Individual Placement Descriptor***

Trust	London Northwest University Healthcare NHS Trust
Site	Ealing Hospital & Northwick Park Hospital
Trainee Information System (TIS) Post Code (and local post number if known)	
Placement details (i.e. the specialty and sub-specialty)	F2 Critical Care (ITU)
Department	<p>Anaesthetics</p> <p>The Critical Care provision within the Trust is based at both Northwick Park (NWP) and Ealing Hospital (EH).</p> <p>At EH, there are 9 ICU beds based on the third floor. There is a neighbouring 5 bay surgical recovery.</p> <p>The unit treats over > 480 patients annually, of whom > 1/3rd are ventilated. Approximately 80% are medical with a predicted mortality of close to 30%</p>
Type of work to expect and learning opportunities	<p>Clinical – The junior doctor will be responsible for the regular clinical assessment and management of all patients, in conjunction with consultants and intensive care SAS doctors. Close supervision will be available at all times but incumbents of the posts will be trained and encouraged to develop initiative in clinical assessment, diagnosis and active management of their patients, rather than being limited to carrying out a daily list of tasks.</p> <p>Administrative – The junior doctor will have a prime responsibility for the regular and accurate documentation of history, examination, clinical progress, and results of investigations. This will include computerised record keeping, and an ability to cope with basic computer text entry will be expected. This role will also include the day-to-day audit of practice and standards of care.</p> <p>Communication – The junior doctor will work closely with nursing staff, physiotherapists and other associated health professionals, and act as a primary point of contact and referral with other medical teams and diagnostic services. Intensive care is a potentially stressful environment and much of the activity occurs out of hours. Appointees will be expected to communicate effectively and professionally at all times,</p>

	<p>both with members of the public and with fellow staff of all ranks and disciplines</p> <p>TRAINING OPPORTUNITIES</p> <p>The educational objectives of this critical care placement are:</p> <ul style="list-style-type: none"> • To become better able to recognise the very sick or rapidly deteriorating patient • To be able to work in the multi-disciplinary teams that run critical care units • To recognise the limited resource of critical care and gain an understanding of how admission to critical care should be prioritised. • To recognise the ceiling of care and when escalation is appropriate • To develop enhanced procedural skills such as placement of chest drains and central venous catheters • To understand the additional responsibilities and mechanisms of out of hours working in critical care units • To experience the way that critical units operate in terms of human factors and technology • To develop confidence in being involved with critical care units. In addition to these objectives, critical care experience will facilitate acquisition of other capabilities such as communication (particular discussion with family members) and palliative care skills.
<p>Where the placement is based</p>	<p>Ealing Hospital and Northwick Park</p>
<p>Clinical supervisor(s) for the placement</p>	<p>Dr T Husain, Dr V Sathianathan,</p>
<p>Main duties of the placement</p>	<p>MEDICAL STAFF OF LNWH CRITICAL CARE SERVICE AT EALING</p> <p><u>Consultants</u></p> <p>There are five ITU consultants, all of whom are dual trained in anaesthesia.</p> <p><u>SAS, Trust and Junior Doctors</u></p> <p>6 SAS doctors providing on-site cover including advanced airway support. All are dual-trained in anaesthesia and ICM.</p> <p>The post holder will work alongside these doctors in a supernumerary role.</p>
<p>Typical working pattern in this placement (e.g. ward rounds, clinics, theatre sessions)</p>	<p>The role requires working a full shift pattern.</p> <p>Your working pattern is arranged across a rota cycle of 7 weeks, and includes:</p> <ul style="list-style-type: none"> • Normal days (0800 – 1700 Monday – Friday)

	<ul style="list-style-type: none">• Long days (0800 – 2000 Monday to Friday)• Weekend shifts (0800 – 2000 Saturday and Sunday)

Placement details (i.e. the specialty and sub-specialty)	F2 Infectious Disease <ul style="list-style-type: none"> • HIV • TB • Hepatitis and General Infection Outpatient Clinic
Department	. The Infectious Diseases (ID) Team at Ealing hospital runs an ID ward as well as HIV, TB, Hepatitis and General Infection outpatient clinics. The team provides an Infection referral service to the rest of the hospital, participates in weekly microbiology and ITU MDTs. The ID Team makes up 1 of 6 general medical firms and all Infectious Diseases consultants contribute to acute general Medicine On calls. Trainees are exposed to a wide variety of Infectious presentations including Sepsis, TB, HIV, returning travellers, immunocompromised hosts and hospital acquired infections. The Infectious Diseases ward is made up of 15 side rooms and the team looks after patients on outlying wards too.
Type of work to expect and learning opportunities	<p>(a) The F2 doctor will work under the supervision of the ID Consultants in the day to day work associated with the care of Infectious Diseases inpatients and outpatients.</p> <p>(b) participate in the General medical on call rota. This will involve seeing patients on the acute unselected "take" and presenting these patients on the intra-take and post take Consultant ward rounds.</p> <p>(c) will be expected to attend and actively participate in Departmental and other teaching sessions.</p> <p>(d) It is expected that the F2 Doctor will assist with the teaching of undergraduate medical students attached to the firm and postgraduate junior doctors.</p> <p>(e) welcome to participate in clinical audit and clinical governance activities within the department of Infectious Diseases.</p> <p style="text-align: center;">Teaching and training</p>

	<ul style="list-style-type: none"> Ealing Hospital is a designated associated teaching hospital of the Imperial College School of Medicine, University of London. Medical students have junior and senior attachments in medicine and many later become F1/F2 doctors at the hospital. There is an active postgraduate education department with weekly meetings in various specialties and a general weekly lunchtime meeting open to medical staff from all departments. The postgraduate centre has undergone improvements in recent years with modern IT rooms and a very well equipped library and literature search facility. Weekly grand rounds are held at Ealing Hospital including a monthly Schwartz round to develop the delivery of compassionate care. The medical directorate as well as speciality teams have clinical governance meetings as well as morbidity and mortality meetings.

Trust	London North West University Healthcare NHS Trust
Site	Northwick Park Hospital
Trainee Information System (TIS) Post Code (and local post number if known)	
Placement details (i.e. the specialty and sub-specialty)	F1 Cardiology
Department	The cardiology department is based on Jenner ward (9th floor). The department is split into CCU (coronary care unit) and the cardiology ward. The CCU is staffed by SHOs and more senior doctors, not FY1s. The ward includes areas including the Chest Pain Assessment Unit (CPAU) and the heart failure unit. There are 3 FY1s and 2-3 SHOs in total. One of SHOs staffs the CCU with 8-10 patients every week. SHOs are doing the ward cover shifts for cardiology (including cross-cover for other wards like haematology).
Type of work to expect and learning opportunities	F1s are ward based throughout their weekly schedule and are expected to look after all aspects of patient care, admin work and seeking help from the relevant medical/surgical specialty when needed. They are also expected to do acute medicine shifts for their on-calls. There are opportunities to shadow in the cardiac catheter lab when the ward is well staffed.
Where the placement is based	Northwick Park Hospital
Clinical supervisor(s) for placement	Dr Bethell / Dr Violaris / Dr. El Ghamaz
Main duties of the placement	Daily ward rounds. Half of the patients are seen by the consultant and the other half are seen by the registrar. Each junior doctor (FY1 or SHO) prepares the notes for a set of patients and sees the patient with the registrar or the consultant. After the ward round they will need to carry out relevant jobs including booking investigations, prescribing medications, specialty referrals, chasing results and working with MDT to ensure successful and timely discharge of patients.

*It is important to note that this description is a typical example of the placement and may be subject to change.

<p>Typical working pattern in this placement (<i>e.g. ward rounds, clinics, theatre sessions</i>)</p>	<p>Daily ward rounds normally start around 0900, both on Jenner and CCU. F1/SHOs are expected to summarise patients' issues and progress in the notes before a senior comes to review the patient with them.</p> <p>Every Tuesday there is a weekly Joint Cardiology-Cardiothoracic (JCC) meeting, where patients considered for cardiac surgery are discussed. F1s must ensure relevant paperwork for such patients are completed in advance of this meeting.</p> <p>On call requirements: On call shifts take place in acute medicine (clerking in ED or AMU cover). They include 3 weekends in the 4-month placement.</p>

Type of work to expect and learning opportunities	<p>F1 Doctors will alternate their work in the ward and A&E weekly. In the 'normal' working day on the ward the F1 is expected to deliver the daily medical care of all the patients on their ward irrespective of specialty. During A&E the F1 will be involved with the generic clerking of patients being admitted and the ongoing care of the patients in the unit.</p> <p>The overall educational objectives of the F1 year are to provide the trainee with the knowledge, skills and attitudes to be able to</p> <ul style="list-style-type: none"> • Take a history and examine a patient • Identify and synthesise problems • Prescribe safely • Keep an accurate and relevant medical record • Manage time and clinical priorities effectively • Communicate effectively with patients, relatives and colleagues • Use evidence, guidelines and audit to benefit patient care • Act in a professional manner at all times

*It is important to note that this description is a typical example of the placement and may be subject to change.

	<ul style="list-style-type: none"> • Cope with ethical and legal issues which occur during the management of patients with general medical problems • Educate patients effectively • Become life-long learners and teachers. • To regularly liaise with tertiary centres like GOSH and the Royal Brompton and to attempt supervised procedures like venepuncture, heel pricks and cannulation.
Where the placement is based	Northwick Park Hospital, Jack's Place and Paediatric A&E
Clinical supervisor(s) for the placement	Dr Wolfgang Muller, Dr Ashiya Ali
Main duties of the placement	<p>The F1 doctor is responsible with other staff for the ward care of patients and the maintenance of the patient's medical record. They are expected to attend the structured teaching programmes provided by the department. The doctor will be responsible for other specific clinical duties as allocated by consultants, registrars and SHOs including performing other duties in occasional emergencies and unforeseen circumstances.</p> <p>During A&E the F1 doctor has the opportunity to initially clerk and examine patients and present and review them with the registrar/consultant. This is a great opportunity for learning and case-based discussion.</p>
Typical working pattern in this placement (e.g. ward rounds, clinics, theatre sessions)	<p>Ward Week: Mon-Fri: 8am handover; 9am Ward round and ward jobs; Finish 4:30pm</p> <p>Mon – 12.30 Radiology Meeting Tues – 12:00 Psychosocial Meeting 13:00 Paediatric Grandround / F1 teaching</p> <p>Wed - 8.45am SHO teaching Thus - 8.45am Consultant teaching Fri - 8.45am Registrar teaching</p> <p>A&E Week: Mon - Fri: Discharge Summaries and A&E Finish 4.30pm</p> <p>Sat & Sun: 1 in 4 - 8am Handover, 9am Ward Round – finish 8:30pm</p>

**Foundation Programme
Individual Placement Descriptor***

Trust	London North West University Healthcare NHS Trust
Site	Northwick Park Hospital, spread across various wards
Trainee Information System (TIS) Post Code (and local post number if known)	
Placement details (i.e. the specialty and sub-specialty)	F1 General Surgery
Department	General surgery is run as an 'Emergency Surgical Unit', there is no distinction between upper and lower GI with all patients coming under the acute consultants and F1s work for all 6 of the Emergency Surgery Consultants. There is usually 2 F1s working per week as one is often on leave and the other in HDU.
Type of work to expect and learning opportunities	<p>Working hours are Monday - Friday 8-6, 2 weeks of HDU (8-5), one week of zero days with no on calls or weekend. F1s work for the 'chronic team', on a Monday and Friday morning there is a handover meeting where patients who have had their operation or surgical management are handed from the acute on call team to the chronic team for continued surgical management. These days are often busy with a lot of TTAs, organising of investigations. One F1 normally goes on this "post take" ward round and the other stays with the chronic patients that have rolled over from the week before.</p> <p>Other days morning ward round with a registrar to see patients, see unwell patients, carry out jobs, board round at 4pm.</p> <p>Generally days are busy with lots of jobs and managing unwell patients which is good for clinical exposure and improving your time management skills.</p> <p>Large team of nurse practitioners work with team who often help do bloods, cannulas, organise investigations, able to prescribe / order imaging.</p> <p>Limited clerking experience. High turnover of patients means that F1s are continually being exposed to a reasonable level of unwell patients. Opportunity to go to theatre on quieter days.</p>

*It is important to note that this description is a typical example of the placement and may be subject to change.

Where the placement is based	Northwick Park Hospital
Clinical supervisor(s) for the placement	Various Surgical Consultants
Main duties of the placement	<p>Monday: Handover 8am followed by post take ward round. Radiology meeting 12.30 followed by board round of all patients with consultant Tuesday: Reg round, 2pm Care of Elderly meeting - discussion of medical management of elderly patients under our care</p> <p>Wednesday: Reg round Thursday: Reg round</p> <p>Friday: Hanover 8am followed by post take ward round. Surgical teaching 12.30 (free lunch)</p> <p>HDU week: FY1 looks after 5-10 HDU patients along with consultant anaesthetist, FY1 often sees patients first in morning followed by round with anaesthetist (varies depending on consultant). Usually a consultant of the week basis. Good exposure to Art lines, central lines, non invasive ventilation etc.</p>
Typical working pattern in this placement (e.g. ward rounds, clinics, theatre sessions)	As above

Trust	London North West University Healthcare NHS Trust
Site	Northwick Park Hospital
Trainee Information System (TIS) Post Code (and local post number if known)	
Placement details (i.e. the specialty and sub-specialty)	F1 Urology
Department	The department of urology comprises 7 consultant urologists, each spending one week on call. The team also comprises 9 registrars (with one assigned to ward cover at all times), 3 SHOs and 3 F1s (all of which are based on the ward).
Type of work to expect and learning opportunities	Essentially a ward based job comprising the day-to-day management of ward based patients, but with ample opportunities to attend theatre or clinics for learning, usually there is plenty of ward cover if you would like to get away from the ward for other purposes ie. audits etc.. The urology job includes spending 2 weeks in the surgical elective high dependency unit (eHDU) which involves overseeing approximately 8-10 eHDU patients with consultant anaesthetist and relevant teams looking after the patients.
Where the placement is based	Northwick Park F1 Urology
Clinical supervisor(s) for the placement	Mainly Mr. Erik Havranek, Mr Rajesh Kavia
Main duties of the placement	Responsible for the ward care of urology patients, including maintenance of medical record, updating handover lists, ordering radiological investigations and interventions and facilitating patient discharge. Frequent opportunities to engage in lecture based/practical teaching organised by postgraduate education department and urology department.
Typical working pattern in this placement (e.g. ward rounds, clinics, theatre sessions)	Mon – Friday 8am -5pm, with 1 in 6 long days (8am – 8pm). Daily 8am ward round led by registrar or Consultant, opportunity for theatre any weekday afternoon when ample ward cover Monday: Ward jobs

*It is important to note that this description is a typical example of the placement and may be subject to change.

	<p>Tuesday: Ward jobs / FY1 teaching at 1pm Wednesday: Ward jobs / Urology teaching at 1pm Thursday: Ward jobs Friday: Ward jobs / FY optional teaching at 2:15pm Saturday: 1 in 6 on call Sunday: 1 in 6 on call</p> <p>Urology weekend cover requirements: 1 in 6 (8am – 8pm) ward cover</p>

Site	Northwick Park Hospital ITU
Trainee Information System (TIS) Post Code (and local post number if known)	
Placement details (i.e. the specialty and sub-specialty)	F2 ITU
Department	The ITU department consists of 10 consultants that rotate weekly from NPH. They have background in medicine or anaesthetics. There are up to 12 beds on the unit.
Type of work to expect and learning opportunities	ITU is consultant-lead with support from the on call ITU registrar. Juniors are expected to be present on the morning and afternoon ward rounds. Patients are examined prior to morning ward round and presented to the consultant on the ward round. SHOs can usually expect to see 2-3 patients a day in most circumstances. There is thus much time for teaching and developing practical skills during the afternoon. An F2 in ITU can expect to have many chances to practice arterial lines, central lines and Vascaths, as well as learning ultrasound techniques. This is an un-banded post so you can either work 4 long days or 5 standard days. Ward round starts at 08:00.
Where the placement is based	Northwick Park Hospital ITU
Clinical supervisor(s) for the placement	Various ITU Consultants
Main duties of the placement	<p>Daily patient reviews Ordering imaging requests Making referrals to other specialties Liaise with GP Complete discharge summaries and handover to the wards Update families Practical procedures under supervision</p> <p>Juniors are NOT expected to accept/refuse ITU admissions</p>

*It is important to note that this description is a typical example of the placement and may be subject to change.

Site	Northwick Park Hospital
Trainee Information System (TIS) Post Code (and local post number if known)	
Placement details (i.e. the specialty and sub-specialty)	FY2 Intermediate Care - Fletcher Ward Department of Medicine for the Elderly
Department	2 consultants, 1 SpR, 3 SHOs, 1 F1
Type of work to expect and learning opportunities	<p>Fletcher ward is a DMOP ward with 30 beds.</p> <p>The patients come from two main streams:</p> <p>The first are from the Orthopaedic ward and come to Fletcher ward for Comprehensive Geriatric Assessment including rehabilitation following (most commonly) neck of femur fractures. You can expect to manage the medical issues whilst these patients have rehabilitation with the physiotherapists, as they commonly have multiple comorbidities and are at risk of develop hospital acquired infections. In addition, you can learn to optimise pain management post operatively to enable the patient to fully engage with physiotherapy.</p> <p>The second set come from the acute medicine wards. You will get a lot of learning opportunities to learn the management of common medical problems such as infections, heart failure decompensation and kidney injury. In addition to that, you will have the opportunity to review unwell patients when on-call.</p> <p>You will become comfortable with breaking bad news and ceiling of treatment discussions, with the family and the patient and become familiar with end of life management.</p> <p>You will also update families frequently so you will develop your communication skills.</p> <ul style="list-style-type: none"> • Active participation in patient care utilising the Comprehensive Geriatric Assessment • Conducting independent ward rounds and attending Consultant led ward rounds • Liaise with families and wider MDT with respect to all aspects of patient management • Writing electronic discharge summaries and TTAs • Recognising end of life and management of patients and families in this situation • Managing multi-morbidity and long-term conditions • Rehabilitation of orthogeriatric patients
Where the placement is based	Northwick Park Hospital

*It is important to note that this description is a typical example of the placement and may be subject to change.

Clinical supervisor(s) for the placement	Dr Chua Dr Bhattacharyya (if you start on the Orthopaedic)
Main duties of the placement	<p>The ward is generally split into 2 Consultant teams. Juniors are then split between them. Duties include scribing on ward round then carrying out jobs over the course of the day. On days without Consultant ward rounds, SHOs will do independent Ward Rounds. Consultants see all new and sick patients in the morning.</p> <p>Attendance at handover from the night team</p> <p>On-call cover (including evenings and weekends) for various wards but usually Fletcher Ward carrying bleep 239. This bleep also covers medical outliers on Evelyn but this makes up a very small amount of the workload.</p> <p>After 5pm outstanding jobs for any patients on the ward are handed over to 1 SHO. Reviewing sick patients in the evening and escalating accordingly – via the ward cover med registrar on bleep 511. Handing over sick patients or jobs for the night at the night handover at 9pm.</p> <p>Weekends jobs will be put on Epro by the team on Friday. Some patients will need reviewed on Sat +- Sun. Many patients will need bloods chased. Other jobs may be needed. Any patients who are admitted to the ward during an on-call need to be reviewed – when they reach the ward you are the one to action PTWR jobs. There are rarely verbal handovers for these patients so keeping an eye for new ones coming up is required.</p> <p>At the weekend there are discharge WRs where a consultant goes through the patients with weekend EDDs. You'll be made aware of these patients and any necessary jobs by the team on Friday afternoon.</p>
