, |
| Where the placement is based                      | F1 specific teaching and Grand round sessions are provided in the Education centre weekly.  Princess Royal University Hospital, in the Acute   |

| Placement details (i.e. the specialty | Emergency Medicine – FY1  |
| and sub-specialty)                    | Emergency Department (ED)   |
| Department                            | The post will be primarily responsible for the Clinical Decision Unit consultant ward round in the morning. Once any jobs from the morning ward round have been completed, there will be exposure to the RAT, Majors, Subacute, Resuscitation and Paediatric areas with consultant supervision and senior doctor physical review of all patients. It is envisaged that these will be 8-16 Monday to Friday posts (subject to contract and rota review). |
|                                       | There are 12 wte EM Consultants providing shopfloor coverage 0800 – 2400hrs 7 days a week. There are also 12 senior registrar grade doctors working various shift patterns, including night shifts, a further 4 senior specialty doctors who work a variety of shifts but not nights. In addition there are junior registrar, ST1-2 and ACP tiers covering 24/7.  |
|                                       | In conjunction with the Urgent Care Centre, the Emergency Department at the Princess Royal University Hospital sees approximately 105,000 patients per year.  |
|                                       | Special ED interests include: Severe Sepsis Care,<br>Hyper-Acute Stroke Management, Bedside Ultrasound,<br>Trauma (as a trauma unit within the trauma network),<br>Simulation, Elderly Care and Event Medicine.   |
|                                       | The department has 4 fully equipped Blue Resuscitation bays, 2 Red Resuscitation bays, 19 Majors cubicles, 4 bay Sub-acute assessment area and 7 Paediatric cubicles (including a dedicated paediatric HDU/resus cubicle).  |
|                                       | The Emergency Department also has: a dedicated CDU (observation ward) for head injury management, toxicology, epilepsy, and other short period observational cases; a rapid assessment area; a separate mental health assessment unit plus a dedicated ED mental health room.   |

Page 142 of 340

| Type of work to expect and learning opportunities                                       | Core work is assessing all types of undifferentiated emergency patients presenting to the ED with access to senior advice, supervision and teaching 24/7.  |
|---|--|
|   | The range of problems managed covers the breadth of emergency medicine with a large proportion of the workload being acute medical, general surgical and paediatric emergencies.   |
|   | As well as direct experiential learning from the above, further learning opportunities include:  |
|   | <ul> <li>2 days of dedicated ED induction teaching at commencement of placement.</li> <li>2 hrs weekly teaching incorporating x-ray sessions, case presentations and topic discussions from consultants.</li> <li>Electronic emergency medicine specific resources.</li> <li>Access to study leave for relevant courses and learning as per Foundation School requirements.</li> <li>Additional dedicated educational development time within the rota.</li> </ul> |
| Where the placement is based  | Princess Royal University Hospital Emergency Department.   |
| Clinical supervisor(s) for the placement  | All Foundation trainees are allocated a dedicated consultant clinical supervisor within the ED in addition to any external educational supervisor. These have completed appropriate supervision training.  |
| Main duties of the placement  | The primary duties of the post are to see new patients within the Emergency Department, with ready access to supervision from more senior staff.  Secondary expectations include attending regular teaching programme, undertaking a clinical audit project and participating in teaching medical students attached to the department  |
| Typical working pattern in this placement (e.g. ward rounds, clinics, theatre sessions) | Full Time, up to 48 hours per week on a full shift, EWTD/JDC compliant rota generally in hours only 8 hour shifts due to supervision needs.  |
| Local education provider (LEP) / employer information                                   | King's College Hospital is a large Teaching Hospital and NHS Foundation Trust situated in South Central London.
